## Overview

---

IBM® Business Process Manager is a comprehensive and consumable business process management platform that provides visibility and management of your business processes.

As a part of the family of products, IBM intends to deliver a z/OS® release for IBM Business Process Manager designed to enable process owners and business users to leverage the benefits of the z/OS platform for design, execution, monitoring, and optimization of business processes.

For information on IBM Business Process Manager V7.5, refer to Software Announcement [211-092](#), dated April 5, 2011.

IBM statements regarding its plans, directions, and intent are subject to change or withdrawal without notice at IBM's sole discretion. Information regarding potential future products is intended to outline our general product direction and it should not be relied on in making a purchasing decision. The information mentioned regarding potential future products is not a commitment, promise, or legal obligation to deliver any material, code or functionality. Information about potential future products may not be incorporated into any contract. The development, release, and timing of any future features or functionality described for our products remains at our sole discretion.

### **Trademarks**

IBM and z/OS are registered trademarks of IBM Corporation in the United States, other countries, or both.

Other company, product, and service names may be trademarks or service marks of others.

### **Terms of use**

IBM products and services which are announced and available in your country can be ordered under the applicable standard agreements, terms, conditions, and prices in effect at the time. IBM reserves the right to modify or withdraw this announcement at any time without notice. This announcement is provided for your information only. Additional terms of use are located at:
