Scott Shekerow
IBM Senior Content Editor, developerWorks
IBM

In this video, first in a series from IBM developerWorks, some of IBM's prominent female technical leaders share their experience and insight on various technical topics.

To view the introductory video Women in Technology: Making an Impact please access the online version of the article.

In this video, first in a series from IBM developerWorks, some of IBM's prominent female technical leaders share their experience and insight on topics related to their work, careers, and current and future technologies.

You'll hear from the following technical leaders about how IBM technology makes them more productive and competitive, where they'd like to see their work making an impact, and which innovations excite them the most for the future:

• Rachel Reinitz, Distinguished Engineer and CTO, IBM Bluemix Garage
• Ruth Willenborg, Distinguished Engineer, IBM Cloud Ecosystem
• Monica Luke, Senior Technical Staff Member, IBM Cloud DevOps Transformation Team
• Lisa Seacat Deluca, Omni-Channel Technology Strategist and IBM Master Inventor
• Amy Silberbauer, Executive IT Specialist, IBM DevOps
• Lauren Schaefer, Growth Hacking Engineer, IBM Bluemix DevOps Service
“Magic to me is the impossible that you can envision. Well, it's going to become reality because the technology's now there for it. So we're creating magic.”

Join the Tech Topics for Women community on developerWorks to connect with IBM's women technical leaders, as well as many of your peers around the world who share similar challenges with being a software developer in an ever-changing landscape. In the community you'll find and share technology how-tos, best practices, trends, and enablement to grow your skills with IBM and open technologies.
