IBM z17 (z17)															

In this exhibit, Machine type 9175 is described with a model nomenclature of Nxx where N represents the capacity setting (4 is smallest, 7 is largest) and xx represents the number of general purpose central processors (CPs). For machines above 99 CPs, xx is an alphanumeric code: A0 = 100 engines, A1 = 101 engines, A2=102... B0 = 110 engs, C0 = 120 engs, D0 = 130 engs, E0 = 140 engs, F0 = 150 engs, G0 = 160 engs, H0 = 170 engs, I0 = 180 engs, J0 = 190 engs, K0 = 200 engs. For 9175, the hardware machine model (ME1) is not an indicator of machine capacity.

(A) 9175, 3931, 8651, 3906, 2964, 2827 and 2817 models qualify for AWLC pricing when all AWLC terms and conditions are met; 3932, 8562, 3907, 2965, 2828 and 2818 models qualify for AWLC pricing when participating in an AWLC Sysplex and all other AWLC terms and conditions are met

IBM z16 (z16)

IBM Mainframe Exhibit

Updated 5/2/2025

In this exhibit, Machine type 3931 is described with a model nomenclature of Nxx where N represents the capacity setting (4 is smallest, 7 is largest) and xx represents the number of general purpose central processors (CPs). For machines above 99 CPs, xx is an alphanumeric code: A0 = 100 engines, A1 = 101 engines, A2=102... B0 = 110 engines, C0 = 120 engines, D0 = 130 engines, E0 = 140 engines, F0 = 150 engines, G0 = 160 engines, H0 = 170 engines, I0 = 180 engines, J0 = 190 engines. For 3931, the hardware machine model (A01) is not an indicator of machine capacity.

(A) 9175, 3931, 8651, 3906, 2964, 2827 and 2817 models qualify for AWLC pricing when all AWLC terms and conditions are met; 3932, 8562, 3907, 2965, 2828 and 2818 models qualify for AWLC pricing when participating in an AWLC Sysplex and all other AWLC terms and conditions are met

IBM LinuxONE Emperor 4

In this exhibit, LinuxONE Emperor 4 is Machine type 3931 with a model nomenclature of 400 (meaning Linux engines only) or 401 (meaning Linux engines with GDPS Virtual Appliance). Machine capacity is determined based upon the number of Linux engines. For LinuxONE Emperor 4, the hardware machine model (LT1) is not an indicator of machine capacity.

IBM	3931-400							IPLA Only							Yes
IBM	3931-401							IPLA Only							Yes

IBM z16 A02 (also applies to rackmounted AGZ)

In this exhibit, Machine type 3932 is described with a model nomenclature of xyy where x represents the capacity setting (A is smallest, Z is largest) and yy represents the number of general purpose central processors (CPs). For 3932 the hardware machine model (A02) is not an indicator of machine capacity.

(A)	*9175, 3931, 8651, 3906, 2964, 2827 and 2817 models qualify for AWLC pricing when all AWLC terms and conditions are met; 3932, 8562, 3907, 2965, 2828 and 2818 models qualify for AWLC pricing when participating in an AWLC Sysplex and all other AWLC terms and conditions are met*														
(S)	*Models qualify for offering when participating in a Sysplex and all other offering and Sysplex conditions are met.*														
IBM LinuxONE Rockhopper 4															
In this exhibit, LinuxONE Rockhopper 4 is Machine type 3932 with a model nomenclature of A00 (meaning Linux engines only) or C01 (meaning Linux engines with GDPS Virtual Appliance). Machine capacity is determined based upon the number of Linux engines. For LinuxONE Emperor 4, the hardware machine model (LA2 or AGL) is not an indicator of machine capacity.															
IBM	3932-A00							IPLA Only							Yes
IBM	3932-C01							IPLA Only							Yes
IBM z15 (z15)															
In this exhibit, Machine type 8561 is described with a model nomenclature of Nxx where N represents the capacity setting (4 is smallest, 7 is largest) and xx represents the number of general purpose central processors (CPs). For machines above 99 CPs, xx is an alphanumeric code: A0 = 100 engines, A1 = 101 engines, A2=102... B0 = 110 engines, C0 = 120 engines, D0 = 130 engines, E0 = 140 engines, F0 = 150 engines, G0 = 160 engines, H0 = 170 engines, I0 = 180 engines, J0 = 190 engines. For 8561, the hardware machine model (T01) is not an indicator of machine capacity.

(A) 9175, 3931, 8651, 3906, 2964, 2827 and 2817 models qualify for AWLC pricing when all AWLC terms and conditions are met; 3932, 8562, 3907, 2965, 2828 and 2818 models qualify for AWLC pricing when participating in an AWLC Sysplex and all other AWLC terms and conditions are met

IBM LinuxONE III

In this exhibit, LinuxONE III is Machine type 8561 with a model nomenclature of 400 (meaning Linux engines only) or 401 (meaning Linux engines with GDPS Virtual Appliance). Machine capacity is determined based upon the number of Linux engines. For LinuxONE III, the hardware machine model (LT1) is not an indicator of machine capacity.

IBM	8561-400							IPLA Only							Yes
IBM	8561-401							IPLA Only							Yes

IBM z15 T02

In this exhibit, Machine type 8562 is described with a model nomenclature of xyy where x represents the capacity setting (A is smallest, Z is largest) and yy represents the number of general purpose central processors (CPs). For 8562 the hardware machine model (T02) is not an indicator of machine capacity.

(A) 9175, 3931, 8651, 3906, 2964, 2827 and 2817 models qualify for AWLC pricing when all AWLC terms and conditions are met; 3932, 8562, 3907, 2965, 2828 and 2818 models qualify for AWLC pricing when participating in an AWLC Sysplex and all other AWLC terms and conditions are met

(S) Models qualify for offering when participating in a Sysplex and all other offering and Sysplex conditions are met.

IBM LinuxONE III LT2

In this exhibit, LinuxONE III LT2 is Machine type 8562 with a model nomenclature of A00 (meaning Linux engines only) or C01 (meaning Linux engines with GDPS Virtual Appliance). Machine capacity is determined based upon the number of Linux engines. For LinuxONE III LT2, the hardware machine model (LT2) is not an indicator of machine capacity.

IBM	8562-A00							IPLA Only							Yes
IBM	8562-C01							IPLA Only							Yes

IBM Mainframe Exhibit

Updated 5/2/2025

Vendor	Machine	WLC	PSLC	Full Capacity MSUs	Coupling Facility	Group	PR/SM	Other	zNALC	MWLC	MWP	zCAP	zWPC	CMP	z/VM Sub-Capacity
IBM z14 (z14)															
In this exhibit, Machine type 3906 is described with a model nomenclature of Nxx where N represents the capacity setting (4 is smallest, 7 is largest) and xx represents the number of general purpose central processors (CPs). For machines above 99 CPs, xx is an alphanumeric code: A0 = 100 engines, A1 = 101 engines, A2=102... B0 = 110 engines, C0 = 120 engines, D0 = 130 engines, E0 = 140 engines, F0 = 150 engines, G0 = 160 engines, H0 = 170 engines. For 3906, the hardware machine model (M01, M02, M03, M04, M05) is not an indicator of machine capacity.

(A) 9175, 3931, 8651, 3906, 2964, 2827 and 2817 models qualify for AWLC pricing when all AWLC terms and conditions are met; 3932, 8562, 3907, 2965, 2828 and 2818 models qualify for AWLC pricing when participating in an AWLC Sysplex and all other AWLC terms and conditions are met

IBM LinuxONE Emperor II

In this exhibit, LinuxONE Emperor II is Machine type 3906 with a model nomenclature of 400 (meaning Linux engines only) or 401 (meaning Linux engines with GDPS Virtual Appliance). Machine capacity is determined based upon the number of Linux engines. For LinuxONE Emperor II, the hardware machine model (LM1, LM2, LM3, LM4, LM5) is not an indicator of machine capacity.

IBM z14 Model ZR1															
In this exhibit, Machine type 3907 is described with a model nomenclature of xyy where x represents the capacity setting (A is smallest, Z is largest) and yy represents the number of general purpose central processors (CPs). For 3907 the hardware machine model (ZR1) is not an indicator of machine capacity.

(A) 9175, 3931, 8651, 3906, 2964, 2827 and 2817 models qualify for AWLC pricing when all AWLC terms and conditions are met; 3932, 8562, 3907, 2965, 2828 and 2818 models qualify for AWLC pricing when participating in an AWLC Sysplex and all other AWLC terms and conditions are met

(S) Models qualify for offering when participating in a Sysplex and all other offering and Sysplex conditions are met.

IBM LinuxONE Rockhopper II

In this exhibit, LinuxONE Emperor II is Machine type 3907 with a model nomenclature of A00 (meaning Linux engines only) or C02 (meaning Linux engines with GDPS Virtual Appliance). Machine capacity is determined based upon the number of Linux engines. For LinuxONE Rockhopper II, the hardware machine model (LR1) is not an indicator of machine capacity.

IBM	3907-A00							IPLA Only							Yes
IBM	3907-C01							IPLA Only							Yes

IBM Mainframe Exhibit

Updated 5/2/2025

IBM z13 (z13)

In this exhibit, Machine type 2964 is described with a model nomenclature of Nxx where N represents the capacity setting (4 is smallest, 7 is largest) and xx represents the number of general purpose central processors (CPs). For machines above 99 CPs, xx is an alphanumeric code: A0 = 100, A1 = 101, A2=102... B0 = 110, C0 = 120, D0 = 130, E0 = 140. For 2964, the hardware machine model (N30, N63, N96, NC9, NE1) is not an indicator of machine capacity.

(A) 9175, 3931, 8651, 3906, 2964, 2827 and 2817 models qualify for AWLC pricing when all AWLC terms and conditions are met; 3932, 8562, 3907, 2965, 2828 and 2818 models qualify for AWLC pricing when participating in an AWLC Sysplex and all other AWLC terms and conditions are met

IBM LinuxONE Emperor

In this exhibit, LinuxONE Emperor is Machine type 2964 with a model nomenclature of 400 (meaning Linux engines only) or 401 (meaning Linux engines with GDPS Virtual Appliance). Machine capacity is determined based upon the number of Linux engines. For LinuxONE Emperor, the hardware machine model (L30, L63, L96, LC9, LE1) is not an indicator of machine capacity.

IBM	2964-400							IPLA Only							Yes
IBM	2964-401							IPLA Only							Yes

IBM z13s (z13s)															
In this exhibit, Machine type 2965 is described with a model nomenclature of xyy where x represents the capacity setting (A is smallest, Z is largest) and yy represents the number of general purpose central processors (CPs). For 2965 the hardware machine model (N10, N20) is not an indicator of machine capacity.

(A) 9175, 3931, 8651, 3906, 2964, 2827 and 2817 models qualify for AWLC pricing when all AWLC terms and conditions are met; 3932, 8562, 3907, 2965, 2828 and 2818 models qualify for AWLC pricing when participating in an AWLC Sysplex and all other AWLC terms and conditions are met

(S) Models qualify for offering when participating in a Sysplex and all other offering and Sysplex conditions are met.

IBM LinuxONE Rockhopper

In this exhibit, LinuxONE Rockhopper is Machine type 2965 with a model nomenclature of A00 (meaning Linux engines only) or C01 (meaning Linux engines with GDPS Virtual Appliance). Machine capacity is determined based upon the number of Linux engines. For LinuxONE Rockhopper, the hardware machine model (L10, L20) is not an indicator of machine capacity.

IBM	2965-A00							IPLA Only							Yes
IBM	2965-C01							IPLA Only							Yes

IBM zEnterprise EC12 (zEC12)															
In this exhibit, Machine type 2827 is described with a model nomenclature of Nxx where N represents the capacity setting (4 is smallest, 7 is largest) and xx represents the number of general purpose central processors (CPs). For 2827, the hardware machine model (H20, H43, H66, H89, HA1) is not an indicator of machine capacity.

IBM zEnterprise BC12 (zBC12)															
In this exhibit, Machine type 2828 is described with a model nomenclature of xyy where x represents the capacity setting (A is smallest, Z is largest) and yy represents the number of general purpose central processors (CPs). For 2828, the hardware machine model (H06, H13) is not an indicator of machine capacity.

