## At a glance

IBM® SPSS® Statistics V21.0 focuses on increasing the analytic capabilities through:

- Building better models from uncertain inputs while assessing risk using Monte Carlo simulation techniques
- Providing faster performance with more accurate results, increased productivity and effectiveness using a range of specialized techniques
- Integrating with other technologies and tools making it easy to access common data types, external programming languages, and file types

## Overview

IBM SPSS Statistics is a leading statistical software product used to solve business and research problems by means of ad-hoc analysis, hypothesis testing, geospatial analysis and predictive analytics. Organizations use IBM SPSS Statistics to help:

- Quickly understand large and complex datasets using advanced statistical procedures that can provide high accuracy to drive quality decision making
- Reveal deeper insights and provide better confidence intervals via visualizations and geographic spatial analysis
- Process and deploy analytics faster with flexible deployment options
- Build a predictive enterprise making the business more agile and maximizing return on investment

## Key prerequisites

For details, refer to the [Technical information](#) section.

## Planned availability date

August 14, 2012: Electronic availability

August 21, 2012: Media availability

---

## Description

---

Analytics plays an increasingly important role in helping an organization achieve its objectives. The IBM SPSS Statistics family delivers the core capabilities needed for end-to-end analytics. To ensure that the most advanced techniques are available to a broader group of analysts and business users, you get enhancements to the features and capabilities of IBM SPSS Statistics Base and its many specialized modules.

The new simulation modeling feature within IBM SPSS Statistics Base uses Monte Carlo simulation techniques and is designed to account for uncertainty in inputs for predictive models. In this approach, uncertain inputs are modeled with probability distributions (such as the triangular distribution), and simulated values for those inputs are generated by drawing from those distributions. The simulated values are then used in the predictive model to generate an outcome. The process is repeated many times (typically, thousands or tens of thousands of times), resulting in a distribution of outcomes. The distribution of outcomes can then be used to answer questions of a probabilistic nature.

Monte Carlo simulation techniques can be used to help in analysis across many sectors:

- Manufacturing - Evaluate how the cost of materials affects profit.
- Advertising and marketing - Simulate various advertising budget amounts to see the effect on total sales.
- Energy and utilities - See how temperature impacts energy usage.
- Finance - Understand uncertainties associated with investment planning.

IBM SPSS Statistics V21.0 now has a data file comparison tool, which gives you the ability to compare two datasets or two data files to identify any discrepancies between them. There are two levels of comparison. The first is a comparison of the document metadata and the second is a case-by-case comparison of selected variable values.

With SPSS Statistics, you can now use a Java™ plug-in to call SPSS Statistics functionality from a Java application and have SPSS Statistics output appear in the Java application. You can also use Java with SPSS Statistics to control, react to, and embed program logic into your jobs and extend the functionality of SPSS Statistics.

Integrating with other IBM products is always a goal and SPSS Statistics now provides the ability to easily import IBM Cognos® Business Intelligence data. You can read custom data with or without filters, and import predefined reports from IBM Cognos into SPSS Statistics. You can import IBM Cognos data with Cognos calculations or use aggregated data from IBM Cognos .

IBM SPSS Amos for Structural Equation Modeling now includes an alternative nongraphical method for specifying a model where nonprogrammers can easily specify a model without drawing a path diagram by entering the model into a spreadsheet like table that can be modified.

IBM SPSS Statistics V21.0 helps deliver increased security by introducing password protection of data and output files (encrypting) to prevent others from seeing confidential information. SPSS Statistics also helps deliver increased productivity and efficiency with improvements to pivot tables by adding various new features for sorting operations, easier navigation, search operations, and many more.

Productivity enhancements are also the goal of this release, with improvements to IBM SPSS Statistics Server technology. IBM SPSS Statistics Server makes working with large data faster and more scalable and improves overall stability. IBM SPSS Statistics Server now has better scalability and performance through load balancing with IBM SPSS Collaboration and Deployment Services where client connections will be distributed among SPSS Statistics servers based on the server load. Also,

for security restricted environments, you can run as a nonroot user on UNIX™ and Linux™ . IBM SPSS Statistics Server now offers easier administration by allowing the client and server to be on different release levels.

Additional productivity and performance enhancements include:

- Improved and faster file merging.
- Improved usability with one click descriptive information from the Data Editor.
- Improved storage by compressing the data file.
- Pivot table output for Generalized Linear Mixed Models (GLMM)

### **Capabilities**

Build better models even when you do not have the right data or want to explore different (what-if) scenarios by creating simulated datasets based on existing data and known parameters using Monte Carlo simulation techniques.

- Build better models even when you do not have the right data or want to explore different (what-if) scenarios by creating simulated datasets based on existing data and known parameters using Monte Carlo simulation techniques.

Providing faster performance that can help lead to more accurate results, increased productivity and effectiveness using a range of specialized techniques:

- Better scalability and performance with load balancing in IBM SPSS Collaboration and Deployment Services where client connections are distributed amongst SPSS Statistics servers based on the server load.
- Single sign-on between the SPSS Statistics client and server to support production jobs submitted to the server.
- For security restricted environments, there is the option to run the SPSS Statistics server as a nonroot user.
- Improved storage space by compressing the data files.
- To simplify enterprise upgrades, backward and forward version compatibility of clients with servers.

For example, the SPSS Statistics V21.0 client is compatible with the SPSS Statistics server V20.0 and the SPSS Statistics V20.0 client is compatible with the SPSS Statistics V21.0 server.

- Compare two data files or data sets to ensure the data values and records are compatible.
- Security improvements via password protection of data and output files (encryption) to help prevent others from seeing confidential information.
- Improved and faster file merging.
- Improved pivot tables with various newly added features such as easier navigation and sorting operations.
- Easier model specification in IBM SPSS Statistics Amos V21.0, which provides a way for nonprogrammers to specify a model (entering the model into a spreadsheet like table that can be modified) without drawing a path diagram.

Integrating with other technologies and tools making it easy to access common data types, external programming languages, and file types:

- Use a Java plug-in to call SPSS Statistics functionality from a Java application and have SPSS Statistics output appear in the Java application. You can also use Java with SPSS Statistics to control, react to, and embed program logic into your jobs and extend the functionality of SPSS Statistics.
- Import IBM Cognos Business Intelligence data into SPSS Statistics for additional analysis.

## Accessibility by people with disabilities

---

A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via the IBM website

[http://www.ibm.com/able/product\\_accessibility/index.html](http://www.ibm.com/able/product_accessibility/index.html)

## Section 508 of the US Rehabilitation Act

---

A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via the IBM website

## Technical information

---

### **Specified operating environment**

---

#### **Hardware requirements**

Hardware and software requirements for IBM SPSS Statistics can be found at

<http://publib.boulder.ibm.com/infocenter/prodguid/v1r0/clarity/prereqsForProduct.html>

#### **Software requirements**

Software and hardware requirements for IBM SPSS Statistics can be found at

<http://publib.boulder.ibm.com/infocenter/prodguid/v1r0/clarity/prereqsForProduct.html>

#### Software environment statement

IBM SPSS product strategy includes leveraging industry-standard platforms such as operating systems, databases, and application servers. In order to provide the best service possible, IBM certifies each of our products to run on specific versions of these platforms. For complete details concerning supported software environments for IBM SPSS Statistics visit

<http://publib.boulder.ibm.com/infocenter/prodguid/v1r0/clarity/prereqsForProduct.html>

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

#### **Planning information**

---

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express®. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

#### **Security, auditability, and control**

---

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

---

#### **Ordering information**

---

This product is only available via Passport Advantage. It is not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software Value Plus.

For more information about IBM Software Value Plus, visit

<http://www-01.ibm.com/software/info/itsolutions/softwarevalueplus/>

To locate IBM Business Partners for Software Value Plus in your geography for a specific Software Value Plus portfolio, contact your IBM representative.

## Charge metrics definitions

### Authorized User

Authorized User is a unit of measure by which the program can be licensed. An Authorized User is a unique person who is given access to the program. The program may be installed on any number of computers or servers and each Authorized User may have simultaneous access to any number of instances of the program at one time. Licensee must obtain separate, dedicated entitlements for each Authorized User accessing the program in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means. An entitlement for an Authorized User is unique to that Authorized User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person.

NOTE: Some programs may be licensed where devices are considered users. In that case, the following applies. Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate user of the program and requires an entitlement as if that device were a person.

### Concurrent User

Concurrent User is the unit of measure by which this program is licensed. A Concurrent User is a shared user access to the program within or outside of your enterprise. The program may be installed only on one computer or one server. The total number of Concurrent Users simultaneously accessing the program at any moment in time may not exceed the highest number of Concurrent Users authorized by the Proof of Entitlement (PoE). You must have an entitlement for each Concurrent User simultaneously accessing the program or any program component in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means.

Note: Some programs may be licensed where devices are considered users. In that case, the following applies. Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the

program or that is otherwise managed by the program is considered a separate user of the program and requires an entitlement as if that device were a person.

### Processor Value Unit (PVU)

PVU is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU Table by processor value, brand, type, and model number at

[http://www.ibm.com/software/lotus/passportadvantage/pvu\\_licensing\\_for\\_customers.html](http://www.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html)

and the number of processors made available to the program. IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores.

