At a glance

The IBM[®] Maximo[®] asset management portfolio expands its capabilities with new features and enhancements:

- IBM Maximo Linear Asset Manager V7.6.0 adds a new visual control to view and work with linear assets.
- IBM Maximo for Utilities V7.6.0 adds new capability for Compatible Unit (CU) Estimating that enables designers and work planners to change estimates as they happen in the field with 'In Progress' status updates on work orders.
- Additional IBM Maximo asset management offerings feature enhancements to:
 - IBM Maximo for Aviation V7.6.4
 - IBM Maximo Asset Configuration Manager V7.6.4
 - IBM Maximo Asset Management Scheduler V7.6.4
 - IBM Maximo Asset Management Scheduler Plus V7.6.4
 - IBM Maximo Oil and Gas V7.6.1
 - IBM Maximo Health, Safety and Environment Manager V7.6.1
 - IBM Maximo Anywhere V7.6.1
- IBM Maximo Concurrent License option is now offered for selected Maximo products.

Overview

Maximo Linear Asset Manager V7.6.0

Maximo Linear Asset Manager V7.6.0 enables clients to use linear referencing when designing and maintaining assets such as roads, pipelines, rail lines, and transmission lines.

Version 7.6.0 of Maximo Linear Asset Manager introduces this new linear visual control feature, providing an improved, user-friendly experience when managing your linear assets.

Maximo for Utilities V7.6.0

Maximo for Utilities V7.6.0 supports work and asset management for transmission and distribution, from managing compatible unit estimating to integration with fixed-asset accounting tools. Its Compatible Unit Estimating function improves the adherence to the design and construction business processes by enabling the project managers to re-estimate the designs made in parallel with the work execution.

Version 7.6.0 of Maximo for Utilities V7.6.0 brings new capabilities to Compatible Unit Estimating, enabling designers and work planners to change CU estimates as they happen in the field with 'In Progress' status updates on work orders.

Additional IBM Maximo asset management solutions

Maximo for Aviation V7.6.4 adds a number of new capabilities:

- Enhanced capability to manage workflow that is associated with Engineering Order (EO) assessments
- Mission-profile-based maintenance schedules that enable operators to adjust the aircraft maintenance schedule based on the actual and planned flight schedules
- New industry-specific reports including equipment status reports, OMP task detail report, work package content report, work order detail report, and technical publication status report

Maximo Asset Configuration Manager V7.6.4 adds a number of new capabilities required by Maximo for Aviation V7.6.4.

Maximo Asset Management Scheduler V7.6.4 updates include:

- The capability to export a schedule's columns and rows to Microsoft[™] Excel for further analysis, data manipulation, and reporting
- Enhanced tool tip in Graphical Scheduling that shows more pertinent details of resources required
- Preventative Maintenance forecast in Graphical Scheduling that shows selected start time, which is also used for work order generation

Maximo Asset Management Scheduler Plus V7.6.4 updates include:

- A Customer Appointment Booking application
- The capability to model complex work order networks
- Integration of Maximo work management with IBM The Weather Company^(R) weather data, including embedded configurable weather views

Maximo Oil and Gas V7.6.1 and IBM Maximo Health, Safety and Environment Manager V7.6.1 updates include:

- New applications for:
 - IBM Maximo Incident Reporter
 - Isolation Management
 - Operational Actions
 - Operator Log Book
 - Ticket Templates
- Enhancements to existing applications including Assets, Bypass Management, Certifications, Hazards, Incidents, Locations, Operator Log, Permit to Work, and Risk Assessment.

IBM Maximo Concurrent License option

Maximo Asset Management, Maximo Scheduler, Maximo Scheduler Plus, Maximo Asset Configuration Management, Maximo for Utilities, Maximo for Oil and Gas, Maximo Health, Safety and Environment Manager, and Maximo Anywhere now offer the Concurrent License option.

In addition to the current options of purchasing licenses for Authorized, Limited and Express^(R) named users, part numbers are available for purchasing concurrent users. Trade-up part numbers are also available for migrating currently owned licenses from named to concurrent. This is an available option for all versions of the product. License tracking capabilities are available in a feature pack of IBM Maximo V7.6 in order to provide a view of the actual usage of licenses deployed within an organization.

