IBM® Sterling B2B Integrator V5.2.3, IBM Sterling File Gateway V2.2.3, and IBM WebSphere® Transformation Extender V8.4.0 deliver better links between internal business processes and external business partners and standards to address your B2B needs more rapidly.

- Integration of IBM WebSphere MQ File Transfer Edition, IBM Sterling File Gateway, and IBM Sterling B2B Integrator (B2Bi) allows you to more easily extend your internal messaging infrastructures to reach external customers and partners.
- Integration of IBM WebSphere Transformation Extender (WTX) and IBM B2Bi allows you to reuse existing transformation maps in a B2B context.
- IBM WTX with Launcher Hypervisor Edition allows you to deploy universal transformation capabilities in a private cloud.
- IBM WTX industry packs' updates ensure support for the latest versions of critical B2B standards.

Overview

Updates to IBM Sterling B2B Integrator V5.2.3, IBM Sterling File Gateway V2.2.3, and IBM WebSphere Transformation Extender V8.4.0 deliver high value and integrated offerings.

IBM Sterling B2B Integrator

Sterling B2B Integrator V5.2.3 enables the secure integration of complex B2B processes with diverse partner communities. As organizations are increasingly faced with ever more complex B2B integration challenges across ever more diverse partner communities, Sterling B2B Integrator provides a single, flexible B2B gateway that enables companies to solve all of their B2B integration needs.

New in V5.2.3

Sterling B2B Integrator lets you leverage IBM WebSphere Transformation Extender (WTX) maps in the context of B2B processes. You can reuse transformation maps developed for internal integration in new ways to address B2B needs.

- Key components including the map repository, pre-defined translation services, and business processes are updated to allow seamless integration of WTX maps.
- You can make use of the industry packs that are unique to WTX.

IBM Sterling File Gateway

IBM Sterling File Gateway V2.2.3 consolidates disparate centers of file transfer activity, and facilitates the exchange of file-based information securely, in any format, protocol, and file size. With its advanced onboarding features, extensive communication-channel support, and improved business process management, Sterling File Gateway is designed to improve operational execution and time to revenue through a centralized and secure B2B-enabled managed file gateway. Sterling File Gateway offers:

- A single, secure solution for file transfer - Handles large files and high messaging volumes in any format, any protocol, and any number of external connections
- Enhanced security and risk management - Offers secure protocols, encryption methods, certificate types, digital signatures, and identity management tools to ensure data integrity
- Visibility for better management - Leads to better decision making, faster response, and more satisfied customers and business partners

New in V2.2.3

With seamless integration between WebSphere MQ File Transfer Edition and Sterling File Gateway, you can process inbound B2B file transfers and push files or messages out to the trading partner community.

IBM WebSphere Transformation Extender (WTX)

WTX V8.4, a universal transformation solution, provides you with a transaction oriented solution that is designed to automate the complex transformation and validation of data without the need for hand coding. WTX enables organizations to deploy and manage new business services quickly, facilitates the reuse of information, and can improve the quality and speed of information flow throughout the enterprise. WTX can:

- Process large volumes of data efficiently with one pass lookup, validation, and transformation connections
- Easily manage and adopt to changing industry standards with easy-to-install industry-pack updates
- Enhance enterprise service bus capability and business process management solutions including WebSphere Message Broker and WebSphere Process Server

NEW IN WTX V8.4

WTX lets you leverage the gateway capabilities of Sterling B2B Integrator. Maps created in WTX can be reused in new ways to address B2B needs. WTX maps can be stored in the Sterling B2B Integrator library and can be called directly within business processes.

WTX with Launcher Hypervisor Edition enables deployment of WTX in private cloud implementations.

Description

IBM Sterling B2B Integrator V5.2.3

As organizations are increasingly faced with ever more complex B2B integration challenges across ever more diverse partner communities, Sterling B2B Integrator provides a single, flexible B2B gateway that enables you to solve all of your B2B integration needs.

- Provides visibility into and across your supply and demand chains
- Integrates your B2B communications between your systems and diverse partner communities
- Streamlines business processes across your enterprise boundaries
- Connects to your business partners, despite differences in size, geography, or choice of technology

Sterling B2B Integrator encompasses six key areas of B2B functionality:

- Communications and security
- Integration and transformation
- Business process management
- Community management
- Visibility
- Application extension and customization

Additional information about IBM Sterling B2B Integrator can be found at

<http://www.sterlingcommerce.com/products/managed-file-transfer/sterling-file-gateway/>

IBM Sterling File Gateway V2.2.3

Sterling File Gateway allows organizations to take complete control over Internet-based file transfers with trading partners by consolidating disparate centers of file transfer activity and accommodating the technical requirements of a diverse trading partner community.

