[4 Replacement program information](#)

Withdrawn programs

To more strongly encourage the adoption of the technology of Rational® Open Access: RPG Edition and, thereby, enhance the value of the IBM® i platform and the RPG language, IBM is removing the additional license entitlement requirement for Rational Open Access: RPG Edition for customers of IBM i and IBM Rational Development Studio for i. IBM i 6.1 and 7.1 Program Temporary Fixes (PTFs) will be available within two weeks after January 31, 2012, to enable Open Access: RPG Edition applications to run in the absence of a Rational Open Access runtime license, and to move the technology of Open Access: RPG Edition into Rational Development Studio for i.

- A PTF for the RPG runtime function that checks for the 5733-OAR license: With the PTF, the function will not check for the 5733-OAR license, but instead simply return the value that indicates that the license is valid.
- A PTF for the RPG compiler: With the PTF, the compiler will not generate a call to the RPG runtime license-checking function as part of the generated code for opening an Open Access file.
- A PTF to make the QOAR library part of the Rational Development Studio for i product: For customers who do not already have 5733-OAR, it will be necessary to apply this PTF to obtain the include files that are used for developing handlers. For customers who already have 5733-OAR, it will not be necessary to apply this PTF. However, any further updates or fixes to the include files will only be available through additional PTFs for the compiler product 57xx-WDS. 5733-OAR will have to be removed from the system before the PTF is applied.

The removal of the license requirement does not affect the supported lifetime of the technology of Open Access: RPG Edition. This technology will continue to be supported as part of the IBM i operating system (RPG runtime) and the ILE RPG compiler, currently 6.1 and 7.1. Rational Open Access: RPG Edition customers will renew their Software Maintenance agreement under the IBM i Software Maintenance agreement.

Effective May 8, 2012, IBM will withdraw from marketing programs and features licensed under the IBM International Program License Agreement.

Program number	VRM	Program name
5733-OAR	1.1.0	IBM Rational Open Access: RPG Edition
5733-OAR	1.1.1	IBM Rational Open Access: RPG Edition

On or after that date, you can no longer purchase this program, either directly from IBM or IBM Remarketers. However, as of February 1, 2012, running an ILE RPG program using an Open Access file will be available, at no additional charge, to everyone who is licensed to use the IBM i 6.1 and 7.1. Also, compiling an ILE RPG program using an Open Access file will be available, at no additional charge, to everyone who is licensed to use the ILE compilers feature of either IBM Rational Development Studio for i 7.1 or IBM WebSphere® Development Studio for i 6.1.

Effective May 8, 2012, the following programs and features will be withdrawn:
