

IBM Lotus Notes and Domino 7.0.2 maintenance release contains updates and fixes

Overview

IBM Lotus Notes® and Domino® 7.0.2, a maintenance release, contains fixes to the Lotus Notes and Domino family of products, including IBM Lotus Enterprise Integrator™. This regularly scheduled update contains a limited number of new product features. Some of these new features include:

- IBM Lotus® Domino Web Access on the Mac via Firefox
- The ability to import iCal compliant calendars directly into the Lotus Notes calendar
- A feature-rich, easy to personalize blog template for creation of interactive online journals
- Lotus Notes access for SAP solutions feature
- The ability to load the Lotus Notes environment on to a USB flash drive or memory stick
- The ability to generate RSS feeds for any Lotus Domino application or mail file
- Lotus Domino server support for Novell SUSE Linux™ 10 (on both 32-bit and 64-bit platforms)
- Support for Microsoft™ Windows™ X64 server and format conversion for Microsoft Exchange Transport Neutral Encapsulation Format (TNEF) messages
- “Run as Admin” extension to the Lotus Domino Smart Upgrade capability
- Expanded design element support for Lotus Domino DXL (Domino XML language)

For more detailed information about 7.0.2, refer to the Release Notes for IBM Lotus Notes and Domino 7.0.2, which can be found either on the product CD-ROM (readme.nsf,

readme.pdf) or online at the Lotus Documentation Library Web site

<http://www.lotus.com/idd/doc>

This maintenance release, as it pertains to the Lotus Domino Server, is available for IBM Lotus Domino 7 for z/OS®. To access the associated prerequisites, technical information, ordering information, and terms and conditions, reference the IBM Lotus Domino V7 for z/OS Software Announcement 205-198, dated August 30, 2005.

Key prerequisites

Refer to the **Hardware requirements** and **Software requirements** sections.

Planned availability dates

- September 29, 2006: Electronic software delivery — English only with national language versions to follow.
- November 10, 2006: Media and documentation — English only.

Availability of national language versions for Danish, Swedish, Norwegian, Dutch, Finnish, Portuguese, Russian, Hebrew, Arabic, Hungarian, Greek, Turkish, Czech, Polish, Slovenian, Thai are scheduled for first quarter 2007 and will be updated in a secondary availability announcement scheduled for December 2006.

Specific national language version details with availability dates for physical media included in this announcement are listed in the **Availability of national languages** section of this announcement letter.

At a glance

IBM Lotus Notes and Domino release 7.0.2:

- Provides you with the expected maintenance updates
- Adds a number of new product features
 - The ability to RSS enable databases
 - The ability to take your Lotus Notes desktop with you on certain USB pluggable devices
 - The ability to add calendar events to your Lotus Notes calendar from iCal compliant published calendars
 - Inclusion of a blog template

For ordering, contact:

Reference: YE001

Description

Lotus Notes and Domino 7.0.2 delivers a complete, flexible, and open integrated collaborative environment that can help address the needs of executives, end users, IT groups, and developers. It brings together elements necessary to maximize collaboration and human interaction.

With Lotus Notes and Domino 7.0.2, you can focus on your top-priority work, connect with various communities, leverage existing skills, and more. All this can help reduce total cost of ownership, while delivering security-rich capabilities, scalability, manageability, productivity, reusability, and flexibility.

Inclusion of the new server, client, and platform options of Lotus Notes and Domino 7.0.2 extends IBM's leadership in the messaging and collaboration platform. The IBM Lotus Domino Web Access client will now run on the Mac via the Firefox browser. The Lotus Domino server now also supports Novell SUSE Linux 10 (on both 32-bit and 64-bit platforms).

To help address customer concerns about cost of ownership, the highly popular Lotus Domino Smart Upgrade capability has improved. By adding a feature known as "Run as Admin," administrators can prepare a Lotus Notes client installation kit that includes a prepackaged Microsoft Windows account with administrator privileges. This lets an administrator upgrade a desktop that is completely locked down.

In May 2006, IBM first made available the IBM Lotus Notes access for SAP solutions feature. Now, Lotus Notes and Domino 7.0.2 includes a set of seven usage scenarios so users can act on their SAP data within Lotus Notes. The newly added integration capabilities are employee/manager self-service and meeting scheduling.

Consistent with any maintenance release, IBM has taken strides to improve consistency with emerging market changes and standards. To that end, Lotus Notes and Domino 7.0.2 supports Microsoft Windows Server 2003 x64 Edition and format conversion for Microsoft Exchange Transport Neutral Encapsulation Format (TNEF) Messages. TNEF is a message format used by Microsoft in Microsoft Exchange and Microsoft Outlook when sending rich-text format messages. Previously, non-Microsoft software could not convert TNEF to readable text because the API was undocumented. Under newly published specifications, Lotus Domino 7.0.2 correctly converts such messages into readable form. In addition, a number of new application development features have been included in Lotus Notes and Domino 7.0.2, including new HTML form options, expanded support for design elements in DXL (Domino XML language), plus new HTML APIs and additional MIME APIs available in the C API Toolkit.

Four new features are available:

- The ability to import iCal based calendars directly to the Lotus Notes calendar — This feature provides you with the option of subscribing to iCal-standard published calendars and having key dates added directly to their Lotus Notes calendar. This feature is particularly useful if you engage with professional or social organizations, or if you have events available via a public iCal calendar.
- A blog template for creation of interactive online journals — With this release, Lotus provides a easy to personalize template, with support for PodCasts and RSS feeds, that can be used out-of-the-box to set up and manage a blog that allows you interact with a wide

variety of internal or external audiences through Web browsers or Lotus Notes clients.

- The ability to load the Lotus Notes environment on to a USB flash drive or memory stick — Now with version 7.0.2, users can insert a 256 KB memory stick loaded with their Notes environment into the USB drive on any computer, and with a few simple steps, access their Lotus Notes environment from that computer, whether Lotus Notes was previously installed there or not. When the user is finished and removes their memory stick, none of their data or the Notes icon is left exposed on the host computer. For machines that have a companies' VPN access present, this feature can provide a fully connected environment just as it is on the users own desktop. For machines without VPN access, this feature provides Lotus Notes in offline mode, similar to using your laptop on an airplane.
- The ability to RSS-enable any Lotus Notes and Domino database — To extend the integration of Lotus Notes with Web technologies, Lotus Domino 7.0.2 will allow administrators to publish any view or folder of a Lotus Domino database as a RSS 2.0 feed. The XML for RSS feed readers and aggregators is access protected by Lotus Domino HTTP security features. This feature provides you with another option to easily and selectively publish data to internal and external audiences.

Accessibility by people with disabilities

IBM strives to provide accessible solutions for customers with disabilities and where full accessibility is not met, customers are advised on workable alternatives, where possible, to meet their needs.

Section 508 of the U.S. Rehabilitation Act

IBM makes no representation about the Section 508 status of the third party electronic and information technology product in this offering. Contact the vendor for specific, current information on the Section 508 status of this product.

Statement of direction

IBM continues to demonstrate their commitment to the growth of the Lotus Notes and Domino platform by leveraging IBM's technical innovations. IBM continues to provide additional business value to the Lotus Notes and Domino customer.

All statements regarding IBM's plans, directions, and intent are subject to change or withdrawal without notice.

IBM Lotus Domino Web Access system requirements

Client requirements

- Recommended for better performance — Pentium IV 1 GHz with 512 MB of memory (Microsoft Windows and

Linux clients); G4 1.25 GHz with 512 MB of memory (Macintosh clients)

- Minimum required — Pentium III 400 MHz with 128 MB of memory (Microsoft Windows client); Pentium III 500 MHz with 192 MB of memory (Linux client); G4 1 GHz 256 MB of memory (Macintosh client)

IBM Lotus Domino Access for Microsoft Outlook requirements

Client system memory

- Microsoft Windows 2000 Professional Edition and Windows XP Professional Edition with Service Pack 3: 128 MB RAM required; 256 MB or more recommended

Client disk space

- Microsoft Windows OS: 275 MB disk space

IBM Lotus Domino Offline Services system requirements

Client system requirements

- Intel Pentium
- Minimum RAM: 128 MB; recommended RAM: 256 MB
- 500 MB free disk space recommended for basic operation
- Additional disk space for each subscription, depending on size

Browser requirements

- Internet Explorer 6.0, or later

IBM Lotus Enterprise Integrator™

Microsoft Windows 2000 and Windows NT™

- 60 MB available disk space
- 256 MB RAM (above Domino requirements) for Data Management activities only, 512 MB (above Domino requirements) for Real Time and Data Management activities

Sun Solaris, IBM AIX, and Linux

- 80 MB available disk space
- 256 MB RAM (above Domino requirements) for Data Management activities only, 512 MB (above Domino requirements) for Real Time and Data Management activities

Software requirements

IBM Lotus Notes Client

Platform	Microsoft Windows 2000	Microsoft Windows XP
Supported operating system versions	Microsoft Windows 2000 Professional	Microsoft Windows XP Professional Microsoft Windows XP Tablet PC Edition

Note: For Service Pack information, refer to “Microsoft Windows service pack requirements” Release Notes.

IBM Lotus Domino Administrator Client, IBM Lotus Domino Designer

Platform	Microsoft Windows 2000	Microsoft Windows XP
Supported operating system versions	Microsoft Windows 2000 Professional	Microsoft Windows XP Professional

Note: For Service Pack information, refer to “Microsoft Windows service pack requirements” Release Note.

IBM Lotus Domino Server — Microsoft Windows 2000, Microsoft Windows 2003

Platform	Microsoft Windows 2000	Microsoft Windows XP
Supported operating system versions	Microsoft Windows 2000 Server Microsoft Windows 2000 Advanced Server	Microsoft Windows 2003 Server Standard Edition Microsoft Windows 2003 Server Enterprise Edition Microsoft Windows Server 2003 x64 Edition

Note: For Service Pack information, refer to “Microsoft Windows service pack requirements” Release Notes.

IBM Lotus Domino Server — AIX, Linux, Sun Solaris

Platform	AIX	Linux	Sun Solaris
Supported operating system versions	AIX 5.2 AIX 5.3	SUSE Linux Enterprise Server (SLES) 8 SUSE Linux Enterprise Server (SLES) 9 SUSE Linux Enterprise Server (SLES) 10 (32 bit and 64 bit) Red Hat Enterprise Linux 4.0	Sun Solaris 9 Sun Solaris 10

Note: For Service Pack information, refer to the appropriate patch requirements (AIX, Linux, or Sun Solaris) Release Notes.

For the most current information regarding platforms supported, refer to Lotus Knowledge Base online at

<http://www-3.ibm.com/software/lotus/support/>

IBM Lotus Domino Server — i5/OS, z/OS, Linux on zSeries

Platform	IBM Lotus Domino for i5/OS	z/OS	Linux on zSeries
Supported operating system versions	IBM i5/OS V5R3 IBM i5/OS V5R4	z/OS V1R5 z/OS V1R6	SUSE Linux Enterprise Server (SLES) 8 on zSeries (31-bit) SUSE Linux Enterprise Server (SLES) 9 on zSeries (64-bit) SUSE Linux Enterprise Server (SLES) 10 on zSeries (64-bit)

Notes For additional information, refer to “i5/OS system requirements” Release Notes.

For Service Pack information, refer to “Domino for Linux on zSeries service pack requirements” Release Notes.

