

Quick Start Guide

This guide gets you started with a typical installation for IBM Tivoli Continuous Data Protection for Files.

Translated version: To obtain the Quick Start Guide in other languages, access the PDF files on the quick start DVD.

Product overview

IBM® Tivoli® Continuous Data Protection for Files is a data protection solution targeted at user workstations, notebooks, and file servers on the Microsoft® Windows® platform. This product offers transparent, real-time replication, and traditional backup services, and can operate independently of Tivoli Storage Manager. Files can be replicated to both the local disk and a remote target. In situations where network connectivity is temporarily unavailable, files are queued up and replication is resumed when the remote target is available, thus providing continuous data protection.

1 Step 1: Access your software

If you download the product from IBM Passport Advantage®, follow the directions in the download document:
<http://www.ibm.com/support/docview.wss?uid=swg24031940>

This product offering includes the following items:

- IBM Tivoli Continuous Data Protection for Files Version 6.3 Quick Start DVD
- IBM Tivoli Continuous Data Protection for Files Version 6.3 DVD (product code)

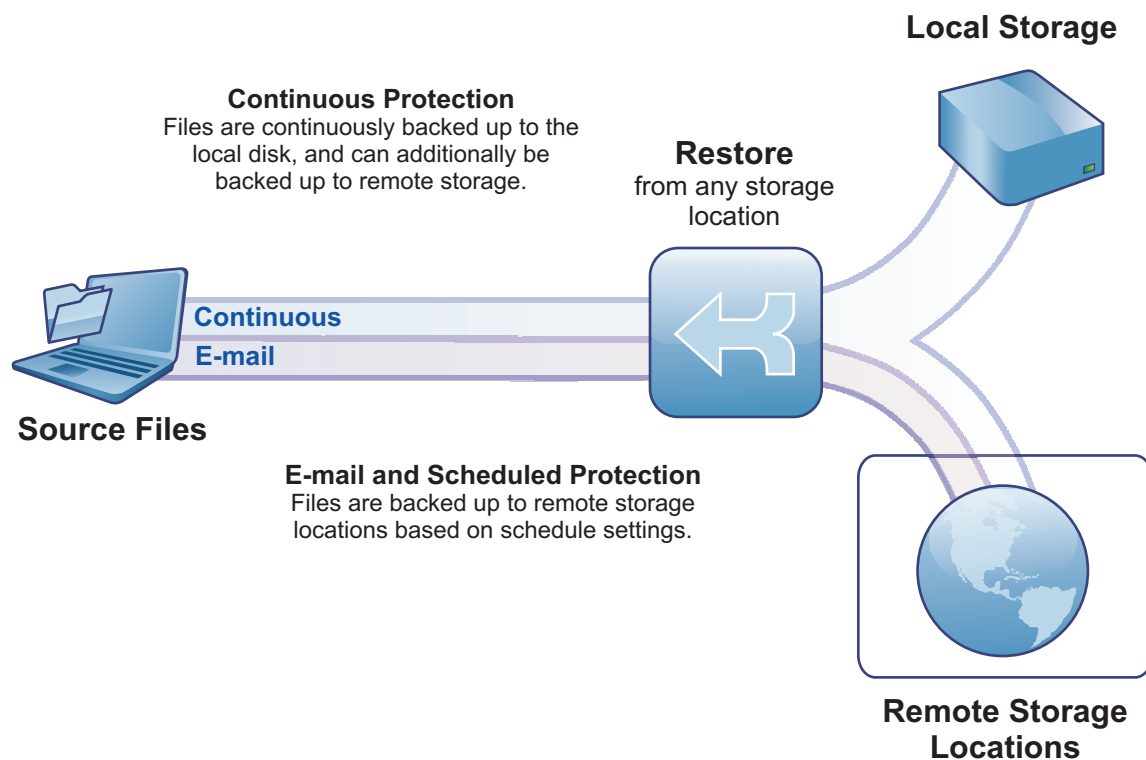

2 Step 2: Evaluate the hardware and system configuration

For information about system requirements, see the following document:
<http://www.ibm.com/support/docview.wss?uid=swg21569819>

3 Step 3: Review the base architecture

This diagram illustrates the IBM Tivoli Continuous Data Protection for Files Version 6.3 environment.

4 Step 4: Install Tivoli Continuous Data Protection for Files

Insert the *IBM Tivoli Continuous Data Protection for Files* DVD in the DVD drive, double-click the client installer icon, and follow the installation instructions. Detailed installation instructions are available in the Tivoli Continuous Data Protection for Files information center at <http://publib.boulder.ibm.com/infocenter/tivihelp/v12r1/index.jsp>.

5 Step 5: Configure Tivoli Continuous Data Protection for Files

After you install the product, a wizard guides you to configure the product to meet your requirements. The configuration wizard starts automatically after installing the product.
