## Overview

---

IBM Lotus Notes® and Domino® 8 software continues to extend IBM Lotus® software leadership in messaging and collaboration with an intuitive user interface, powerful new functionality, and new tools for getting things done. Built on a new Eclipse-based architecture, Lotus Notes and Domino 8 software offers a modern, Web-like look and feel in a familiar Lotus Notes format, which presents the tools you need, when and where you need them. Lotus Notes and Domino 8 software includes integrated office productivity tools for word processing, spreadsheets, and presentations. Organizations can also use Lotus Notes® and Domino 8 software to quickly assemble components into customized, integrated applications — also called composite applications — without writing extensive code.

With increased ease of deploying, upgrading, and administering the product, Lotus shows once again the investment and continued innovation they are making with their flagship product, all with a focus on addressing the total cost of ownership.

New features that make this the most powerful release of Lotus Notes and Domino ever:

- "Open" button for fast access to most often used applications.
- Conversation mode that lets you gather and review e-mail threads based on subject headers.
- Sidebar that displays critical information and alerts including IBM Lotus Sametime® 7.5.1 contacts, day-at-a-glance, RSS, and ATOM Feeds.
- Context sensitive toolbars and customizable view preferences.
- Omnipresent search center for e-mail, calendar, the Web, and your desktop.
- Support for activity-centric computing.
- Word processing, spreadsheets, and presentation applications, which support OpenDocument Format (ODF), Microsoft™ Office, and IBM Lotus SmartSuite® file formats.
- Ability to export documents to Adobe Portable Document Format

(PDF).

- Collaboration history that lets you search and view your collaboration history with specific people.
- Server-managed provisioning
- Cross-platform support for both client and server.
- Multi-directory integration improvements provided through limited entitlement to IBM Tivoli® Directory Integrator that accompanies Lotus Domino 8 software.
- Mail recall and new cluster replication technology that helps improve replication performance and can reduce network usage.

Users will benefit from interface changes that make their experience more consistent and thus can help make them more effective and productive. Feature enhancements such as in-line spell checking, type ahead addressing, e-mail "conversation threading," and numerous other changes to mail, calendaring, and contact management will result in enhanced user benefits.

With a myriad of product enhancements, Lotus Notes and Domino 8 software delivers an industry-leading user experience, breakthrough applications delivery capabilities, and significantly expanded product capabilities.

---

## Key prerequisites

---

Refer to the Hardware requirements and Software requirements sections.

### Planned availability dates

#### Electronic software delivery:

- August 17, 2007: English
- September 10, 2007: Japanese
- September 19, 2007: French, Spanish, Italian, German, Portuguese-Brazilian, Korean, Chinese - Traditional and Simplified, Danish, Swedish, Norwegian, Dutch, Finnish
- January 23, 2008: Portuguese, Russian, Hebrew, Arabic, Hungarian, Greek, Turkish, Czech, Polish
- April 2, 2008: Catalan, Slovenian, Slovakian, Thai

#### Physical media and documentation:

- September 21, 2007: English
- October 26, 2007: French, Spanish, Italian, German, Portuguese-Brazilian, Japanese, Korean, Chinese - Traditional and Simplified, Danish, Swedish, Norwegian, Dutch, Finnish
- February 29, 2008: Portuguese, Russian, Hebrew, Arabic, Hungarian, Greek, Turkish, Czech, Polish
- May 2, 2008: Catalan, Slovenian, Slovakian, Thai

Specific national language version details for physical media are listed in the Availability of national languages section of the announcement letter.

---

## Description

---

IBM Lotus Notes and Domino 8 software continues to extend IBM Lotus software leadership in messaging and collaboration with an intuitive user interface, powerful new functionality, and new tools for getting things accomplished. Lotus Notes 8 offers a modern look and feel in a familiar Lotus Notes format, which presents the tools you need, when and where you need them.

Lotus Notes 8 introduces a client side architecture based on the Eclipse framework. This delivers the capability to run Eclipse-based code within the Lotus Notes rich client. Eclipse plug-ins can be used in the Lotus Notes sidebar or can be wired together with Lotus Notes applications as a composite application, to provide quick access to your business information in one view. You can also extend the client program, for example, adding search engines to the current list and customizing the user interface (UI).

