## At a glance

The enhanced IBM® Security QRadar® V7.2.2 family of products includes:

- IBM Security QRadar SIEM V7.2.2
- IBM Security QRadar Log Manager V7.2.2
- IBM Security QRadar Network Anomaly Detection V7.2.2
- IBM Security QRadar Risk Manager V7.2.2
- IBM Security QRadar Vulnerability Manager V7.2.2
- IBM Security QRadar Packet Capture V7.2.2
- IBM Security QRadar Incident Forensics V7.2.2
- IBM Security QRadar Data Node V7.2.2

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL (Reference: YE001).

## Overview

IBM Security QRadar V7.2.2 family of products provides a security intelligence platform that integrates disparate functions including SIEM, log management, configuration monitoring, network behavior anomaly detection, risk management, vulnerability management, network vulnerability scanning, full packet capture and incident forensics into a comprehensive intelligence solution.

IBM Security QRadar V7.2.2 delivers a set of new capabilities in the IBM Security QRadar SIEM, IBM Security Log Manager, IBM Security Risk Manager, and IBM Security Vulnerability Manager products.

IBM Security QRadar Incident Forensics V7.2.2 is a new QRadar offering that provides the ability to use packet data and import other content to enable intuitive forensics investigations of security incidents. The technology offers search-driven data exploration, session reconstruction, and forensics intelligence to assist security incident investigations. It is available as a software option, virtual appliance, and appliance form factor.

IBM Security QRadar Packet Capture V7.2.2 is a new QRadar offering that provides packet capture and recording capability that can integrate with the QRadar product family and is available as an appliance.

IBM Security QRadar Data Node is a new offering that enables you to more easily expand the storage and query performance of your IBM Security QRadar SIEM Event Processor 17XX and IBM Security QRadar SIEM Flow Processor 16XX appliances. QRadar Data Node is available as a software, virtual, or hardware appliance.

Refer to the [Description](#) section for details on new capabilities.

---

## Key prerequisites

---

For details, refer to the [Hardware requirements](#) and [Software requirements](#) sections.

---

## Planned availability date

---

April 25, 2014: For electronic, media, and appliance availability except appliance availability for IBM Security QRadar QFLOW Collector 1202 G2 (5725-Q92), IBM Security QRadar QFLOW Collector 1301 G2 (5725-Q63), and except electronic, media, and appliance availability for IBM Security QRadar Incident Forensics and Packet Capture

May 16, 2014: Electronic, media, and appliance availability for IBM Security QRadar Incident Forensics and Packet Capture

May 23, 2014: Appliance availability for IBM Security QRadar QFLOW Collector 1202 G2 (5725-Q92) and IBM Security QRadar QFLOW Collector 1301 G2 (5725-Q63)

---

## Description

---

### New in IBM Security QRadar V7.2.2

IBM Security QRadar V7.2.2 provides a set of new capabilities in the IBM Security QRadar SIEM, IBM Security QRadar Log Manager, IBM Security QRadar Risk Manager, and IBM Security QRadar Vulnerability Manager product families.

- IBM Security QRadar Packet Capture V7.2.2 is a new QRadar offering that provides packet capture (PCAP) and recording capability that can integrate with the QRadar product family and is available as an appliance. It also facilitates packet retrieval from an archived PCAP file store.
- IBM Security QRadar Incident Forensics V7.2.2 is a new QRadar offering that provides packet capture analysis, session reconstruction, and security incident forensics that can integrate with QRadar SIEM and is available as a software option and appliance.

Highlights:

- Digital Impressions visualize network data trails and modeling attributes related to specific threat actors.
- Guide forensics investigations by distilling content deemed to be suspicious, based on intelligence from the QRadar SIEM system.
- Visual data exploration and data navigation to analyze network relationships and associations.
- Chronological view of security incident to facilitate understanding the attack sequence.
- Searchable results to assist the security analyst to rapidly pivot on the data.
- IBM Security QRadar SIEM, IBM Security QRadar Log Manager, and IBM Security QRadar Network Anomaly Detection new capabilities:

- Fully translated version of QRadar in all IBM Group 1 languages. Refer to the [Availability of national languages](#) section for more details.
- New System x® based M4 appliance support offers increased Events Per Second (EPS), Flow Per Minutes (FPM), and storage capacity.
- New open APIs enabling QRadar's flow and event data to be more easily queried and retrieved by external systems including third-party applications, reporting solutions, and middleware solutions.
- New IBM Security QRadar Data Node offering enables you to more easily expand the storage and query performance of your IBM Security QRadar SIEM Event Processor 17XX and IBM Security QRadar SIEM Flow Processor 16XX appliances. The QRadar Data Node is available as software, virtual appliance, or hardware appliance.
- Enhanced number formatting capabilities enabling QRadar users to create custom numeric variables from log files that contain a variety of different number formats.
- Performance enhancements in log and flow searching enables you to execute queries such as returning all logs and flow for a given IP address more quickly.
- IBM Security QRadar Risk Manager new capabilities:
  - New Layer 7 configuration data collection from next generation firewalls such as Palo Alto, enabling the storage and auditing of next generation firewall configurations.
  - New network-to-network path summary view enabling users to quickly and more easily understand the different protocols and ports that can be used to communicate between different subnets.
  - New asset configuration policy tests that lets you, if you have QRadar Vulnerability Manager installed, to assess asset configuration against a standard set of policies.
  - Enhanced network topology model providing improved path and policy assessment performance.
- IBM Security QRadar Vulnerability Manager new capabilities:
  - User configurable scan policies enabling you to define scans that will only scan specific port ranges, specified vulnerabilities, execute specific vulnerability plug-ins, and groups of plug-ins.
  - Centralized credentials store that enables administrative users to provide credentials once into a single store that can be reused by multiple scan jobs and also removes the need for users configuring scans to input credentials required for patch scanning.
  - Automated asset owner and vulnerability remediation assignment based on IP ranges, operating system type, asset name, and asset search.
  - Dynamic scanning capability that automatically selects the appropriate remote QRadar Vulnerability Manager scanner for each asset during a scan based on preconfigured rules that define which QRadar Vulnerability Manager Scanner should be used to scan which IP ranges. This can significantly reduce the effort required in configuring large network scans.
  - New calendar based view of scheduled scans enabling you to more easily see when scans are scheduled for execution and for how long allowing overlaps to be quickly identified.

## **Accessibility by people with disabilities**

---

A US Section 508 Voluntary Product Accessibility Template (VPAT) containing details on accessibility compliance can be requested at

[http://www.ibm.com/able/product\\_accessibility/index.html](http://www.ibm.com/able/product_accessibility/index.html)

---

## Reference information

---

Refer to:

- Software Announcement [213-524](#), dated November 19, 2013, IBM Security QRadar V7.2 delivers new capabilities.
- Software Announcement [213-441](#), dated October 15, 2013, IBM Security QRadar V7.2: New Passport Advantage® part numbers available for IBM System z®.
- Software Announcement [213-277](#), dated July 23, 2013, IBM Security QRadar V7.2 family delivers new capabilities and adds IBM Security QRadar Vulnerability Manager V7.2

---

## Availability of national languages

---

At electronic availability, IBM Security; QRadar Security Identity and Event Manager, IBM Security QRadar Log Manager, and IBM Security QRadar Network Anomaly Detection will be translated into the group 1 languages as indicated:

- Brazilian Portuguese
- English
- French
- German
- Italian
- Japanese
- Korean
- Russian
- Spanish
- Simplified Chinese
- Traditional Chinese

## Education support

---

IBM training provides education to support many IBM offerings. Descriptions of courses for IT professionals and managers are on the IBM training website

<http://www.ibm.com/services/learning/>

Call IBM training at 800-IBM-TEACH (426-8322) for catalogs, schedules, and enrollments.

---

## Offering Information

---

Product information is available via the Offering Information website

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage website

<http://www.ibm.com/software/passportadvantage>

---

## Publications

---

The IBM Security QRadar publications are available on the IBM QRadar Security Intelligence Platform at the IBM Knowledge Center at electronic availability

<http://www.ibm.com/support/knowledgecenter/SS42VS/welcome>

All QRadar publications are not currently available on the Knowledge Center as HTML. For this reason, the Welcome page links to a complete PDF library. Additional publications are planned to be available as HTML in the future.

Note: The QRadar online help system now provides topic specific context sensitive help and a link to the IBM Knowledge Center for more detailed information.

---

## Technical information

---

### **Specified operating environment**

---

#### **Hardware requirements**

IBM Security QRadar appliances ship on the following hardware configurations:

- IBM Security QRadar Core Appliances 4380 (X3550) M4
- IBM Security QRadar Core Appliances 4379 (X3650) M4

The IBM Security QRadar software offerings require an equivalent of one of the above hardware configurations.