IBM Lotus Domino Web Access system requirements

Client operating systems

- Microsoft Windows 2000 Professional

- Microsoft Windows XP Professional
- Macintosh OS X 10.4 Note: Does not support Domino Off-Line Services (DOLS) and Lotus Sametime® awareness

Client operating systems for Mozilla

- Novell SUSE Linux Enterprise Server (SLES) 8
- Novell SUSE Linux Enterprise Server (SLES) 9
- Red Hat Enterprise Linux Desktop 4 (does not support DOLS or local archiving)

Supported browsers

- Internet Explorer 6.0, or later
- Mozilla 1.4.1 and 1.7.x (Linux clients only)
- Mozilla Firefox 1.0.x and 1.5.0.x on Windows 32, Macintosh, and Linux (supported by the Lotus Domino Web Access V7 mail template only; not supported by iNotes6 templates)

Any attempt to access Lotus Domino Web Access through an unsupported browser will result in the display of an unsupported browser notice. Netscape 4.x users may see hangs or crashes when encountering the Lotus Domino Web Access unsupported browser page. If you are a Netscape 4.x user and you encounter these problems, you should open your mail file using the WebMail UI directly through the &ui=webmail switch. This is documented in the topic “Switching to WebMail” in the Lotus Domino Web Access help.

Note: Lotus Domino Web Access will not work if JavaScript is disabled or if session cookies are disabled.

Server requirements

For a complete list of server operating systems and requirements, refer to “IBM Lotus Notes and Domino V7.0.2 platforms and system requirements” in the Release Notes.

Certified proxy servers

- SunOne Portal Server 6.2
- IBM WebSphere® Edge Server V2.0.2 efix 49
- Tivoli® Access Manager V5.1

Adobe Acrobat

Adobe Acrobat Reader, V4.0, or later to print calendars.

IBM Lotus Domino Access for Microsoft Outlook requirements

IBM Lotus Domino Access for Microsoft Outlook allows Microsoft Outlook 2000, 2002 (XP), or 2003 users to connect to an IBM Lotus Domino Server running Domino V7.0.2. If you are upgrading from an earlier beta version, refer to the “Upgrade Instructions” before installing.

System and Microsoft Outlook requirements

- Microsoft Windows OS (Window 2000 Professional or Windows XP Professional)
- Microsoft Outlook 2000 or Outlook XP with Service Pack 3, and Outlook 2003 with Service Pack 1
- Lotus Domino Server running V6.5.1, or later
- Mail databases created using a Mail(n).NTF, Mail(n)ex.NTF or DWA(n).NTF template, that are V6.5.1, or later

IBM Lotus Domino Offline Services system requirements

IBM Lotus Domino Offline Services is supported on Win32 clients. DOLS is supported on Win32, AIX, Sun Solaris, and Linux servers.

IBM Lotus Enterprise Integrator

- Microsoft Windows 2000 Server and Advanced Server
- Microsoft Windows 2003 Server and Server Enterprise Edition
- Microsoft Windows Server 2003 x64 Edition
- AIX V5.2 and V5.3
- Sun Solaris 9.0
- Sun Solaris 10
- SUSE Linux Enterprise Server (SLES) 8
- SUSE Linux Enterprise Server (SLES) 9
- SUSE Linux Enterprise Server (SLES) 10 (32 and 64 bit)
- Red Hat Enterprise Linux 4.0
- OS/400® V5R3
- i5/OS V5R4

Planning information

Software Maintenance, previously referred to as Software Subscription and Technical Support, is included in the Passport Advantage Agreement. Installation and technical support is provided by the Software Maintenance offering of the IBM International Passport Advantage Agreement. This fee service enhances customer productivity, with voice and electronic access into IBM support organizations.

Packaging: IBM Lotus Notes and Domino and Lotus Enterprise Integrator V7.0.2 will be distributed via a media package and electronic software distribution (ESD).

IBM Lotus Notes and Domino media package is distributed in one package with the following:

- Lotus Notes and Domino product CDs.
- Softcopy product documentation, including README files, which is included on the product CDs.