- Enables centralized management of file transfer activity with trading partners
- Facilitates the secure exchange of Internet-based file transfers in any format, protocol, and size
- Integrates and automates file transfer activity between trading partners and internal systems
- Provides visibility over file transfer activity with trading partners
- Enables trading partner self-service

Sterling File Gateway encompasses six key areas of B2B file transfer functionality:

- On-boarding trading partner file transfer activity
- Communications and security protocols and data encryption
- Transformation and routing of inbound files
- Business process management to automate file processing
- Visibility over file transfer activity

- Self-service portal for trading partners

Additional information about IBM Sterling File Gateway can be found at

<http://www.sterlingcommerce.com/products/b2b-integration/sterling-integrator/>

IBM WebSphere Transformation Extender (WTX) V8.4

WTX, a universal transformation solution, provides a transaction oriented solution that can automate the complex transformation and validation data without the need for hand coding. WTX can enable organizations to deploy new business services quicker, facilitates the reuse of information, and improves the quality and speed of information flow throughout the enterprise. WTX editions allow you to invoke transformation through:

- Published APIs
- Pre-defined integration with IBM solutions
- Command line
- An event-based Launcher
- Launcher Hypervisor edition that supports use in private cloud configurations

Additional information about IBM WebSphere Transformation Extender can be found at

<http://www.ibm.com/software/integration/wdatastagetx/index.html>

WebSphere Transformation Extender industry packs provide ready-to-use capabilities to integrate a range of industry-standard data formats with your enterprise infrastructure. Industry packs can enable developers to accelerate the delivery of transformation solutions by providing predefined type tree templates, conversion maps, and in selected packs, validation maps, and tools to remove risk from projects that require conformance to mandatory and advisory guidelines required by the regulatory body or industry service provider. Industry packs are available for:

- EDI including X12, EDIFACT, and TRADACOMS
- Healthcare including X12 HIPAA, NCPDP, and HL7
- Financial services including SWIFT, ACH, FIX, and SEPA
- Insurance ACORD
- Applications including SAP

WTX industry packs, used in conjunction with WTX, a universal data transformation engine, provide organizations with an infrastructure that can:

- Control administrative costs
- Streamline business processes
- Facilitate accuracy and timeliness of information
- Reuse existing business systems
- Adapt to new technologies as they emerge
- Integrate multiple systems and standards
- Automate cross-organizational exchanges

Additional information about IBM WebSphere Transformation Extender industry packs can be found at

<http://www.ibm.com/software/integration/wdatastagetx/packs.html>

Summary of new technical features in IBM WebSphere Transformation Extender V8.4 base editions and tooling

General

- 64-bit Windows™ support for runtime components
- Operating system currency including support for Windows 7 (and XP Mode), Windows 2008 R2, Linux™ RHEL V6
- Environment currency including support for Eclipse 3.6
- Serviceability enhancements
- Removal of the following obsolete support:
 - 32-bit versions of WTX on AIX®, Solaris, and HP-UX
 - Base64 Adapter (replaced with the Base64 function)
 - Quoted-Printable Adapter (replaced with Quoted functions)
 - FS Manager Adapter
 - VAN Adapter
 - BEA WebLogic Control Adapter
 - BEA Tuxedo Adapter
 - BEA Tuxedo Server (and the CORBA Adapter which was used for connecting)

Connectivity

- WebSphere Adapters currency including WebSphere Adapters V7.5 Email and FTP adapters.
- Messaging currency including support for IBM WebSphere MQ V7.1.
- Database currency including support for IBM DB2® V10.1, IBM Informix® Dynamic Server V11.7, Oracle Enterprise 11gR2, Sybase SQL Server 15.x, Microsoft™ SQL Server 2008 R2.

WTX Launcher enhancements

- Allow you to select which system to monitor
- Let you add or remove systems from the administration console without stopping the entire event server
- Give you enhanced command line interface

WTX with Launcher Hypervisor Edition

New to V8.4, this interface allows WTX to be deployed directly by the IBM Workload Deployer Appliance (formerly WebSphere Cloudburst Appliance). This integration helps simplify the use of WTX within virtualized and private cloud architectures. This integration allows you to make use of your existing WTX maps in a private cloud environment, and can enhance the value that WTX provides as a universal transformation solution.

WTX for Integration Servers

New to V8.4, WTX for Integration Servers lets you use maps in Sterling B2B Integrator process flows. The Extender for Sterling B2B Integrator provides seamless interoperability between WTX and key components of Sterling B2B Integrator, including the map repository, pre-defined translation services, and the monitoring, management, alerting, and logging subsystems. This integration allows you to make use of your existing WTX maps in a B2B context defined by Sterling B2B Integrator, and enhances the value that WTX provides as a universal transformation solution.

WTX for Integration Servers can also wire the output of a PUT statement with WebSphere Enterprise Service Bus.

This release also includes currency enhancements, including support for integrating with IBM WebSphere Message Broker V8.0, IBM WebSphere Enterprise Service Bus V7.5, IBM WebSphere Process Server V7.5, and IBM Integration Designer V7.5.

Additional information about IBM WebSphere Transformation Extender with Launcher Hypervisor Edition can be found at

<http://www.ibm.com/software/integration/wdatastagetx/index.html>

WTX EDI Pack

This industry pack addresses the formatting requirements for EDI compliance, which includes WTX Packs for ASC X12, EDIFACT, and TRADACOMS. The EDI pack includes the updates provided by the Extender Packs for X12 and EDIFACT.

WTX Pack for X12

This industry pack supports ANSI X12 version 6030, as described by the Data InterChange Standards Association (DISA).

WTX Pack for EDIFACT

This industry pack now supports EDIFACT versions d10a and d10b.

WTX Healthcare Pack

This industry pack includes the updates provided by the Extender Packs for HIPAA, HL7, and NCPDP.

WTX Pack for HIPAA

This industry pack now supports the ANSI X12 5010 addenda and errata updates for 2011.

WTX Pack for HL7

This industry pack now supports HL7 version 2.7.

WTX Pack for NCPDP

This industry pack now supports Medicaid Subrogation.

Section 508 of the US Rehabilitation Act

IBM Sterling B2B Integrator, IBM Sterling File Gateway, and IBM WebSphere Transformation Extender with Launcher Hypervisor Edition is capable as of December 16, 2011, when used in accordance with IBM's associated documentation, of satisfying the applicable requirements of Section 508 of the Rehabilitation Act, provided that any assistive technology used with the product properly interoperates with it. A U.S. Section 508 Voluntary Product Accessibility Template (VPAT), containing details on the products accessibility compliance, can be requested on the following Web site

http://www.ibm.com/able/product_accessibility/index.html

Product positioning

Sterling B2B Integrator

Sterling B2B Integrator is a B2B gateway solution, part of IBM B2B Integration solutions.

Sterling File Gateway V2.2.3

Sterling File Gateway is part of IBM Managed File Transfer solutions.

WTX

WTX, a universal transformation solution, provides a transaction oriented solution that can automate the complex transformation and validation data without the need for hand coding.

WTX Pack for X12

ASC X12 was developed by the U.S. national standards body for the development and maintenance of Electronic Data Interchange (EDI) standards. The WebSphere TX Pack for X12 V2.8 adds support for ANSI X12 6030.

WTX Pack for EDIFACT

The United Nations/Electronic Data Interchange for Administration, Commerce, and Transport (UN/EDIFACT) standard is a EDI standard developed under the United Nations and provides a set of syntax rules to structure data, an interactive exchange protocol (I-EDI) and standard messages, which allow multi-country and multi-industry information exchange. The WebSphere TX Pack for EDIFACT V2.8 adds support for d.10a and d.10b standards.

WTX Pack for TRADACOMS

The Trading Data Communications Standard (TRADACOMS) was developed by the Article Number Association (ANA) designed for use in the UK, and covers a similar range to the UN/EDIFACT standard. WTX Pack for TRADACOMS V2.8 include support for TRADACOMS message types, versions 1 to 9.

WTX Pack for HIPAA

The Health Insurance Portability and Accountability Act (HIPAA) addresses the administrative simplification aspects of HIPAA legislation - the standardization of electronic patient health, administrative, and financial data. The WebSphere TX Pack for HIPAA provides ready-to-execute template definitions for the complete ASC X12N HIPAA standard as well as 4010 and 5010 flat file formats for Professional and Institutional Claims and Coordination of Benefits.