Users accessing the system who are entitled as a Maximo Concurrent Use User are counted as any user that is logged into the system at the same time. This allows a single license to be shared by multiple people, as long as the total number of users simultaneously logged in does not exceed the number of licenses. Maximo measures concurrent usage by counting the number of users that were logged into the system every minute (based on login and logout information in the login tracking table) and reports on the peak usage over a 24-hour time period. The default time out for a logged in user is after 30 minutes of inactivity and shall not be set to any time period less than 10 minutes on a Maximo system with one or more concurrent user licenses in use. For additional information about concurrent licensing, including accepted ratios visit the [Licensing Information and Usage Restrictions](#) website.

Key prerequisites

Refer to the [Hardware requirements](#) and [Software requirements](#) sections.

Planned availability date

- October 21, 2016: Electronic download
 - IBM Maximo Linear Asset Manager V7.6.0
 - IBM Maximo Asset Management Scheduler V7.6.4
- October 28, 2016: Electronic download
 - IBM Maximo Asset Configuration Manager V7.6.4
 - IBM Maximo for Aviation V7.6.4
 - IBM Maximo for Utilities V7.6
 - IBM Maximo Asset Management Scheduler Plus V7.6.4
 - IBM Maximo for Oil and Gas V7.6.1
 - IBM Maximo Health, Safety and Environment Manager V7.6.1
 - IBM Maximo Anywhere V7.6.1

Description

Maximo Linear Asset Manager 7.6.0

Maximo Linear Asset Manager is a product add-on used for managing assets such as roads, pipelines, rail lines, and transmission lines. This product is licensed per Authorized User. Each IBM Linear Asset Management Authorized must also have a license or limited use license with asset access for IBM Maximo Asset Management or an IBM Maximo Industry Solution.

- Apply user defined relationships to more accurately portray operational connectivity.
- Use dynamic condition monitoring by adding a linear position expression to measurements.
- Manage linear work using start and end measures or predefined reference points.
- Track labor, materials and tools charges by linear measure and not just asset.
- Search linear work orders using linear measures or reference points.

Maximo for Utilities 7.6.0

Maximo for Utilities enables customers in the electric, gas, and water utility industries to efficiently and effectively manage all of their assets used in the transmission and distribution of electricity, gas, and water. The solution addresses key business challenges by optimizing asset performance, complying with industry regulations, and leveraging industry best practices. This solution is configurable to keep pace with the ever changing business and regulatory requirements of utilities. Maximo for Utilities offers:

- Asset management analytics for informed decision making consisting of dashboards and KPIs that are created from the combination of real-time plant and equipment information provided by the solution foundation and EAM information
- Compatible Unit Estimating from design to as-built
- Compatible Unit Library
- Compatible Unit Administration
- Maximo Spatial Asset Management (GIS)
- Revenue Meter Asset and Work Management
- Manage Task Prerequisites and Regulatory requirements

Additional IBM Maximo solutions for building better asset management

Maximo for Aviation V7.6.4 helps organizations that provide maintenance, repair, and overhaul services in the aviation market improve the performance of their operations. Maximo for Aviation helps organizations:

- Create and manage the lifecycle of maintenance programs.
- Document the maintenance activities for the aircraft for its entire life.
- Improve the scheduling of maintenance activities to reduce turnaround time.
- Gain analytical insights through IBM Cognos^(R) reports.

Maximo Asset Configuration Manager V7.6.4 is an add-on to Maximo Asset Management that provides configuration management of the software and hardware used for complex assets such as rail locomotives.

Maximo Asset Management Scheduler V7.6.4 is an end-to-end work management tool for Maximo Asset Management. It enables planners and schedulers to graphically view work orders and preventive maintenance schedules on a Gantt chart, providing access to critical factors needed for the creation of an accurate and meaningful work schedule. It also accommodates the needs of the supervisors, dispatchers, and the field technicians in an effort to streamline the entire Maximo work management process.

Maximo Asset Management Scheduler Plus V7.6.4 is an advanced work management tool for Maximo Asset Management that extends Maximo Scheduler's capabilities to enable users to manage large projects (such as shutdowns, outages, and turnarounds) as well as all planned and unplanned maintenance, across either a broad geographic area or where weather plays an important factor in asset availability. With this Maximo embedded solution, end-to-end work management can be accomplished using a single system of record.