With Lotus Notes 8 users will also receive a set of IBM productivity tools. These tools allow for creation of word processing, spreadsheet, and presentation graphics files that are compatible with Open Document Format (ODF) and other commonly used formats.

IBM Lotus Domino 8, the next installment of the security-rich messaging and collaboration platform, includes improvements in performance, administration, serviceability, and, in most cases, total cost of ownership (TCO).

IBM Lotus Domino server software combines reliable, security-rich e-mail, calendar, and scheduling capabilities with a powerful platform for business collaboration. It offers solutions for messaging, customized business applications — or both — on a wide variety of operating systems. Lotus Domino, in combination with the rich Lotus Notes client, helps enhance employee productivity, streamlines business processes, and improve overall business responsiveness.

IBM Lotus Domino 8 supports an open application infrastructure. This new version will enable you to deploy composite applications in Lotus Notes 8 and extend Web services support, including:

- IBM Lotus Domino support for composite applications, including the ability to provision composite applications
- Web services consumer support, which allows Lotus Domino applications to call other Web services

With improved manageability and security features, Lotus Domino 8 builds on its position as the industry-leading collaboration server software in flexibility, security features, and integrated messaging and collaboration. A few highlights are:

- Numerous improvements in Lotus Domino domain monitoring, including additional event probes and corrective actions
- Integration with Tivoli Enterprise™ Console software
- Improved AdminP performance and management to increase rename speed
- Policy management of inbox cleanup to help manage inbox sizes
- Ability to prevent access to Internet password fields in the Lotus Domino directory
- Internet account lockout due to password entry failure
- Support for Red Hat Linux™ 5
- Use of IBM DB2® data store on selected server platforms as an alternative to traditional .NSF, enabling relational database access and queries

There is also improved performance and scalability, such as:

- Brand new cluster replication implementation that can significantly improve performance and reduce I/O requirements and latency
- "Build on first use" sort order feature that can significantly improve server performance, and help reduce storage costs and I/O requirements
- Numerous additional performance and I/O reduction improvements

New features of IBM Lotus Enterprise Integrator™ 8 include:

- Virtual fields key synchronization: Virtual fields activity keys can now be automatically synchronized on a periodic basis based on a background process.
- Virtual documents update event synchronization: Virtual Documents activities that are synchronizing update events in an external system can now do this when using external keys. With this functionality, all external events, (create, update, and delete) can now use either the internal or external key approach for virtual documents.
- Lotus Connector automatically detects the external systems codepage where the RDBMS client supports it. This allows users to have a single Lotus Enterprise Integrator server talking to the different backend using different codepages for each connection. The RDBMS clients that support this are Oracle and SAP applications.
- Improved diagnostic capabilities over previous versions of Lotus Enterprise Integrator.

#### IBM Lotus Domino Designer® 8

Lotus Notes and Domino provide a high productivity application development environment that supports the rapid creation, modification, and deployment of security-rich business applications. Domino applications can be accessed using numerous methods, including Web service consumers, Lotus Notes, and Web browsers. Lotus Domino Designer 8 includes multiple new features and functions that enable developers to provide more value through Lotus Notes and Domino applications, and support services oriented architecture.

Lotus Notes and Domino 8 introduce native Web service consumer support, allowing developers to reuse functions from other IT systems and even from publicly available Web services. Lotus Domino 8 and Lotus Domino Designer 8 also refine the native Web service provider support first introduced in Domino 7, providing developers with more options for custom coded Web service providers that allow other systems to make use of Domino data and business logic.

Developers have new relational data options when Lotus Domino 8 is configured to use IBM DB2 as an alternative data store to NSF. Lotus Domino Designer 8 supports this new feature allowing developers to expose selected Lotus Domino data as relational data and to use Structured Query Language (SQL) to build a Lotus Domino view that can combine Lotus Domino data, DB2 data, and DB2 federated data.

Lotus Domino Designer 8 also provides entitlement to Lotus Component Designer, allowing developers to use their skills to build components and applications for IBM WebSphere® Portal. Lotus Domino Enterprise server provides a limited entitlement to WebSphere Portal, allowing you new options to exploit assets running on different platforms and servers, with access through Web browsers or Lotus Notes 8 clients.

#### IBM Lotus Domino Web Access 8.0

IBM Lotus Domino Web Access 8.0 introduces an improved user interface that better aligns with the increased intuitive experience of IBM Lotus Notes 8.

