At a glance

IBM SmartCloud® Application Services Version 1.1 is IBM's platform-as-a-service offering for the public cloud. It delivers a collaborative, cloud-based environment that supports the full lifecycle of accelerated application development, deployment, and delivery. IBM SmartCloud Application Services provides an enterprise-class infrastructure, enhanced security, and pay-as-you-go services. Clients can use IBM SmartCloud Application Services to sense and quickly respond to market demands, capture new markets, and reduce application delivery and management costs.

Overview

IBM SmartCloud Application Services Version 1.0, announced in Services Announcement [ZS12-0114](#), dated December 18, 2012, has been updated to Version 1.1.

IBM SmartCloud Application Services Version 1.1 expands the offering's application pattern catalog and improves the structure of the catalog to make it easier to add additional capabilities off the release cycle.

For details, refer to the [Description](#) section.

Key prerequisites

IBM SmartCloud Enterprise (6948-96H)

Planned availability date

June 28, 2013

Description

Improved patterns

A messaging extension has been added for the IBM® Web Application Pattern. This will allow you to support web apps that have messaging requirements.

Improved data management for production databases

The database patterns have been enhanced with:

- Database snapshot/cloning

- Database image copy

Version 1.1 also improves your ability to build images and use those images on private and public clouds. IBM Image Construction and Composition Tool (ICCT) is now integrated with the IBM SmartCloud Application Workload Service. ICCT allows users to create custom virtual images and deploy those images with SmartCloud Application Services, the PureApplication™ System, or IBM Workload Deployer. This new functionality enhances the interoperability between IBM's public and private clouds and gives clients additional choice and flexibility in virtual image deployment.

Version 1.1 also includes SmartCloud Application Workload Service Lifeboat Monitoring, which allows for more resilient services for our Workload Service in support of resilient production workloads.

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) containing details on accessibility compliance can be requested at