Maximo Oil and Gas V7.6.1 and IBM Maximo Health, Safety and Environment Manager V7.6.1 help transform business models by integrating work and asset management, health and safety, and integrated operations in a way that becomes essential for oil and gas, and health and safety businesses. The new releases can help businesses improve operational efficiency and effectiveness, exceed quality and safety requirements, and meet regulatory and compliance standards.

Some key new or enhanced features and capabilities of Maximo Oil and Gas and Maximo Health, Safety and Environment Manager are:

- IBM Maximo Incident Reporter mobile application. The new Maximo Incident Reporter mobile application enables you to quickly capture the details for incidents, hazards, or safety observations by using your mobile devices and by leveraging the IBM Maximo Anywhere mobile solutions. You can quickly create incident records and upload attachments, such as photographs, to the Maximo server. Additional details and incident follow up are entered in the Incidents application of Maximo Asset Management.
- Isolation Management application. To efficiently manage the work activities around isolating assets or locations that operate in a potentially dangerous environment, you can use the new Isolation Management application. By using this application, you can create isolation certificates that provide a system of control to ensure the safety of the plant and its personnel.
- Operational Actions application. To efficiently manage the actions that are assigned to you or to your group, across multiple applications, you can use the Operational Actions application. By using this new application, you can manage all of the actions for any Maximo Health, Safety and Environment Manager application for which actions are defined. You can review the actions that are to be completed, mark actions as complete, and add actions to an application. You can also create queries that are based on search fields that you choose, and create reports from those queries.
- Operator Log Book application. With this new application, you can review all of the shift logs and their entries that relate to an asset or a location. Operator log books link shift logs together into a log book. An operator log book facilitates the organization of shift logs. Personnel who are taking over from an earlier work shift can review the progression of events and be aware of the possible need for action.
- Ticket Templates application. Applying standardized templates to common and high-volume tickets saves time by letting the system populate values from the template into fields on the ticket. You create and manage templates using the new Ticket Templates application. You can also add frequently used ticket templates to your Quick Insert portlet.

Section 508 of the US Rehabilitation Act

IBM makes no representation about the Section 508 status of the third-party electronic and information technology product in this offering. Contact the vendor for specific, current information on the Section 508 status of this product.

Offering Information

Product information is available on the [IBM Offering Information](#) website.

More information is also available on the [Passport Advantage^{\(R\)} and Passport Advantage Express](#) website.

Publications

English and national language product documentation can be accessed from [IBM Knowledge Center](#).

English product documentation is also included with the program software and may be printed.

English publications will be available on the product's general availability date. National language publications will be available within 60 days of general availability. Refer to the [Product Configuration Matrix](#) for additional information on translation of publications.

Services

Software Services

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of our lab-based, software services team and the business consulting, project management, and infrastructure expertise of our IBM Global Services team. Also, we extend our IBM Software Services reach through IBM Business Partners to provide an extensive portfolio of capabilities. Together, we provide the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

To learn more about IBM Software Services contact your Lab Services Sales or Delivery Leader.

Technical information

Specified operating environment

Hardware requirements

Client workstation

- Processor: IntelTM PentiumTM 2 - 4 GHz
- Main memory: 2 - 4 GB RAM

Administrator workstation

- Processor: Intel Pentium 2 GHz
- Main memory: 7 GB RAM
- Hard disk space: Minimum 11 GB
- Network connection between administrator system and middleware: 10 Mbps

Application software server

- Processor: Intel Pentium (minimum) Single-Server Topology 2 GHz
- Processor: Intel Pentium (recommended) Single-Server Topology 6 GHz
- Processor: Intel Pentium (minimum) Multi-Server Topology 2 GHz
- Processor: Intel Pentium (recommended) Multi-Server Topology 6 GHz
- Hard disk space: 60 GB
- Main memory: 8 GB RAM minimum
- Main memory: 8 GB RAM recommended

Software requirements

Client workstations

Software:

- Microsoft Windows™ 7.0, 8.1
- Microsoft Internet Explorer 8.0, 9.0, 10.0, 11.0; Microsoft Edge 20; Firefox 31, 38; Google Chrome 37, 47; Safari 7 (Macintosh only)
- Adobe™ Acrobat Reader 8 or 9

Application server

This is the server where you install IBM WebSphere® Application Server Network Deployment or BEA WebLogic Application Server and typically, where you deploy Maximo Enterprise Archive (EAR) files.