The License Information numbers are:

- Lotus Domino - L-GHUS-6LERFU
- Lotus Notes - L-GHUS-6LERGJ

IBM Lotus Enterprise Integrator media package is distributed in one package with the following:

- Lotus Enterprise Integrator product CD.
- Softcopy product documentation including read-me files is included on the product CD.

The License Information form number is:

- Lotus Enterprise Integrator - L-GHUS-6LERHB

These programs, when downloaded from a Web site, contain the applicable IBM license agreement and License Information, if appropriate, which will be presented for acceptance at the time of installation of the program. The license and License Information will be stored in a directory such as LICENSE.TXT for future reference.

Security, auditability, and control

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Charge metrics definitions

Value Unit

A Value Unit is a pricing charge metric for program license entitlements which is based upon the quantity of a specific designated measurement used for a given program. Each program has a designated measurement. The most commonly used designated measurement is a processor core. However, for select programs, there are other designated measurements such as users, client devices, and messages. The number of Value Unit entitlements required for your specific implementation of the given program must be obtained from a conversion table associated with the program. You must obtain a Proof of Entitlement (PoE) for the appropriate number of Value Unit entitlements for your implementation. The Value Unit entitlements of a given program cannot be exchanged, interchanged, or aggregated with Value Unit entitlements of another program.

Processor (Value Unit)

A processor (commonly called a CPU or core) is a functional unit within a computing device that interprets and executes instructions. A processor consists of at least an instruction control unit and one or more arithmetic and/or logic unit. With multi-core technology, each core is considered a processor. Not all processors require the same number of Value Unit entitlements. To determine the number of Value Unit entitlements required, refer to the processor value unit conversion table on the Passport Advantage Web site

http://www-142.ibm.com/software/sw-lotus/services/cwepassport.nsf/wdocs/pvu_licensing_for_customers

With full capacity licensing, a PoE must be acquired for the appropriate number of value units based on all activated processors on the server available to the program or a component of the program.

Authorized user

An authorized user is one and only one individual (named or unnamed) within or outside your enterprise. A PoE must be obtained for each individual user accessing the program in any manner. A program licensed under an authorized user PoE may be installed on a single computer or server, and accessed by multiple users, provided that a PoE has been obtained for each individual user accessing the program either directly or indirectly (via a multiplexing program, device, or application server) through any means on behalf of the user.

Processor Day

Processor Day is a daily charge that allows customer to purchase additional capacity during peak periods. This applies to per CPU products only and requires the customer to already own a per CPU license of product.

Authorized User

An Authorized User (User) is one and only one individual, machine, program or device with a specific identity (ID) within or outside your enterprise.

A PoE is evidence of your authorization to use a program and is required for each User accessing the program or any component, application, feature, function and/or capability thereof, either directly or indirectly, through any means on behalf of the User in any manner.

The program may be installed on one or more computers, and accessed by multiple Users provided that a User authorization has been obtained for each individual User.

1. Users have unique specific identity and IDs cannot be shared.
2. An ID may establish one or more connections and count as a single User.
3. An ID may only be reassigned for the long-term replacement of personnel, machine, program, or device.

Cross-platform product for use on zSeries

Order the part numbers that follow when there is an intention to acquire this cross-platform product for deployment on the zSeries/S/390® platform. This set of part numbers provides the identical supply and authorization as the other set in this announcement. The distinction is to identify the planned deployment platform.

On/Off Capacity on Demand

IBM Lotus Domino Enterprise Server

Part description	Part number
Domino Enterprise Svr Processor Day Per Use-Day, On/Off Capacity on Demand	ASPH8LL

Terms and conditions

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Licensing: IBM International Program License Agreement and License Information document. PoE are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Maintenance, previously referred to as Software Subscription and Technical Support.

License Information form numbers

Program name	Program number	Form number
IBM Lotus Enterprise Integrator	5724-L76	L-GHUS-6LERHB
IBM Lotus Notes/Domino	5724-E62	L-GHUS-6LERFU, L-GHUS-6LERGJ

On or near the planned availability date, the License Information will be available for review on the IBM Software License Agreement Web site

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty: Yes

Warranty: This program includes a warranty for one year from acquisition from IBM or an authorized IBM Business Partner. For one year from acquisition of the program, this warranty provides the customer with access to databases containing program information and FAQs, including any known fixes to defects, which the customer can download or otherwise obtain and install.