Some of the new features

- Greater synergy with Lotus Notes client experience.
- Integration with WebSphere Portal enhancements.
- Dynamic view column updates.
- Feed-enabled mail files (RSS/ATOM).
- Calendar filtering.
- Lotus Notes and Internet password management improvements.
- Default location for resources.
- Calendar delegation improvements.
- Preview Pane.
- AJAX is leveraged in order to deliver a rich user experience that extends to both an online and offline connection.
- IBM WebSphere Portal software enhanced integration.

Users benefit from greater tools to assist them in being more productive. With the enhancements

within this release, Domino Web Access solidifies its position as a complimentary Web browser option to Lotus Notes software.

### **Accessibility by people with disabilities**

---

IBM strives to provide accessible solutions for customers with disabilities and where full accessibility is not met, customers are advised on workable alternatives, where possible, to meet their needs.

### **Section 508 of the U.S. Rehabilitation Act**

---

IBM makes no representation about the Section 508 status of the third-party electronic and information technology product in this offering. Contact the vendor for specific, current information on the Section 508 status of this product.

### **IPLA and Subscription and Support considerations**

IPLA licenses can be transferred from one machine to another within, but not limited to an enterprise. You may aggregate the capacity for all the processors the product is operated on to achieve a more economic price. This will result in a single Proof of Entitlement (PoE). It is your responsibility to manage the distribution of Value Units within the limits of the entitlement of the product license.

Subscription and Support must cover the same capacity as the product license entitlement. Subscription and Support will be available in the country in which the agreement is made.

---

## **Statement of direction**

---

Since 1989, IBM Lotus has delivered product upgrades that enable seamless backward and forward compatibility. The next generation of innovations in IBM Lotus Notes and Domino software continues to support the same platforms today. Lotus Notes and Domino software, in previous releases, embraced Web services, improved server performance, created seamless SAP software integration, offered 64-bit OS compatibility, and delivered on a new Linux client. With this latest release, V8, Lotus is embracing Eclipse technology, modernizing the Lotus Notes user interface, and providing the ability to build composite applications for Lotus Notes. We are introducing activity-centric computing, productivity tools, and enhanced portal integration.

All statements regarding IBM's plans, directions, and intent are subject to change or withdrawal without notice.

## Education support

---

IBM training provides education to support many IBM offerings. Descriptions of courses for IT professionals and managers are on the IBM training Web site

[http://www.ibm.com/services/learning/ites.wss/tp/en?pageType=tp\\_search](http://www.ibm.com/services/learning/ites.wss/tp/en?pageType=tp_search)

Call IBM training at 800-IBM-TEACH (426-8322) for catalogs, schedules, and enrollments.

Education support will be provided for the products in this announcement.

IBM Software Services for Lotus® Education provides education to support many Lotus offerings. For a complete list of offerings, visit the Web site at

<http://www.lotus.com/education>

#### Technical Skills Software Workshop

No-fee technical skills training workshops (English only) for this product are offered to customers and Business Partners to gain hands-on skills for installing, configuring, operating, and supporting this product. The workshops are ideal for customers and Business Partners who are in the process of evaluating, or have already purchased it. Workshops are modeled to be 50 to 70% hands-on labs and are continually updated to current product release.

Workshops are delivered in multiple formats, traditional classroom, self-paced (self-study) and instructor led e-learning, all formats have the same content.

Traditional classroom workshops are scheduled and delivered in-person worldwide at IBM and non-IBM locations throughout the year.

Self-paced/self-study workshops enable the student to view the workshop presentations and execute the labs on their own schedule with no travel required. The presentations have speaker

notes and allow the student full control to navigate the information. Students reserve a one week period to run the labs on a remote, supported, live environment. Support is provided through a monitored forum.

**Note:** A fast Internet connection is required.

For more details on current workshop content, schedules, and to register for any workshop format, visit

<https://www.developer.ibm.com/isv/spc/events/>

---

## Offering Information

---

Product information is available via the Offering Information Web site

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® Web site

<http://www.ibm.com/software/passportadvantage>

---

## Publications

---

No publications are shipped with these products.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

---

## Technical information

---

### Specified operating environment

---

**Hardware requirements:** For the most up to date information regarding hardware and software requirements, visit

<http://www-3.ibm.com/software/lotus/support/>

**Software requirements:** For the most up to date information regarding hardware and software requirements, visit

<http://www-3.ibm.com/software/lotus/support/>

### Planning information

---

Software Maintenance is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Maintenance offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Maintenance with each program license acquired. The initial period of Software Maintenance can be extended by the purchase of a renewal option, if available.