Hypervisors

AIX®:

- Application Workload Partition (WPAR) in IBM AIX V7.1
- IBM PowerVM® Hypervisor (LPAR, DPAR, Micro-Partition), any supported version
- WPAR: Product installed in Global AIX Instance, executed in System Workload Partition in AIX V7.1
- WPAR: Product installed in System Workload Partition in AIX V7.1

Linux™:

- IBM PR/SM™, any version
- IBM PowerKVM, any supported version
- IBM PowerVM Hypervisor (LPAR, DPAR, Micro-Partition), any supported version
- KVM for IBM z Systems™
- KVM in SUSE Linux Enterprise Server (SLES) 11
- Microsoft Hyper-V Server 2012
- Microsoft Hyper-V Server 2012 R2
- Red Hat KVM as delivered with Red Hat Enterprise Linux (RHEL) and its Red Hat Enterprise Virtualization (RHEV) equivalent 6.0
- Red Hat KVM as delivered with RHEL and its RHEV equivalent 6.5
- VMware ESXi 5.5, and 6.0
- IBM z™/VM V6.1

Microsoft Windows:

- KVM in SUSE Linux Enterprise Server (SLES) 11
- Microsoft Hyper-V Server 2012
- Microsoft Hyper-V Server 2012 R2

- Red Hat KVM as delivered with RHEL and its RHEV equivalent 6.5
- VMware ESXi 5.5, and 6.0

Web servers

- IBM WebSphere Application Server V8.5, V8.5.5.3, V8.5.5.8, V8.5.5.9, V9 with JDK 1.8
- WebLogic Server 12c, 12cR1, 12cR2, 12.2.x with JDK 1.8

Database servers

This is the server where you install database software to create and maintain your IBM Maximo database. You are responsible for maintaining the database platform software.

- Hardware:
 - Refer to the database vendor documentation for hardware specifications.
- Software:
 - IBM DB2^(R) 10.1, 10.5, 11.1
 - Workstation or Enterprise Edition
 - Configured for TCP/IP support
 - Oracle V11g R2 Standard or Enterprise Edition
 - Oracle V12c Standard or Enterprise Edition
 - Microsoft SQL Server 2012¹
 - Microsoft SQL Server 2014¹
- Report servers:
 - Business Intelligence Reporting Tools (BIRT) 4.3.1
 - IBM Cognos^(R) Business Intelligence V10.2.1.1
- Lightweight Directory Access Protocol (LDAP) support:
 - IBM Tivoli^(R) Directory Server V6.3
 - Microsoft Active Directory 2012, 2012 R2
- JavaTM support (browser):
 - Oracle Java SE Developmental Kit, Java Runtime Environment, Java Developmental Kit 7.0.55, 7.0.65, 7.0.67, 7.0.71, 7.0.75, 8.0.60, 8.0.66, 8.0.71, 8.0.74, and 8.0.77
 - Oracle Java SE Developmental Kit, Java Runtime Environment, Java Developmental Kit (Mac OS X) 7.0 Update 55, 7.0 Update 65, 7.0 Update 67, 7.0 Update 71, 7.0 Update 75 and 8.0 Update 60, 8.0 Update 66, 8.0 Update 71, 8.0 Update 74, and 8.0 Update 77
- Browser support:
 - Internet Explorer 8, 9, 10, 11
 - Edge 20
 - Firefox 31, 38
 - Google Chrome 37, 47
 - Safari 7 (Macintosh only)
- Mobile browser support:
 - All browsers supported by IBM Maximo Asset Management V7.6
 - Native browser on Apple iOS devices (Apple iPhone, Apple iPod touch, and Apple iPad)
 - Native browser on devices running Android 4, or later

¹ Microsoft SQL not supported by the following:

- IBM Maximo Asset Configuration Manager
- IBM Maximo for Aviation

A complete listing of supported software can be obtained at the [IBM Software Product Compatibility Reports](#) website.