Licensee can deploy the program using either full capacity licensing or virtualization capacity (sub-capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (refer to the webpage below). If using full capacity licensing, licensee must obtain PVU entitlements sufficient to cover all activated processor cores\* in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using virtualization capacity licensing, licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at

[http://www.ibm.com/software/lotus/passportadvantage/Counting\\_Software\\_licenses\\_using\\_specific\\_virtualization\\_technologies.html](http://www.ibm.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html)

\* An activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Notes:

- Some programs may require licenses for the program **and** what is being managed. In that case, the following applies. In addition to the entitlements required for the program directly, licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- Some programs may be licensed on a managed basis **only**. In that case, the following applies: Instead of the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies. Rather than obtaining entitlements for the activated processor cores available to the program, licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the referenced program as if the program itself were executing everywhere the referenced program was executing, independent of the basis on which the referenced program is licensed.

## **Cross-platform products**

---

### ***Cross-platform products for use on System z***

Order the part numbers that follow when the product is used for either the development of code that will be deployed on System z® servers or when the product will be communicating or transferring data between a distributed server and a System z server. Otherwise order from the other set of part numbers in

this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

***Cross-platform product for use on System z IFL engines***

Order the part numbers that follow when the product is intended to run on the Linux operating system on System z IFL engines. If the product is not intended to run on the Linux operating system on System z IFL engines, order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

## Terms and conditions

---

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

### **Licensing**

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

### **License Information form numbers**

Program name	Program number	Form number
IBM SPSS Amos	5725-A60	L-AMIR-8HCRRJ
IBM SPSS Statistics Desktop	5725-A54	L-GLBC-8TNV95
IBM SPSS Statistics Developer	5725-A58	L-AMIR-8HCRYC
IBM SPSS Statistics Server	5725-A56	L-GLBC-8TMKVG

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

### **Limited warranty applies**

Yes

### **Limited warranty**

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

### **Program technical support**

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software

Maintenance is in effect. This technical support allows you to obtain assistance from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

### ***Money-back guarantee***

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

### ***Volume orders (IVO)***

No

### ***Passport Advantage applies***

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

### ***Usage restriction***

Yes

For additional information, refer to the License Information Document that is available on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

### ***International Passport Agreement***

#### ***Software Subscription and Support applies***

Yes. Software Subscription and Support is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

### **Other terms**

#### **System i Software Maintenance applies**

No

#### **Educational allowance available**

Not applicable.

#### **Statement of good security practices**

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

---

## **IBM Electronic Services**

---

IBM Electronic Support offers tools and resources, for software and hardware, to help save time and simplify support. The Electronic Support portfolio is accessible through the IBM Support Portal to help you find answers to questions, download fixes, troubleshoot, automate data collection, submit and track problems online, and build skills. All these tools are made available through your IBM support agreement, at no additional charge.

Read about the Electronic Support portfolio of tools:

<http://ibm.com/electronicssupport>

Access the IBM Support Portal:

<http://ibm.com/support>

---

## **Prices**

---

### **Passport Advantage**

For Passport Advantage information and charges, contact your IBM representative or authorized IBM Business Partner, or authorized IBM Business Partner for Software Value Plus, if applicable. Additional information is also available at

<http://www.ibm.com/software/passportadvantage>

## **Business Partner information**

If you are an IBM Business Partner -- Distributor for Workstation Software acquiring products from IBM , you may link to Passport Advantage Online for resellers where you can obtain Business Partner pricing information. An IBM ID and password are required.

<https://www.ibm.com/software/howtobuy/passportadvantage/paoreseller>

## **Trademarks**

IBM, SPSS, Cognos, Passport Advantage, Express and System z are registered trademarks of IBM Corporation in the United States, other countries, or both.

UNIX is a registered trademark of The Open Group in the United States and other countries.

Linux is a registered trademark of Linus Torvalds in the United States, other countries, or both.

Microsoft and Windows are trademarks of Microsoft Corporation in the United States, other countries, or both.

Other company, product, and service names may be trademarks or service marks of others.

## **Terms of use**

IBM products and services which are announced and available in your country can be ordered under the applicable standard agreements, terms, conditions, and prices in effect at the time. IBM reserves the right to modify or withdraw this announcement at any time without notice. This announcement is provided for your information only. Additional terms of use are located at

<http://www.ibm.com/legal/us/en/>

For the most current information regarding IBM products, consult your IBM representative or reseller, or visit the IBM worldwide contacts page

<http://www.ibm.com/planetwide/us/>
