At a glance

IBM® Security AppScan® V9.0 delivers new enhancements:

Security AppScan Enterprise supports and manages an application security program, which allows clients to:

- Classify and prioritize application assets based on business impact.
- Establish application security assessment processes and policies.
- Identify areas of highest risk and prioritize remediation.
- Measure and communicate application security status to stakeholders.

Security AppScan Source V9.0 extends mobile application security capabilities by providing:

- Integration with IBM Worklight® and the ability to import Worklight projects.
- Enhanced JavaScript™ analysis, that includes improved performance and additional language and framework support.
- Support for the latest Apple mobile technologies, which include iOS 7, Xcode 5, and Mac OS 10.9.
- Analysis support for hybrid mobile applications.

Security AppScan Standard V9.0 provides:

- Extension of support for interactive application security testing (glass box) to Microsoft™.NET applications.
- An updated login management view of the configuration dialog box to enable more efficient session.

For ordering, contact Your IBM representative or an IBM Business Partner. For more information contact the Americas Call Centers at 800-IBM-CALL (426-2255). Reference: YE001

Security AppScan V9.0 application security portfolio continues to deliver on static, dynamic, and interactive application security testing. Security AppScan portfolio provides a platform for centrally managing application security testing and risk management as critical elements of application lifecycle management.

New in Version 9.0

Security AppScan Standard V9.0

Security AppScan Standard provides:

- An extension of support for interactive application security testing (glass box) to Microsoft .NET applications.
- An updated login management view of the configuration dialog box to enable more efficient session management, such as:
 - Action-based login, which reproduces the user's actual actions in the browser, rather than just the requests, is now exposed in the user interface. You can watch the sequence replayed in the browser.
 - The login sequence is recorded in two forms, action-based (user clicks) and request-based, both of which you can manage through the updated details tab.
 - The new Validate feature replays the login sequence live, tracks cookies, detects the in-session pattern in the final response, and greatly improves in-session maintenance during the scan.

Security AppScan Enterprise V9.0

Security AppScan Enterprise supports and manages an application security program, which allows you to:

- Classify and prioritize application assets that are based on business impact.
- Establish application security assessment processes and policies.
- Identify areas of highest risk and prioritize remediation.
- Measure and communicate application security status to stakeholders.

Security AppScan Source

Security AppScan Source V9.0 provides:

- Enhanced JavaScript analysis, which includes improved performance and additional language and framework support, which includes support for Cordova, HTML5, JQuery, and JQuery Mobile
- Integration with IBM Worklight
 - The ability to import and scan Worklight projects
 - A unified, Eclipse-based, plug-in IDE for Worklight and AppScan Source
 - Analysis support for Hybrid applications (HTML/JavaScript and native) and Native applications (Java/Android and Objective-C/iOS)
- Stand-alone operational mode for AppScan Source for Development. Does not require a connection to AppScan Enterprise Server.)
- Apple Mac OS support for AppScan Source for Development.
- Support for the latest Apple mobile technologies that include iOS 7, Xcode 5, and Mac OS 10.9.
- Floating license option for AppScan Source for Automation.
- Improved installation instructions and workflow that includes new single installer for plug-in and full product and a simplified installation for the plug-in products.

Key prerequisites

IBM Security AppScan V9.0 runs on Macintosh and Linux™ operating systems.

For details, refer to the [Hardware requirements](#) and [Software requirements](#) sections.

Planned availability date

- March 28, 2014: For electronic availability
- April 25, 2014: For media availability

Description

Software runs business. From the application that manages temperature in a nuclear power plant to the website that drives and collects all incoming business and reservations, there is one commonality to business success -- the ability for those applications to function correctly. The most efficient way to stay ahead of application security vulnerabilities is to build software securely, from the ground up. The challenge is that many organizations do not know how to design and implement secure applications. The majority of developers are not security experts, and secure coding is historically not identified as a priority. As a result, web-based and nonweb-based applications continue to be deployed with vulnerabilities that put sensitive data at risk of a breach.

There is a better way. Because the onerous task of vulnerability identification and remediation cannot be successfully addressed by limited IT security resources, one success path is to engage development in the process of application security by providing tools that fit into the existing environment and workflow. These tools should generate results in a way that is easily understood by all stakeholders: development, security and audit personnel, business owners, and executives. The Security AppScan portfolio provides offerings that support and enhance application security testing across the full application lifecycle.

Security AppScan V9.0 is a leading application security test suite designed to help manageability testing throughout the software development lifecycle. AppScan offers a time-saving solution for all types of security testing: outsourced, individual, and enterprise-wide analysis, and for all types of users including application developers, build managers, quality assurance (QA) teams, penetration testers, security auditors, and senior management.

The Security AppScan portfolio includes offerings that are used to test all aspects of the application portfolio at any size organization, whether it involves live applications or source code. AppScan validates findings and prioritizes reported results so remediation time is reduced. Reports include issuing advisories and advanced fix recommendations designed to educate and help developers and security auditors remediate the identified vulnerabilities.

Security AppScan offerings

Security AppScan Standard is a desktop solution that utilizes Interactive Application Security Testing (IAST) and Dynamic Application Security Testing (DAST). The patent-pending glass box feature in IBM Security AppScan Standard provides IAST through run-time analysis - an automated method of combining static and dynamic techniques in real time to improve the accuracy of test results. Benefits of glass box, or interactive testing, include more accurate test results, identification of new threat categories, and the ability to pinpoint specific lines of code and details that facilitate remediation.

Security AppScan Enterprise is an enterprise-class solution for application security testing and risk management. Security AppScan Enterprise provides robust

capabilities for governance and facilitates collaboration between development, quality assurance, and security teams across the organization. It centrally manages dynamic, static, and interactive security assessments. It provides enterprise metrics and trending for monitoring application security program progress. It also integrates with Security QRadar® to incorporate application vulnerability data into overall security intelligence.

Security AppScan Source analyzes source code during the development and build stages of the application lifecycle to identify security vulnerabilities with Static Application Security Testing (SAST) and integrates security testing with the software development processes and systems. Security AppScan Source supports secure mobile application development with testing for native Apple iOS (Objective-C) and Android (Java™) applications.

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) containing details on accessibility compliance can be requested at

http://www.ibm.com/able/product_accessibility/index.html

Section 508 of the US Rehabilitation Act

IBM logoed offerings where all components and products, including any third party products, are IBM licensed and warranted should respond to the Section 508 question in this announcement as follows:

Security AppScan Standard 9.0 is capable as of March 28, 2014, when used in accordance with associated IBM documentation, of satisfying the applicable requirements of Section 508 of the Rehabilitation Act, provided that any assistive technology used with the product properly interoperates with it. A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested on the following website

http://www.ibm.com/able/product_accessibility/index.html

Publications

The publication, IBM Security AppScan Enterprise 9.0 Planning and Installation Guide (GC14-7268-13) is shipped with Security AppScan Enterprise V9.0. It can also be found, at electronic availability at the below IBM Publication Center.

Other online relevant documentation is available, at electronic availability, at

http://www-01.ibm.com/support/knowledgecenter/SSW2NF_9.0.0/com.ibm.ase.help.doc/helpind_ex_ase.html

The following PDF publications are shipped with Security AppScan Standard V9.0:

- IBM Security AppScan Standard 9.0 Getting Started Guide
- IBM Security AppScan Standard 9.0 Glass Box User Guide for Java platforms
- IBM Security AppScan Standard 9.0 Glass Box User Guide for .NET platforms
- IBM Security AppScan Standard PowerTools Version 8.6: Authentication Tester User Guide (unchanged since AppScan Standard V8.6)
- IBM Security AppScan Standard PowerTools Version 8.6: Token Analyzer User Guide (unchanged since AppScan Standard V8.6)

The following CHM (HTML Help) documentation is shipped with Security AppScan Standard V9.0:

- IBM Security AppScan 9.0 Online Help
- IBM Security AppScan Standard PowerTools Version 8.6: Authentication Tester Online Help
- IBM Security AppScan Standard PowerTools Version 8.6: Connection Test Online Help
- IBM Security AppScan Standard PowerTools Version 8.6: EncodeDecode Online Help
- IBM Security AppScan Standard PowerTools Version 8.6: Expression Test Online Help
- IBM Security AppScan Standard PowerTools Version 8.6: HTTP Request Editor Online Help
- IBM Security AppScan Standard PowerTools Version 8.6: Token Analyzer Online Help

The following PDF publications can be found, at electronic availability, at the below IBM Publication Center:

- IBM Security AppScan Standard 9.0 Getting Started Guide (SC27-6510)
- IBM Security AppScan Standard 9.0 User Guide (GI13-2874)
- IBM Security AppScan Standard 9.0 Glass Box User Guide for Java platforms (SC27-6520)
- IBM Security AppScan Standard 9.0 Glass Box User Guide for .NET platforms (SC27-6530)

These documents, and other online, relevant documentation are listed in the Security AppScan Standard Publications library at

<http://www.ibm.com/support/docview.wss?uid=swg27024868>

The following publications are shipped with Security AppScan Source V9.0:

- IBM Security AppScan Source for Analysis User Guide
- IBM Security AppScan Source Installation and Administration Guide
- IBM Security AppScan Source Utilities User Guide

These documents and other relevant, online documentation are available, at electronic availability, at

http://www.ibm.com/support/knowledgecenter/SSS9LM_9.0.0/com.ibm.rational.appscansrc.security.doc/helpindex.html

The IBM Publications Center is available at

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the US) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries, free of charge.