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

IBM Electronic Support

The IBM Support Portal is your gateway to technical support. This includes IBM Electronic Support tools and resources, for software and hardware, to help save time and simplify support. The Electronic Support tools can help you find answers to questions, download fixes, troubleshoot, automate data collection, submit and track problems through the Service Request online tool, and build skills. All these tools are made available through your IBM support agreement. Read about the Electronic Support portfolio of tools on the [IBM Electronic Support](#) website.

You can also access the [IBM Support Portal](#) page and the online [Service requests and PMRs](#) tool for more support.

Planning information

Packaging

This offering is delivered as electronic download from Passport Advantage. There is no physical media.

This program, when downloaded from a website, contains the applicable IBM license agreement and License Information, if appropriate, and will be presented for acceptance at the time of installation of the program. For future reference, the license and License Information will be stored in a directory such as LICENSE.TXT.

Ordering information

This product is only available through Passport Advantage. It is not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software Value Plus.

More information can be found on the [IBM Software Value Plus](#) website.

To locate IBM Business Partners for Software Value Plus in your geography for a specific Software Value Plus portfolio, go to the [Find a Business Partner](#) page.

| IBM Maximo Health, Safety and Environment Manager | 5724-U18 | Authorized User, Concurrent User |
| IBM Maximo Anywhere | 5725-M39 | Authorized User, Concurrent User |

Concurrent User

Concurrent User is a unit of measure by which the program can be licensed. A Concurrent User is a person who is accessing the program at any particular point in time. Regardless of whether the person is simultaneously accessing the program multiple times, the person counts only as a single Concurrent User. The program may be installed on any number of computers or servers, but licensee must obtain entitlements for the maximum number of Concurrent Users simultaneously accessing the program. Licensee must obtain an entitlement for each simultaneous Concurrent User accessing the program in any manner directly or indirectly (for example, through a multiplexing program, device, or application server) through any means.

Note: Some programs may be licensed where devices are considered users. In that case, the following applies. Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate user of the program and requires an entitlement as if that device were a person.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

This product is only available through Passport Advantage.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

Agreement for Acquisition of Software Maintenance

These programs are licensed under the IBM Program License Agreement (IPLA) and the associated Agreement for Acquisition of Software Maintenance, which provide for support with ongoing access to releases and versions of the program. IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available. These programs have a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

License Information number

| Program number | Program name | License document number |
|----------------|---|-------------------------|
| 5724-U18 | IBM Maximo Linear Asset Manager | L-SNEP-9TEME4 |
| 5724-U18 | IBM Maximo Asset Management Scheduler | L-SNEP-ACQJ3V |

| 5724-U20 | IBM Maximo Oil and Gas | L-SNEP-A8RKEJ |
| 5724-U18 | IBM Maximo Health, Safety and Environment Manager | L-SNEP-A8RKFB |

See the [License Information documents](#) page on the IBM Software License Agreement website for more information.

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, see the [IBM Software Support Handbook](#).

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Subscription and Support (also referred to as Software Maintenance) is in effect.

This technical support allows you to obtain assistance (by telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Subscription and Support (Software Maintenance) also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, through an announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Volume orders (IVO)

No

Passport Advantage applies

Yes, information is available on the [Passport Advantage and Passport Advantage Express](#) website.

Software Subscription and Support applies

Yes. Software Subscription and Support, also referred to as Software Maintenance, is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and Technical Support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance by telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, see the [IBM Software Support Handbook](#). Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

Unless specified otherwise in a written agreement with you, IBM does not provide support for third party products that were not provided by IBM. Ensure that when contacting IBM for covered support, you follow problem determination and other instructions that IBM provides, including in the [IBM Software Support Handbook](#).

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, go to the [Passport Advantage and Passport Advantage Express](#) website.

Statement of good security practices

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a lawful, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective.

Important: IBM does not warrant that any systems, products, or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.

IBM Electronic Services

Electronic Service Agent™ and the IBM Electronic Support web portal are dedicated to providing fast, exceptional support to organizations that have IBM Systems. The IBM Electronic Service Agent tool is a no-additional-charge tool that proactively monitors and reports hardware events, such as system errors, performance issues, and inventory. The Electronic Service Agent tool can help you stay focused on your company's strategic business initiatives, save time, and spend less effort managing day-to-day IT maintenance issues. Servers enabled with this tool can be monitored remotely around the clock by IBM Support, all at no additional cost to you.

Now integrated into the base operating system of AIX V5.3, AIX V6.1, and AIX V7.1, Electronic Service Agent is designed to automatically and electronically report system failures and utilization issues to IBM, which can result in faster problem resolution and increased availability. System configuration and inventory information collected by the Electronic Service Agent tool also can be viewed on the secure Electronic Support web portal, and used to improve problem determination and resolution by you and the IBM support team. To access the tool main menu, simply type `smitty esa_main`, and select Configure Electronic Service Agent. In addition, ESA now includes a powerful web user interface, giving the administrator easy access to status, tool settings, problem information, and filters. For more information and documentation on how to configure and use Electronic Service Agent, go to the [IBM Electronic Support](#) website.

The IBM Electronic Support portal is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. This portal enables you to gain easier access to IBM resources for assistance in resolving technical problems. The My Systems and Premium Search functions make it even easier for organizations that are Electronic Service Agent tool-enabled to track system inventory and find pertinent fixes.

Benefits

Increased uptime: The Electronic Service Agent™ tool is designed to enhance the Warranty or Maintenance Agreement by providing faster hardware error reporting and uploading system information to IBM Support. This can translate to less wasted time monitoring the symptoms, diagnosing the error, and manually calling IBM Support to open a problem record. Its 24 x 7 monitoring and reporting mean human intervention is not required to report errors.

Security: The Electronic Service Agent tool is designed to be secure in monitoring, reporting, and storing the data at IBM. The Electronic Service Agent tool is designed to securely transmit either through the Internet (HTTPS or VPN) or modem to provide organizations a single point of exit from their site. Communication is one way. Activating Electronic Service Agent does not enable IBM to call into an organization's system.

For additional information, go to the [IBM Electronic Service Agent](#) website.

More accurate reporting: Because system information and error logs are automatically uploaded to the IBM Support Center in conjunction with the service request, you are not required to find and send system information, decreasing the risk of misreported or misdiagnosed errors. Once inside IBM, problem error data is run through a data knowledge management system and knowledge articles are appended to the problem record.

Customized support: Using the IBM ID entered during activation, you can view system and support information in the *My Systems and Premium Search* sections of the [IBM Electronic Support](#) page.

My Systems provides valuable reports of installed hardware and software using information collected from the systems by Electronic Service Agent. Reports are available for any system associated with your IBM ID. Premium Search combines the function of search and the value of Electronic Service Agent information, providing advanced search of the technical support knowledgebase. Using Premium Search and the Electronic Service Agent information that has been collected from your system, you are able to see search results that apply specifically to your systems.

For more information on how to utilize the power of IBM Electronic Services, contact your IBM Systems Services Representative, or go to the [IBM Electronic Support](#) website.

Prices

Business Partner information

If you are an IBM Business Partner -- Distributor for Workstation Software acquiring products from IBM, you may link to Passport Advantage Online for resellers where you can obtain Business Partner pricing information. An IBM ID and password are required to access the [IBM Passport Advantage](#) website.

For current prices, contact your IBM representative.

Passport Advantage

For Passport Advantage information and charges, contact your IBM representative or authorized IBM Business Partner for Software Value Plus. Additional information is also available on the [Passport Advantage and Passport Advantage Express](#) website.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or go to the [IBM Global Financing](#) website for more information.

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, permits accelerated implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified customers.

Order now

To order, contact your Americas Call Centers, local IBM representative, or your IBM Business Partner. To identify your local IBM representative or IBM Business Partner call 800-IBM-4YOU (426-4968). For more information, contact the Americas Call Centers.

Phone: 800-IBM-CALL (426-2255)

Note: Shipments will begin after the planned availability date.

IBM Software Value Plus

These products are available under IBM Software Value Plus, either directly from IBM or through authorized Business Partners who invest in skills and high-value solutions. IBM customers may benefit from the industry-specific or horizontal solutions, skills, and expertise provided by these Business Partners.

Additions to Software Value Plus will be communicated through standard product announcements. For a current list of IBM software available under Software Value Plus, go to the [IBM Software Value Plus](#) website.

For questions regarding Software Value Plus, go to the [IBM Software Value Plus](#) website.