WTX Pack for NCPDP

The National Council for Prescription Drug Programs (NCPDP) is a HIPAA-designated standards maintenance organization for finalized HIPAA transactions. NCPDP standards are used in the retail pharmacy sector. WTX Pack for NCPDP V4.4 includes support for D.0 transaction set and includes template definitions for SCRIPTS V10.6 transaction set and all of the finalized HIPAA NCPDP Telecommunications V5.1 transaction sets and Batch V1.1 format.

WTX Pack for HL7

Health Level Seven is an ANSI-accredited standards organization operating in the healthcare arena. HL7's domain is clinical data. HL7 produces standards for the exchange, management, and integration of data, intended to promote interoperability between healthcare information systems. WTX Pack for HL7 includes HL7 versions 2.1, 2.2, 2.3, 2.4, 2.5, 2.6 and 2.7 which provide health care and insurance payer organizations with an infrastructure that enables compliance with government and industry mandates.

Education support

The IBM B2B Commerce Education team delivers a comprehensive portfolio of education services to help you deploy service-oriented architecture (SOA) and to integrate B2B Commerce products to achieve the maximum benefit.

Training is available for:

- IBM Sterling B2B Integrator
- IBM Sterling File Gateway
- IBM WebSphere Transformation Extender

Course descriptions for WebSphere Transformation Extender can be found at

<http://www.ibm.com/software/websphere/education/curriculum/appint/wte/>

Education is a key component to ensuring software success. The IBM curriculum provides a unique training value built on exclusive product knowledge direct from IBM developers cemented with expert instructors and flexible time and cost-saving training options. The IBM B2B Commerce Education team works closely with product developers and services organizations to ensure that the courses

offerings provide the most up-to-the-minute technical and product information. Our courses place an emphasis on the advanced knowledge and insight that only these sources can provide. IBM draws from an extensive pool of technical experience in the development of our courses, and passes that knowledge on to our students.

IBM B2B Commerce Education provides training that spans the spectrum of needed skills from introductory product overviews to advanced offerings. Hands-on labs let you work with fully functional versions of the software to round out your training experience. Several training options are available, including instructor-led classroom offerings, customized courses, and virtual (online) training that lets you train from your office.

IBM training provides education to support many IBM offerings. Descriptions of courses for IT professionals and managers are on the IBM training Web site

<http://www.ibm.com/services/learning/>

Call IBM training at 800-IBM-TEACH (426-8322) for catalogs, schedules, and enrollments.

Documentation and other program content may be supplied only in the English language.

Planning information

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express®. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

Security, auditability, and control

IBM WebSphere Transformation Extender uses the security and auditability features of the host software.

Security and auditability features of IBM Sterling B2B Integrator

- Edge security for B2B residing in the DMZ via included Perimeter Server
- Supports FTP, FTPS, HTTP, HTTPS, SSH/SFT, AS2, AS3, OFTP (V1 and V2), and IBM Sterling Connect:Direct® protocols
- Comprehensive authentication services
- Comprehensive statistics and logging capabilities to provide auditing of B2B activities

Security and auditability features of IBM Sterling File Gateway

- Edge security included for B2B and MFT transactions
- Supports secure communications via FTP, FTPS, HTTP, HTTPS, SSH/SFTP, AS2, AS3, EBICS and IBM Sterling Connect:Direct protocols
- Comprehensive authentication services, including single sign-on, LDAP, and local user authentication
- Multiple encryption standards (PGP, SSL/TLS, S/MIME)
- Encryption of data for both in-flight and at-rest files

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Charge metrics definitions

Authorized User

Authorized User is the unit of measure by which this program is licensed. An Authorized User is an individual (named or unnamed) within or outside of your enterprise. The program may be installed on one or more computers or servers

and accessed by the number of users authorized by the Proof of Entitlement (PoE). You must have an entitlement for each Authorized User accessing the program or any program component in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means.

Install

Install is a unit of measure by which the program can be licensed. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each install of the program.

Connection

Connection is a unit of measure by which the program can be licensed. A Connection is a link or association of a database, application, server, or any other type of device or endpoint to the program. Licensee must obtain entitlements for the total number of Connections which have been or are made to the program.