**Packaging:** IBM Lotus Notes® and Domino® and Lotus Enterprise Integrator™ V8.0 will be

distributed via a media package and electronic software distribution (ESD).

IBM Lotus Notes and Domino media is distributed in several specific packages based on license purchase and include the following:

- Lotus Notes and or Domino product CDs or electronic image files
- Softcopy product documentation, including README files, which is included on the product CDs or electronic image files

The License Information form numbers are:

- L-GHUS-6KVQDG for Lotus Domino
- L-GHUS-6KVQCV for Lotus Notes

IBM Lotus Enterprise Integrator media package is distributed in one package with the following:

- Lotus Enterprise Integrator product CD
- Softcopy product documentation, including README files, which is included on the product CD or electronic image files

The License Information form number is:

- L-GHUS-6G7RAD for Lotus Enterprise Integrator

These programs, when downloaded from a Web site, contain the applicable IBM license agreement and License Information, if appropriate, which will be presented for acceptance at the time of installation of the program. The license and License Information will be stored in a directory such as LICENSE.TXT for future reference.

### **Security, auditability, and control**

---

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

---

## **Ordering information**

---

This product is only available via Passport Advantage. It is not available as shrinkwrap.

### Charge metrics definitions

#### Value Unit

A Value Unit is a pricing charge metric for program license entitlements, which is based upon the quantity of a specific designated measurement used for a given program. Each program has a

designated measurement. The most commonly used designated measurement is a processor core. However, for select programs, there are other designated measurements such as users, client devices, and messages. The number of Value Unit entitlements required for a program depends on how the program is deployed in your environment and must be obtained from a Value Unit table. You must obtain a PoE for the calculated number of Value Unit entitlements for your implementation. The Value Unit entitlements are specific to a program and may not be exchanged, interchanged, or aggregated with Value Unit entitlements of another program.

### Processor (Value Unit)

A processor core is a functional unit within a computing device that interprets and executes instructions. A processor core consists of at least an instruction control unit and one or more arithmetic or logic unit. With multicore technology, each core is considered a processor. Not all processor cores require the same number of Value Unit entitlements. To calculate the number of Value Unit entitlements required, refer to the Value Unit table on the following Web site

[http://www-142.ibm.com/software/sw-lotus/services/cwepassport.nsf/wdocs/pvu\\_table\\_for\\_customers](http://www-142.ibm.com/software/sw-lotus/services/cwepassport.nsf/wdocs/pvu_table_for_customers)

With full capacity licensing, a PoE must be acquired for the appropriate number of Value Units based on all activated processor cores available for use on the server.

### Sub-capacity processor (Value Unit)

For programs eligible for sub-capacity licensing, a PoE must be acquired for the appropriate number of value units based on all activated processor cores available for use in each partition (utilizing eligible partitioning technologies) where the program runs. Refer to the International Passport Advantage Agreement Attachment for sub-capacity terms or the program's license information to determine applicable sub-capacity terms.

### Authorized user

An authorized user is one and only one individual (named or unnamed) within or outside your enterprise. A PoE must be obtained for each individual user accessing the program in any manner. A program licensed under an authorized user PoE may be installed on a single computer or server, and accessed by multiple users, provided that a PoE has been obtained for each individual user accessing the program either directly or indirectly (via a multiplexing program, device, or application server) through any means on behalf of the user.

### Sub-capacity for selected middleware products

Sub-capacity licensing on a per processor or per Value Unit basis is available for selected middleware products. To offer sub capacity licensing, IBM software products implement IBM Tivoli® License Compliance Manager within their offerings so that you can monitor and report quarterly to IBM on the use of the programs on a continuous basis.

More information can be found on the Passport Advantage Web site

<http://www.ibm.com/software/passportadvantage>

### Eligibility requirements for sub-capacity licensing

To be eligible for sub-capacity licensing terms on this product, you must agree to install and configure IBM Tivoli License Manager for IBM Software, in accordance with the IBM Tivoli License Manager publications, and to enable the collection of program use data on all eligible machines subject to sub-capacity terms.