Program technical support: Technical support of a program product will be available for a minimum of three years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and

operation of the program product. Software Maintenance also provides you with access to updates, releases, and versions of the program. Customers will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee: If for any reason you are dissatisfied with the program and you are the original licensee, return it within 30 days from the invoice date, to the party (either IBM or its reseller) from whom you acquired it, for a refund.

- For programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program.
- For programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by the customer.

Copy and use on home/portable computer

Product name	Copy and use on home/portable computer?
IBM Lotus Enterprise Integrator	Yes
IBM Lotus Notes/Domino	No

Volume orders (IVO): No

Passport Advantage applies: Yes, and through the Passport Advantage Web site at

<http://www.ibm.com/software/passportadvantage>

Software Maintenance applies: Yes

Software Maintenance, previously referred to as Software Subscription and Technical Support, is included in the IBM International Passport Advantage Agreement. Installation and technical support is provided by the Software Maintenance offering of the IBM International Passport Advantage Agreement. This fee service provides voice and electronic access to IBM support organizations.

IBM includes one year of Software Maintenance with the initial license acquisition of each program acquired. The initial period of Software Maintenance can be extended by the purchase of a renewal option, if available.

While your Software Maintenance is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, every day of the year. For additional details, consult your *IBM Software Support Guide* at

<http://techsupport.services.ibm.com/guides/handbook.html>

Software Maintenance does not include assistance for the design and development of applications, your use of

programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under this agreement.

For more information about the Passport Advantage Agreement, visit the Passport Advantage Web site at

<http://www.ibm.com/software/passportadvantage>

iSeries Software Maintenance applies: No

Educational allowance available: Not applicable.

On/Off Capacity on Demand

To be eligible for On/Off Capacity on Demand pricing, customers must be enabled for temporary capacity on the corresponding hardware, and the required contract — Z125-6907, Amendment for iSeries and pSeries® Temporary Capacity On Demand — Software — must be signed prior to use.

IBM Electronic Services

IBM Global Services has transformed its delivery of hardware and software support services to put you on the road to higher systems availability. IBM Electronic Services is a Web-enabled solution that provides you with an exclusive, no-additional-charge enhancement to the service and support available on the IBM eServer platform. These services provide the opportunity for greater system availability due to faster problem resolution and preemptive monitoring. IBM Electronic Services is comprised of two separate but complementary elements: IBM Electronic Services news page and IBM Electronic Service Agent™.

IBM Electronic Services news page provides you with a single Internet entry point that replaces the multiple entry points traditionally used by customers to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The IBM Electronic Service Agent is no-additional-charge software that resides on your IBM eServer system. It is designed to proactively monitor events and transmit system inventory information to IBM on a periodic, customer-defined timetable. The IBM Electronic Service Agent tracks system inventory, hardware error logs, and performance information. If the server is under a current IBM maintenance service agreement or within the IBM warranty period, the Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to provide proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent will be made available to IBM service support representatives when they are helping answer your questions or diagnosing problems.

To learn how IBM Electronic Services can work for you, visit

<http://www.ibm.com/support/electronic>

Prices

Passport Advantage

For Passport Advantage information and charges, contact your IBM representative or authorized IBM Business Partner. Additional information is also available at

<http://www.ibm.com/software/passportadvantage>

Business Partner information

If you are an IBM Business Partner — Distributor for Workstation Software acquiring products from IBM, you may link directly to Business Partner pricing information. An ID and password are required (use IBM ID)

<https://www.ibm.com/software/howtobuy/passportadvantage/paoreseller/amer/channelannouncement>

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, both from IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Order now

To order, contact the Americas Call Centers, your local IBM representative, or your IBM Business Partner.