Technical information

Specified operating environment

Hardware requirements

Security AppScan Source V9.0

- Disk space: Approximately 3 GB of available hard disk space (4 GB required for installation)
- Media drive: CD-ROM or DVD-ROM drive
- Memory: 2 GB of RAM (minimum); 8G of RAM or more recommended
- Processor: Two CPU

For current information about Security AppScan Source 9.0 hardware requirements, at electronic availability, refer to

<http://www.ibm.com/support/docview.wss?uid=swg27027486>

Security AppScan Enterprise V9.0

This configuration supports an average-sized deployment of three to four Dynamic Analysis Scanners (two concurrent scan jobs per scanner). Larger deployments or loads may require more resources.

- Disk space:
 - Approximately 200 GB for the AppScan Enterprise Server and Jazz™ Team Server
 - Approximately 500 GB of free space for scan logs on the Dynamic Analysis Scanner
 - Approximately 1 TB of free space on the system hosting the SQL Server database
 - Approximately 330 MB for the Web Services Explorer - Generic Service Client tool (GSC) version 8.1 used to test Web Services for security vulnerabilities
- Memory:
 - 16 GB of RAM (minimum) or more recommended for SQLServer database and Dynamic Analysis Scanner
 - 8 GB of RAM or more recommended AppScan Enterprise Server and Jazz Team Server
- Processor
 - Four CPU recommended for SQL Server database and Dynamic Analysis Scanner
 - Two CPU recommended for AppScan Enterprise Server and Jazz Team Server

For current information about Security AppScan Enterprise 9.0 hardware requirements, at electronic availability, refer to

<http://www.ibm.com/support/docview.wss?uid=swg27027541>

Security AppScan Standard V9.0

- Disk space: Approximately 30 GB of available hard disk space
- Memory: 3 GB of RAM or more recommended
- NIC network driver: 1 NIC 100 Mbps for network communication with configured TCP/IP
- Processor: Core 2 Duo 2 GHz (or equivalent)

For current information about Security AppScan Standard 9.0 hardware requirements, at electronic availability, refer to

<http://www.ibm.com/support/docview.wss?uid=swg27024155>

Software requirements

Security AppScan Source V9.0

For Security AppScan Source software requirements, access

<http://www.ibm.com/support/docview.wss?uid=swg27027486>

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM.

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM,

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

IBM Electronic Support

The IBM Support Portal is your gateway to technical support. This includes IBM Electronic Support tools and resources, for software and hardware, to help save time and simplify support. The Electronic Support tools can help you find answers to questions, download fixes, troubleshoot, automate data collection, submit and track problems through the Service Request online tool, and build skills. All these tools are made available through your IBM support agreement, at no additional charge. Read about the Electronic Support portfolio of tools

<http://ibm.com/electronicssupport>

Access the IBM Support Portal

<http://ibm.com/support>

Access the online Service Request tool

<http://ibm.com/support/servicerequest>

Planning information

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express®. Product upgrades and technical support are provided by the Software Subscription and Support (Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (Software Maintenance) can be extended by the purchase of a renewal option, if available.

Packaging

Security AppScan is distributed with:

- International Program License Agreement (Z125-3301)
- License Information document
- DVDs
- Publications (refer to the [Publications](#) section)

This program, when downloaded from a website, contains the applicable IBM license agreement and License Information, if appropriate, and will be presented for acceptance at the time of installation of the program. For future reference, the license and License Information will be stored in a directory such as LICENSE.TXT.

Software Services

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of our lab-based, software services team and the business consulting, project management, and infrastructure expertise of our IBM Global Services team. Also, we extend our IBM Software Services reach through IBM Business Partners to provide an extensive portfolio of capabilities. Together, we provide the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

Authorized User Single Install

Authorized User Single Install is a unit of measure by which the program can be licensed. An Authorized User is a unique person who is given access to the program. The program may be installed on any number of computers or servers and each Authorized User may have simultaneous access to any number of instances of the program at one time. Licensee must obtain separate, dedicated entitlements for each Authorized User given access to the program in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means. An entitlement for an Authorized User Single Install is unique to that Authorized User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person.

Note: Some programs may be licensed where devices are considered users. In that case, the following applies. Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate user of the program and requires an entitlement as if that device were a person.

Floating User Single Install

Floating User Single Install is a unit of measure by which the program can be licensed. A Floating User Single Install is a person who is accessing the program at any particular point in time. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. The program may be installed on any number of computers or servers, but if the Floating User simultaneously accesses more than one install of the program, the Floating User requires a separate entitlements for each such install. Licensee must obtain separate entitlements for each Floating User simultaneously accessing the program on each install in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means.

Note: Some programs may be licensed where devices are considered users. In that case, the following applies. Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate user of the program and requires an entitlement as if that device were a person.

Install

Install is a unit of measure by which the program can be licensed. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each install of the program.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

This product is only available via Passport Advantage.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

These programs are licensed under the IBM Program License Agreement (IPLA) and the associated Agreement for Acquisition of Software Maintenance, which provide for support with ongoing access to releases and versions of the program. IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available. These programs have a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

License Information number

IBM Security AppScan Standard V9.0 (L-KKHS-9E3P6Q)
IBM Security AppScan Enterprise V9.0 (L-KKHS-9E3PCG)
IBM Security AppScan Enterprise Dynamic Scanner V9.0 (L-KKHS-9E3PEK)
IBM Security AppScan Source V9.0 (L-NLII-9DNMDR)

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge.

For further information, consult the *IBM Software Support Handbook* found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Subscription and Support (Software Maintenance) also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

Software Subscription and Support applies

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and Technical Support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week.

For additional details, consult your *IBM Software Support Handbook* at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

System i® Software Maintenance applies

No

Variable charges apply

No

Educational allowance available

Not applicable.

Statement of good security practices

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

IBM Electronic Services

Electronic Service Agent™ and the IBM Electronic Support web portal are dedicated to providing fast, exceptional support to IBM Systems customers. The IBM Electronic Service Agent tool is a no-additional-charge tool that proactively monitors and reports hardware events, such as system errors, performance issues, and inventory. The Electronic Service Agent tool can help you stay focused on your company's strategic business initiatives, save time, and spend less effort managing day-to-day IT maintenance issues. Servers enabled with this tool can be monitored remotely around the clock by IBM Support, all at no additional cost to you.

Now integrated into the base operating system of AIX® V5.3, AIX V6.1, and AIX V7.1, Electronic Service Agent is designed to automatically and electronically report system failures and utilization issues to IBM, which can result in faster problem resolution and increased availability. System configuration and inventory information collected by the Electronic Service Agent tool also can be viewed on the secure Electronic Support web portal, and used to improve problem determination and resolution by you and the IBM support team. To access the tool main menu, simply type `smitty esa_main`, and select `Configure Electronic Service Agent`. In addition, ESA now includes a powerful web user interface, giving the administrator easy access to status, tool settings, problem information, and filters.

For more information and documentation on how to configure and use Electronic Service Agent, refer to

<http://www.ibm.com/support/electronic>

The IBM Electronic Support portal is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. This portal enables you to gain easier access to IBM resources for assistance in resolving technical problems. The My Systems and Premium Search functions make it even easier for Electronic Service Agent tool-enabled customers to track system inventory and find pertinent fixes.

Benefits

Increased uptime: The Electronic Service Agent tool is designed to enhance the Warranty or Maintenance Agreement by providing faster hardware error reporting and uploading system information to IBM Support. This can translate to less wasted time monitoring the symptoms, diagnosing the error, and manually calling IBM Support to open a problem record. Its 24x7 monitoring and reporting mean no more dependence on human intervention or off-hours customer personnel when errors are encountered in the middle of the night.

Security: The Electronic Service Agent tool is designed to be secure in monitoring, reporting, and storing the data at IBM. The Electronic Service Agent tool securely transmits via either the Internet (HTTPS or VPN) or modem, and can be configured to communicate securely through gateways to provide you a single point of exit from your site. Communication is one way. Activating Electronic Service Agent does not enable IBM to call into your system. System inventory information is stored in a secure database, which is protected behind IBM firewalls. It is viewable only by you and IBM. Your business applications or business data is never transmitted to IBM.

More accurate reporting: Because system information and error logs are automatically uploaded to the IBM Support center in conjunction with the service request, you are not required to find and send system information, decreasing the risk of misreported or misdiagnosed errors. Once inside IBM, problem error data is run through a data knowledge management system and knowledge articles are appended to the problem record.

Customized support: Using the IBM ID entered during activation, you can view system and support information in the My Systems and Premium Search sections of the Electronic Support website at

<http://www.ibm.com/support/electronic>

My Systems provides valuable reports of installed hardware and software using information collected from the systems by Electronic Service Agent. Reports are available for any system associated with your IBM ID. Premium Search combines the function of search and the value of Electronic Service Agent information, providing advanced search of the technical support knowledgebase. Using Premium Search and the Electronic Service Agent information that has been collected from your system, you are able to see search results that apply specifically to your systems.

For more information on how to utilize the power of IBM Electronic Services, contact your IBM Systems Services Representative, or visit

<http://www.ibm.com/support/electronic>

Prices

Business Partner information

If you are an IBM Business Partner -- Distributor for Workstation Software acquiring products from IBM, you may link to Passport Advantage Online for resellers where

you can obtain Business Partner pricing information. An IBM ID and password are required.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, permits accelerated implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified customers.

For more financing information, visit

<http://www.ibm.com/financing>