(A) 9175, 3931, 8651, 3906, 2964, 2827 and 2817 models qualify for AWLC pricing when all AWLC terms and conditions are met; 3932, 8562, 3907, 2965, 2828 and 2818 models qualify for AWLC pricing when participating in an AWLC Sysplex and all other AWLC terms and conditions are met

(S) Models qualify for offering when participating in a Sysplex and all other offering and Sysplex conditions are met.

IBM zEnterprise 196 (z196)															
In this exhibit, Machine type 2817 is described with a model nomenclature of Nxx where N represents the capacity setting (4 is smallest, 7 is largest) and xx represents the number of general purpose central processors (CPs). For 2817, the hardware machine model (M15, M32, M49, M66, M80) is not an indicator of machine capacity.

(A) 9175, 3931, 8651, 3906, 2964, 2827 and 2817 models qualify for AWLC pricing when all AWLC terms and conditions are met; 3932, 8562, 3907, 2965, 2828 and 2818 models qualify for AWLC pricing when participating in an AWLC Sysplex and all other AWLC terms and conditions are met

(2) 2817 and 2818 models qualify for MWP when a 2827 or 2828 is being operated in the same enterprise and all other MWP conditions are met.

IBM zEnterprise 114 (z114)															
In this exhibit, Machine type 2818 is described with a model nomenclature of xyy where x represents the capacity setting (A is smallest, Z is largest) and yy represents the number of general purpose central processors (CPs). For 2818, the hardware machine model (M05, M10) is not an indicator of machine capacity.

(A) 9175, 3931, 8651, 3906, 2964, 2827 and 2817 models qualify for AWLC pricing when all AWLC terms and conditions are met; 3932, 8562, 3907, 2965, 2828 and 2818 models qualify for AWLC pricing when participating in an AWLC Sysplex and all other AWLC terms and conditions are met

(2) 2817 and 2818 models qualify for MWP when a 2827 or 2828 is being operated in the same enterprise and all other MWP conditions are met.

(S) Models qualify for offering when participating in a Sysplex and all other offering and Sysplex conditions are met.

In this exhibit, Machine type 2097 is described with a model nomenclature of Nxx where N represents the capacity setting (4 is smallest, 7 is largest) and xx represents the number of general purpose central processors (CPs). For 2097, the hardware machine model (E12, E26, E40, E56, E64) is not an indicator of machine capacity.

IBM System z9 Enterprise Class (z9 EC)															
In this exhibit, Machine type 2094 is described with a model nomenclature of Nxx where N represents the capacity setting (4 is smallest, 7 is largest) and xx represents the number of general purpose central processors (CPs). For 2094, the hardware machine model (S08, S18, S28, S38, S54) is not an indicator of machine capacity.

In this exhibit, Machine type 2096 is described with a model nomenclature of xyy where x represents the capacity setting (A is smallest, Z is largest) and yy represents the number of general purpose central processors (CPs). For 2096, the hardware machine model (R07, S07) is not an indicator of machine capacity.

IBM Mainframe Exhibit

Updated 5/2/2025

Vendor	Machine	WLC	PSLC	Full Capacity MSUs	Coupling Facility	Group	PR/SM	Other	zNALC	MWLC	MWP	zCAP	zWPC	CMP	z/VM Sub-Capacity

In the Machine column, the letter "x" means any alphabetic or numeric character. "@" means any alphabetic or numeric character other than "x".

Millions of Service Units per Hour (MSU) describes machine capacity

Country Multiplex License Charges (CMLC), Advanced Workload License Charges (AWLC), Advanced Entry Workload License Charges (AEWLC), Workload License Charges (WLC), Entry Workload License Charges (EWLC), Midrange Workload License Charges (MWLC) and System z New Application License Charges (zNALC) are capacity-based pricing models based on the capacity of a machine, stated in MSUs. If all conditions are met, these metrics allow customers to pay for sub-capacity eligible programs at sub-capacity levels.

Country Multiplex Pricing (CMP) is an enhancement to sub-capacity pricing for machines with CMLC pricing when all CMP terms and conditions are met. Machine types designated as "C" are "Currently Eligible Machines" which are required to be included in a new Multiplex and allowed to be added to an existing Multiplex. Machine types designated as "P" are "Previously Eligible Machines" which will remain in an existing Multiplex but, as of the date indicated, will not be included in a new Multiplex nor allowed to be added to an existing Multiplex.

