## Overview

IBM® FileNet® Content Manager, IBM Content Foundation, and IBM Case Foundation products offer enhancements to their licensing to broaden their applicability to both clients and IBM Business Partners.

External Population Resource Value Unit (XPOP RVU) is a more cost effective way to license external populations greater than 100,000 eligible participants.

The resources for the purpose of RVU calculation are Eligible Participants. Each individual or entity eligible to participate in any service delivery program managed or tracked by the program is an Eligible Participant. Licensee must obtain sufficient entitlements to cover all Eligible Participants.

Existing customers with External User Value Unit (XUVU) licenses will be automatically migrated to External Population Resource Value Unit (XPOP RVU) licenses at Subscription and Support renewal, reinstatement, or new license purchase.

### FileNet Content Manager

FileNet Content Manager is now available with XPOP RVU licensing. Designed to help reduce deployment costs, the XPOP RVU licensing replaces the XUVU licensing previously offered.

### Content Foundation

Content Foundation is now available with XPOP RVU licensing. Designed to help reduce deployment costs, the XPOP RVU licensing replaces the XUVU licensing previously offered.

Add-On for Content Manager Enterprise Edition includes the following offerings:

- Content Foundation Add-On for Content Manager Enterprise Edition is changed to Content Foundation Add-On for Content Manager Enterprise Edition Authorized.
- Content Foundation Add-On for Content Manager Enterprise Edition Employee is an additional chargeable component available with Content Foundation.
- Content Foundation Add-On for Content Manager Enterprise Edition External Population is an additional chargeable component available with Content Foundation.

## Case Foundation

Case Foundation is now available with XPOP RVU licensing. Designed to help reduce deployment costs, the XPOP RVU licensing replaces the XUVU licensing previously offered.

## Content Navigator V2.0.2

Content Navigator is now shipped with FileNet Content Manager and Content Foundation.

Content Navigator offers a collaborative and mobile content experience that delivers better intelligence and control throughout the organization. It can transform the way organizations do business by putting content in motion for optimal value throughout its lifecycle. Content Navigator is a component that can be used with various IBM products for an enhanced mobile and collaborative content experience.

Content Navigator V2.0.2 is the latest release and has improved capabilities in:

- Writing and editing multiple documents at a time
- Exchanging files in a security-rich, highly reliable way using IBM QuickFile
- Providing production support of Microsoft™ Office integration for IBM Content Manager
- Unified searching of business content of IBM Content Manager OnDemand (CMOD), FileNet Content Manager, and IBM Content Manager
- Tracking how often content is accessed and by whom
- Enabling users to add and share comments about content
- Improving content discoverability through tagging and rating
- Providing Case Manager V5.2 support

IBM Worklight Studio, an Eclipse-based Integrated Development Environment (IDE), enables developers to perform all coding, testing, and integration tasks for web, hybrid, or native mobile applications. Included in the bundle is a sample code project that uses Content Navigator's Mobile Toolkit to bring your content to your mobile device.

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL (Reference: YE001 ).

### Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via the IBM website

[http://www.ibm.com/able/product\\_accessibility/index.html](http://www.ibm.com/able/product_accessibility/index.html)

---

### Section 508 of the US Rehabilitation Act

IBM FileNet Content Manager V5.2, IBM Content Foundation V5.2, and IBM Case Foundation V5.2 are capable as of October 4, 2013, when used in accordance with IBM's associated documentation, of satisfying the applicable requirements of Section 508 of the Rehabilitation Act, provided that any assistive technology used with the products properly interoperate with them. A US Section 508 Voluntary Product Accessibility Template (VPAT), containing details on the products accessibility compliance, can be requested on the following website

[http://www.ibm.com/able/product\\_accessibility/index.html](http://www.ibm.com/able/product_accessibility/index.html)

## Charge metrics definitions

### User Value Unit (UVU)

UVU is the metric by which this program is licensed. UVU entitlements are based on the number of users for the given program. A Proof of Entitlement (PoE) must be obtained for the appropriate number of UVUs required for your environment as defined by the specific program terms. The UVU entitlements are specific to the program and may not be exchanged, interchanged, or aggregated with UVU entitlements of another software program. UVU licensing offers you price benefits for customers by enabling a lower cost of incremental growth of resources. To understand these benefits of UVU licensing, and to determine how many UVUs to obtain for the program, contact your IBM representative.

### Virtual Server

Virtual Server is a unit of measure by which the program can be licensed. A server is a physical computer that is comprised of processing units, memory, and input/output capabilities and that executes requested procedures, commands, or applications for one or more users or client devices. Where racks, blade enclosures, or other similar equipment is being employed, each separable physical device (for example, a blade or a rack-mounted device) that has the required components is considered itself a separate server. A virtual server is either a virtual computer created by partitioning the resources available to a physical server or an unpartitioned physical server. Licensee must obtain Virtual Server entitlements for each virtual server made available to the program, regardless of the number of processor cores in the virtual server or the number of copies of the program on the virtual server.