For those machines running programs with sub capacity licensing terms, you must use IBM Tivoli License Manager for IBM Software to monitor program use and submit to IBM an IBM Use Report each calendar quarter. Multiple copies of IBM Tivoli License Manager for IBM Software or IBM Tivoli License Manager are not required. You can use more copies if you need them to support your operational environment, but only one copy is required to monitor all your sub capacity licensed products.

Additionally, if this is the first product you have licensed under sub-capacity terms, you must agree to the terms of an attachment to your Passport Advantage or Passport Advantage Express contract and submit a new Passport Advantage enrollment form. First-time sub capacity clients also have an opportunity to ensure a primary business contact is established for their contracts.

For more information on required and entitled license capacity, license requirements, and reporting, refer to Software Announcement [205-093](#), dated April 19, 2005.

If you order (this product) under sub-capacity terms, IBM Tivoli License Manager for IBM Software will be made available to you if you do not already have one. You must install and configure this tool for your sub-capacity products. Alternately, you can use Tivoli License Manager. Once the license manager software is installed, you will be required to register online (IBM may need to contact you in order to finalize the registration process.) You must monitor program use on a continuous basis with an IBM Tivoli License Manager for IBM Software and submit IBM Use Reports to IBM on a calendar quarterly basis.

IBM Tivoli License Manager for IBM Software is documented in the following customer publications, which are available from IBM Publications Center at

<http://www.elink.ibm.com/public/applications/publications/cgibin/pbi.cgi?>

Publication	Form
Planning, Installation, and Configuration	SC32-1431
Administration	SC32-1430
Problem Determination	SC32-9102
Data Dictionary	SC32-1432
Release Notes	SC32-1429

For IBM Tivoli License Manager configuration guidance and instructions for specific products (including this product) acquired with sub capacity terms, refer to

<http://www.lotus.com/sub-capacity>

The Web site will give you information about how to set up the product for detection by IBM Tivoli License Manager, any required maintenance, and any required steps that are unique to this product.

## Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

**Licensing:** IBM International Program License Agreement including the License Information document and PoE govern your use of the Program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Maintenance, previously referred to as Software Subscription and Technical Support.

#### License Information form numbers

Program name	Program number	Form number
IBM Lotus Enterprise Integrator	5724- L76	L- GHUS- 6G7RAD
IBM Lotus Notes/Domino	5724- E62	L- GHUS- 6KVQDG L- GHUS- 6KVQCV

The program's License Information will be available for review on the IBM Software License Agreement Web site

<http://www.ibm.com/software/sla/sladb.nsf>

#### Limited warranty

**Limited warranty applies:** Yes

**Warranty:** IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. Consult the IBM Software Support Guide for further information at

<http://www.ibm.com/software/support>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

**Program technical support:** Technical support of a program product will be available for a minimum of three years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates, releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

**Money-back guarantee:** If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program. For programs acquired under any of IBM's On/Off CoD software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

**Authorization for use on home/portable computer:** The program may be stored on the primary machine and another machine, provided that the program is not in active use on both machines at the same time. You may not copy and use this program on another computer without paying additional license fees.

Product name

IBM Lotus Enterprise Integrator	Yes
IBM Lotus Notes/Domino	No

### International Passport Agreement

**Passport Advantage applies:** Yes, and through the Passport Advantage Web site at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

**Agreement for Acquisition of Software Maintenance:** The following agreement applies for maintenance and does not require customer signatures:

- IBM Agreement for Acquisition of Software Maintenance (Z125-6011)

**Software Maintenance applies:** Yes. Software Maintenance is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Maintenance offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Maintenance with each program license acquired. The initial period of Software Maintenance can be extended by the purchase of a renewal option, if available.

While your Software Maintenance is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Guide at

<http://techsupport.services.ibm.com/guides/handbook.html>

Software Maintenance does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage Web site at

<http://www.ibm.com/software/passportadvantage>

### Other terms

**Volume orders (IVO):** No

**System i™ Software Maintenance applies:** No

**Educational allowance available:** Not applicable.

### On/Off CoD

To be eligible for On/Off CoD pricing, customers must be enabled for temporary capacity on the corresponding hardware, and the required contract — Z125-6907, Amendment for iSeries™ and pSeries® Temporary Capacity On Demand — Software — must be signed prior to use.

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a Web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.

### IBM Global Financing

---

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, both from IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.