MWLC does not support aggregation. MWLC applies only to z/VSE V4 and later versions, and select key middleware programs.

EWLC does not support aggregation.

AEWLC does not support aggregation.

zNALC applies only to the z/OS operating system and is only available when a Qualified Workload is present, and all other terms are met.

Mobile Workload Pricing (MWP) is an enhancement to sub-capacity pricing for machines with AWLC, AEWLC, zNALC or CMLC pricing when all other MWP conditions are met.

z Systems Collocated Application Pricing (zCAP) is an enhancement to sub-capacity pricing for machines with AWLC, AEWLC, zNALC or CMLC pricing when all other zCAP conditions are met.

z/VM Sub-capacity pricing is available for machines designated as "Yes" if all terms and conditions are met. z/VM Sub-capacity pricing is based upon the number of general purpose central processors (CPs) and Integrated Facility for Linux features (IFLs) being used by z/VM V6.3 and later versions, and select key middleware programs.

z Systems Workload Pricing for Cloud (zWPC) is an enhancement to sub-capacity pricing for machines with AWLC, AEWLC, zNALC, or CMLC pricing when all other zWPC conditions are met.

Growth Opportunity License Charge (GOLC) is a pricing model limited to machines that have been approved for one of the GOLC categories, H30, H50 or H70 on machine type 7060.

zSeries Entry License Charge (zELC) is a model based pricing option limited to those machines that have been approved for one of the zELC categories.

Tiered Entry Workload License Charges price structure (TWLC) is associated with the EWLC and AEWLC pricing metrics, for eligible products. TWLC pricing is a capacity-based pricing model and eligible machines are classified into tiers, according to the table shown below:

Tier A, 1-11 MSUs	Tier B, 12 - 15 MSUs	Tier C, 16 - 40 MSUs
Tier D, 41-75 MSUs	Tier E, 76-1500 MSUs	Tier F, 1501+ MSUs

In the case that GOLC is not available for a software product on a 7060, or AEWLC/EWLC/TWLC/zELC is not available for a software product on a 2066/2086/2096/2098/2818/2828/2965, then the product should be priced according to Graduated Monthly License Charges (GMLC) BASIC. The other variations of GMLC pricing (MOSP, DSLO, MOSP/DSLO) are not available on these machine types.

IBM Mainframe Exhibit

Updated 5/2/2025

Vendor	Machine	WLC	PSLC	Full Capacity MSUs	Coupling Facility	Group	PR/SM	Other	zNALC	MWLC	MWP	zCAP	zWPC	CMP	z/VM Sub-Capacity

Parallel Sysplex License Charge (PSLC) is a capacity based pricing model based on the capacity of a machine as stated in MSUs. Standalone PSLC pricing is available for all machines designated as either "PSLC=Single" or "PSLC=Yes". Aggregated PSLC pricing is only available for machines in a qualified parallel sysplex and designated as PSLC=Yes or PSLC=Agg.

Coupling Facility (CF): To qualify for aggregated PSLC, WLC, zNALC or AWLC pricing two or more machines must be actively coupled using an approved Coupling Facility.

Group charging or graduated charging is a capacity based pricing model where the charges are based on the group the machine is classified. This pricing model has been withdrawn for new MVS, OS/390 and z/OS products.

Indexed Monthly License Charge (IMLC) is a capacity based pricing model based on the capacity of a machine as stated in MSUs for machines over 80 MSUs running OS/390, z/OS or MVS programs. IMLC has been withdrawn for new orders.

Extended License Charge (ELC) is a capacity based pricing model based on the capacity of a machine as stated in MSUs. ELC pricing is limited to VM and VSE software on machines over 80 MSUs.

Software licensed under the IBM Program License Agreement (IPLA) has an up-front license fee and an ongoing (optional) maintenance fee.

Entry Support License (ESL) is a one time charge (OTC) for designated small capacity processors. The ESL designation is in the GROUP column.

LPAR technology is required to qualify for Multiple Operating System PR/SM pricing (MOSP).

Application StarterPak License (ASPL) charges are available as a monthly license charge on IBM 3000 Models A10 and A20.

CPU Mach, Model: Original administrative convention to represent Non-IBM vendor machines for software designation.