### Resource Value Unit (RVU)

RVU is the unit of measure by which this program is licensed. RVU entitlements are based on the quantity of a specific designated measurement for the given program. A PoE must be obtained for the appropriate number of RVUs required for your environment as defined by the specific program terms. The RVU entitlements are specific to the program and may include, but are not limited to the following: client devices, data source records, messages, and servers, and may not be exchanged, interchanged, or aggregated with RVU entitlements of another program. To understand these benefits of RVU licensing, and to determine how many RVUs to obtain for the program, contact your IBM representative.

### Cross-platform products

---

#### ***Cross-platform products for use on System z***

Order the part numbers that follow when the product is used for either the development of code that will be deployed on System z servers or when the product will be communicating or transferring data between a distributed server and a System z server. Otherwise, order from the other set of part numbers in

this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement

## Terms and conditions

---

The terms and conditions are unchanged for IBM FileNet Content Manager V5.2, IBM Content Foundation V5.2, and IBM Case Foundation V5.2 as previously announced in Software Announcements [213-053](#), dated March 12, 2013 , [213-257](#), dated June 11, 2013 , and [213-041](#), dated March 12, 2013 .

---

## IBM Electronic Services

---

Electronic Service Agent™ and the IBM Electronic Support web portal are dedicated to providing fast, exceptional support to IBM Systems customers. The IBM Electronic Service Agent tool is a no-additional-charge tool that proactively monitors and reports hardware events, such as system errors, performance issues, and inventory. The Electronic Service Agent tool can help you stay focused on your company's strategic business initiatives, save time, and spend less effort managing day-to-day IT maintenance issues. Servers enabled with this tool can be monitored remotely around the clock by IBM Support all at no additional cost to you.

Now integrated into the base operating system of AIX® 5.3, AIX 6.1, and AIX 7.1, Electronic Service Agent is designed to automatically and electronically report system failures and utilization issues to IBM , which can result in faster problem resolution and increased availability. System configuration and inventory information collected by the Electronic Service Agent tool also can be viewed on the secure Electronic Support web portal, and used to improve problem determination and resolution by you and the IBM support team. To access the tool main menu, simply type "smitty esa\_main", and select "Configure Electronic Service Agent ." In addition, ESA now includes a powerful Web user interface, giving the administrator easy access to status, tool settings, problem information, and filters. For more

information and documentation on how to configure and use Electronic Service Agent , refer to

<http://www.ibm.com/support/electronic>

The IBM Electronic Support portal is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. This portal enables you to gain easier access to IBM resources for assistance in resolving technical problems. The My Systems and Premium Search functions make it even easier for Electronic Service Agent tool-enabled customers to track system inventory and find pertinent fixes.

## **Benefits**

**Increased uptime** The Electronic Service Agent tool is designed to enhance the Warranty or Maintenance Agreement by providing faster hardware error reporting and uploading system information to IBM Support. This can translate to less wasted time monitoring the "symptoms," diagnosing the error, and manually calling IBM Support to open a problem record. Its 24 x 7 monitoring and reporting mean no more dependence on human intervention or off-hours customer personnel when errors are encountered in the middle of the night.

## **Security**

The Electronic Service Agent tool is designed to be secure in monitoring, reporting, and storing the data at IBM . The Electronic Service Agent tool securely transmits either via the Internet (HTTPS or VPN) or modem, and can be configured to communicate securely through gateways to provide customers a single point of exit from their site. Communication is one way. Activating Electronic Service Agent does not enable IBM to call into a customer's system. System inventory information is stored in a secure database, which is protected behind IBM firewalls. It is viewable only by the customer and IBM . The customer's business applications or business data is never transmitted to IBM .

## **More accurate reporting**

Since system information and error logs are automatically uploaded to the IBM Support center in conjunction with the service request, customers are not required to find and send system information, decreasing the risk of misreported or misdiagnosed errors. Once inside IBM , problem error data is run through a data knowledge management system and knowledge articles are appended to the problem record.

## **Customized support**

Using the IBM ID entered during activation, customers can view system and support information in the "My Systems" and "Premium Search" sections of the Electronic Support Web site at

<http://www.ibm.com/support/electronic>

My Systems provides valuable reports of installed hardware and software using information collected from the systems by Electronic Service Agent . Reports are available for any system associated with the customer's IBM ID. Premium Search combines the function of search and the value of Electronic Service Agent information, providing advanced search of the technical support knowledgebase. Using Premium Search and the Electronic Service Agent information that has been collected from your system, customers are able to see search results that apply specifically to their systems.

For more information on how to utilize the power of IBM Electronic Services, contact your IBM Systems Services Representative, or visit

<http://www.ibm.com/support/electronic>