Processor Value Unit (PVU)

Processor Value Unit (PVU) is a unit of measure by which the Program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU Table by Processor Value, Brand, Type and Model Number at http://www.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html) and the number of processors made available to the Program. IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores

Licensee can deploy the Program using either Full Capacity licensing or Virtualization Capacity (Sub-Capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (see webpage below). If using Full Capacity licensing, Licensee must obtain PVU entitlements sufficient to cover all activated processor cores* in the physical hardware environment made available to or managed by the Program, except for those servers from which the Program has been permanently removed. If using Virtualization Capacity licensing, Licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the Program, as defined according to the Virtualization Capacity License Counting Rules at http://www.ibm.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html

* An Activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Note: Some programs may require licenses for the Program AND what is being managed. In that case, the following applies: In addition to the entitlements required for the Program directly, Licensee must obtain PVU entitlements for this Program sufficient to cover the processor cores managed by the Program.

Note: Some programs may be licensed on a managed basis ONLY. In that case, the following applies: Instead of the entitlements required for the Program directly, Licensee must obtain PVU entitlements for this Program sufficient to cover the processor cores managed by the Program.

Note: A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies: Rather than obtaining entitlements for the activated processor cores available to the Program, Licensee must obtain PVU entitlements for this Program sufficient to cover the environment made available to the Referenced Program as if the Program itself were executing everywhere the Referenced Program was executing, independent of the basis on which the Referenced Program is licensed.

Note: Express and Workgroup programs may be licensed with maximum use terms. In that case, the following applies: The maximum authorized use terms and conditions for PVU licensed IBM Express and Middleware Programs can be found in the IBM Express and Middleware Licensing Guide.

Passport Advantage program licenses

Cross-Platform Products

Cross-platform products for use on System z

Order the part numbers that follow when the product is used for either the development of code that will be deployed on System z servers or when the product will be communicating or transferring data between a distributed server and a System z server. Otherwise order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement

Cross-platform product for use on System z IFL engines

Order the part numbers that follow when the product is intended to run on the Linux operating system on System z IFL engines. If the product is not intended to run on the Linux operating system on System z IFL engines, order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

License Information form number(s)

Program name	Program number	Form number
IBM Sterling B2B Integrator	5725-D06	L-ASTR-8GTKB2
IBM Sterling File Gateway	5725-D07	L-ASTR-8GSSF6
IBM WebSphere Tran Extender Pack for Healthcare	5724-T77	L-LCLK-8KFQSG
WebSphere Transformation Extender	5724-Q23	L-TWOM-8KFQDA
WebSphere Transformation Extender Pack for EDI	5724-T78	L-LCLK-8KFQDK
WebSphere Transformation Extender w/Hypervisor	5725-E33	L-TWQM-8KFQRD

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

- For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Usage restriction

Yes

For additional information, refer to the License Information Document that is available on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Software Subscription and Support (Software Maintenance)

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support (also referred to as Software Maintenance) is in effect, IBM provides you assistance for your routine, short

duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support (also referred to as Software Maintenance) does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

System i Software Maintenance applies

No

Educational allowance available

Not applicable.

IBM Electronic Services

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a Web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.

Passport Advantage

For Passport Advantage information and charges, contact your IBM representative or authorized IBM Business Partner, or authorized IBM Business Partner for Software ValueNet®, if applicable. Additional information is also available at

<http://www.ibm.com/software/passportadvantage>

Business Partner information

If you are an IBM Business Partner -- Distributor for Workstation Software acquiring products from IBM, you may link to Passport Advantage Online for resellers where you can obtain Business Partner pricing information. An IBM ID and password are required.

<https://www.ibm.com/software/howtobuy/passportadvantage/paoreseller>

Trademarks

Electronic Service Agent is a trademark of IBM Corporation in the United States, other countries, or both.

IBM, WebSphere, AIX, DB2, Informix, Passport Advantage, Express, zSeries, System z and ValueNet are registered trademarks of IBM Corporation in the United States, other countries, or both.

Windows and Microsoft are trademarks of Microsoft Corporation in the United States, other countries, or both.

Linux is a registered trademark of Linus Torvalds in the United States, other countries, or both.

Other company, product, and service names may be trademarks or service marks of others.

Terms of use

IBM products and services which are announced and available in your country can be ordered under the applicable standard agreements, terms, conditions, and prices in effect at the time. IBM reserves the right to modify or withdraw this announcement at any time without notice. This announcement is provided for your information only. Additional terms of use are located at:

<http://www.ibm.com/legal/us/en/>
