

Licensed Program Specifications

IBM Rational COBOL Runtime for zSeries Version 6 Release 0 Modification 1 Program Number 5655-R29

IBM¹ Rational COBOL Runtime for zSeries V6.0.1 is a licensed program that provides the runtime libraries for generated COBOL programs developed with Enterprise Generation Language in IBM Rational Business Developer V7.0.0. These libraries provide support for communication and common subroutines, such as data conversion and error management, that are shared by all Enterprise Generation Language programs.

IBM Rational COBOL Runtime for zSeries includes the components needed to prepare generated Enterprise Generation Language COBOL programs to run on z/OS. IBM Rational COBOL Runtime for zSeries includes libraries that contain the copybooks and load modules for preparing generated programs for the run-time environment, and a run-time library that implements installation-specified error handling, transaction control, and other functions shared among generated COBOL programs.

IBM Rational COBOL runtime for zSeries also includes libraries that contain the procedures and utilities for preparing generated VisualAge Generator V4.5 programs for z/OS, and a run-time library that implements installation-specified error handling, transaction control, and other functions shared among the VisualAge Generator programs.

Specified Operating Environment

Machine Requirements

The basic requirement is for a processor that supports the prerequisite operating system and has sufficient processor storage to meet the requirements of the operating system, IBM Rational COBOL Runtime for zSeries V6.0.1, the application programs, and all other software being run. IBM Rational COBOL Runtime for zSeries V6.0.1 will run on any hardware

configuration supported by the licensed programs specified below in the Software Requirements.

Software Requirements

The following are the software requirements for Rational COBOL Runtime for zSeries V6.0.1:

Prerequisites

- One of the following environments, including batch functions with the appropriate prerequisites:
 - z/OS V1.6 (5694-A01) or later, with the following base elements:
 - Binder (Link-Editor)
 - High Level Assembler
 - Interactive System Productivity Facility (ISPF)
 - IBM Language Environment
 - UNIX System Services
 - Hierarchical File System (HFS)
 - IP Services component of IBM Communications Server
 - IBM HTTP Server (if using the VAGen or EGL Java Wrapper Support)
 - SMP/E V3.1. This version is available as 5655-G44 or as an element in z/OS (5694-A01).

Corequisites

- For compiling generated COBOL programs, one of the following:
 - IBM COBOL for OS/390 and VM V2.1, or later (5648-A25). This is the minimum requirement. Use of this product does not enable Unicode support for generated COBOL programs used with IBM Rational COBOL Runtime.
 - Enterprise COBOL for z/OS V3.1, or later (5655-G53). Use of this product enables the

1. IBM, Rational, WebSphere, DB2, CICS, IMS/ESA, zSeries, z/OS, OS/390, Language Environment and VisualAge are trademarks or registered trademarks of the IBM Corporation in the United States, other countries, or both.

Unicode support for generated COBOL programs used with IBM Rational COBOL Runtime.

- DB2 UDB. One of the following must be installed on the host in order to use DB2 Database access on z/OS:
 - DB2 for OS/390 and z/OS V7 (5675-DB2).
 - DB2 for z/OS V8 (5625-DB2).
- IBM/ESA. IMS/ESA V7.1, or later (5655-B01) must be installed on the host to support applications using IMS database and data communications.
- WebSphere MQ. WebSphere MQ for z/OS V5.3.1, or later (5655-F10) must be installed on the host to support message queuing with generated applications.
- CICS Transaction Server. One of the following must be installed to support applications generated for execution under CICS:
 - IBM CICS Transaction Server for OS/390 V1.3 (5655-147).
 - IBM CICS Transaction Server for z/OS V2.2 or later (5697-E93). (This requires PTF UQ69442 be installed.)
 - IBM CICS Transaction Server for z/OS V3.1 (5655-M15).
- CICS Transaction Gateway. One of the following should be installed to support applications using the J2EE Connector Architecture (JCA) to invoke CICS Transactions and assuming that a z/OS gateway server is desired:
 - CICS Transaction Gateway V5 (5724-A75).
 - CICS Transaction Gateway V6 (5655-M69).
- IBM SDK for z/OS Java 2 Technology Edition. IBM SDK for z/OS Java 2 Technology Edition, V1.4 (5655-I65) must be installed on the host to support compiling and execution of generated Java applications running under UNIX System Services.
- WebSphere Application Server. One of the following must be installed to support the execution of Web based programs utilizing generated Java or that require a Web Transaction Gateway:
 - WebSphere Application Server V5 (5655-I35).
 - WebSphere Application Server V6 (5655-N01).

Licensed Program Materials Availability

Restricted Materials: None.

This licensed program is available without source licensed program materials. The program is available in object code only.

Additional Information

Protection and Security

You must label Additional License Copies that are recorded on portable media, copies made from them, and their documentation with the Program number, the words “Copyright International Business Machines Corporation,” and the copyright year shown on the Program or documentation. The label of an Additional License Copy, or copy made from it, must also include the words:

Licensed Material — Property of IBM. IBM retains title to this copy and to any copy made from it. You may not transfer the possession of this copy to any third party.

You must include on the documentation the words:

Reprinted by permission of IBM.

Supplemental Terms

Licensing

This program is licensed under the conditions of the IBM Customer Agreement.

Testing period

- Basic License: None.
- DSLO License: Not applicable.

Satisfaction Guarantee

IBM provides a two month unconditional guarantee for any reason for basic licenses. IBM will credit the price paid. The guarantee period starts 1) 10 days after IBM ships the program or 2) on the day IBM authorizes the customer to make an Additional License copy.

Installation/Location License

- Not applicable. A separate license is required for each designated machine on which the licensed program materials will be used.

Usage License

- Not applicable.

Type/Duration of Program Services

IBM will provide Central Service, including the IBM Support Center, only through the customer location designated for the basic license until discontinued by IBM upon six months written notice.

Government Restricted Rights Notice

Restricted Rights apply to software covered by this Licensed Program Specifications document. Use, duplication, and disclosure are subject to restrictions set forth in the GSA ADP Schedule contract with IBM Corporation.

Softcopy Information

The following general terms and conditions apply to customer use and reproduction of softcopy information.

Readable and source versions of Rational COBOL Runtime publications are provided only:

- For authorized use with the Rational COBOL Runtime program by the customer on the basic license designated machine.
- For reproduction and use on:
 - Other processors on which the program is licensed for use by the customer.
 - One other designated processor in support of the program; for example, for printing hard copy or for preparing authorized derivative works.

Each such reproduction must include the IBM copyright notice from the original IBM work.

- To make sufficient hard copies from readable and source versions of such Rational COBOL Runtime softcopy publications distributed by IBM or from authorized derivative works of such publications to support authorized use of the licensed program by the customer. Each copy must include the IBM copyright notice from the original IBM work.

Resale or distribution of copies or derivative works of the readable and source versions of the information outside the customer's internal enterprise is prohibited.

- Source files are available from IBM upon request.

Warranty

IBM Rational COBOL Runtime for zSeries will conform, when shipped to the Customer, to its Licensed Program Specifications which are in effect at that time, provided it is properly used in the Specified Operating Environment.

If the Customer believes there is a defect in the program such that it does not meet its Licensed Program Specifications, the Customer must notify IBM while Program Services are available for the program. IBM does not warrant that the functions contained in the program will meet the customer's requirements or will operate in the combinations which may be selected for use by the Customer, or that the operation of the program will be uninterrupted or error free or that all program defects will be corrected.

THE FOREGOING WARRANTIES ARE IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

After discontinuing all program services, the program will be distributed on an "AS IS" basis without warranty of any kind either express or implied.

Licensed Program Specifications may be updated from time to time, and such updates may constitute a change in specifications.

References in this publication to IBM products, programs, or services do not imply that IBM intends to make these available in all countries in which IBM operates. Any reference to an IBM product, program, or service is not intended to state or imply that only IBM's product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any of IBM's intellectual property rights may be used instead of the IBM product, program, or service.

Any other documentation with respect to this licensed program, including any documentation referenced herein, is provided for reference purposes only and does not extend or modify these specifications. Printed in USA