#### **Software requirements**

IBM Security QRadar V7.2.2 appliances ship with Red Hat Enterprise Linux™ 6.5 preinstalled.

The software only offerings require that Red Hat Enterprise Linux 6.5 for Security QRadar V7.2.2 be provided by the client and installed as a prerequisite.

IBM Tivoli® Director Integrator V7.1.1 is included with IBM Security QRadar V7.2.2 for use restricted to IBM Security QRadar V7.2.2, and can be downloaded from the Passport Advantage website.

The virtual appliance offerings require that VMware ESXi 5.0 or 5.1 be provided by the client and installed as a prerequisite.

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

### ***IBM Electronic Support***

The IBM Support Portal is your gateway to technical support. This includes IBM Electronic Support tools and resources, for software and hardware, to help save time and simplify support. The Electronic Support tools can help you find answers to questions, download fixes, troubleshoot, automate data collection, submit and track problems through the Service Request online tool, and build skills. All these tools are made available through your IBM support agreement, at no additional charge. Read about the Electronic Support portfolio of tools

<http://ibm.com/electronicssupport>

Access the IBM Support Portal

<http://ibm.com/support>

Access the online Service Request tool

<http://ibm.com/support/servicerequest>

### **Planning information**

---

#### ***Packaging***

IBM Security QRadar V7.2.2 software is distributed with:

- International Program License Agreement (Z125-3301)
- License Information document
- DVDs
- Publications (refer to the [Publications](#) section)

This program, when downloaded from a website, contains the applicable IBM license agreement and License Information, if appropriate, and will be presented for acceptance at the time of installation of the program. For future reference, the license and License Information will be stored in a directory such as LICENSE.TXT.

---

### **Software Services**

---

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of our lab-based, software services team and the business consulting, project management, and infrastructure expertise of our IBM Global Services team. Also, we extend our IBM Software Services reach through IBM Business Partners to provide an extensive portfolio of capabilities. Together, we provide the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

To learn more about IBM Software Services or to contact a Software Services sales specialist, visit

<http://www.ibm.com/software/sw-services/>

---

## Ordering information

---

This product is only available via Passport Advantage. It is not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software Value Plus.

For more information about IBM Software Value Plus, visit

### Install

Install is a unit of measure by which the program can be licensed. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each install of the program.

### Appliance Install

Appliance Install is a unit of measure by which the program can be licensed. An Appliance Install is an installed copy of the program that is included on a single unit of supporting hardware. Licensee must obtain an entitlement for each Appliance Install of the program.

---

## Terms and conditions

---

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

This product is only available via Passport Advantage.

### **Licensing**

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

These programs are licensed under the IBM Program License Agreement (IPLA) and the associated Agreement for Acquisition of Software Maintenance, which provide for support with ongoing access to releases and versions of the program. IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available. These programs have a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

### **License Information number**

- L-HART-9GPRL5: IBM Security QRadar V7.2.2 (This LI covers all the QRadar 7.2.2 PIDs except for QRadar Incident Forensics.)
- L-HART-9GYL79: IBM Security QRadar Incident Forensics V7.2.2 (5725-Q40, 5725-Q41, 5725-Q42, 5825-Q43)

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

### **Limited warranty applies**

Yes

### **Limited warranty**

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

### ***Program technical support***

This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Subscription and Support (Software Maintenance) also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

### ***Money-back guarantee***

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

### ***Other terms***

#### ***Volume orders (IVO)***

No

### ***IBM International Passport Advantage Agreement***

#### ***Passport Advantage applies***

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

#### ***Software Subscription and Support applies***

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express®. Product upgrades and Technical Support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

***System i® Software Maintenance applies***

No

***Variable charges apply***

No

***Educational allowance available***

Not applicable.

---

## **Statement of good security practices**

---

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems, services and products are designed to be part of a lawful comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems, services and products are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.

---

## **IBM Electronic Services**

---

Electronic Service Agent™ and the IBM Electronic Support web portal are dedicated to providing fast, exceptional support to IBM Systems customers. The IBM Electronic Service Agent tool is a no-additional-charge tool that proactively monitors and reports hardware events, such as system errors, performance issues, and inventory. The Electronic Service Agent tool can help you stay focused on your company's strategic business initiatives, save time, and spend less effort managing day-to-day IT maintenance issues. Servers enabled with this tool can be monitored remotely around the clock by IBM Support, all at no additional cost to you.

Now integrated into the base operating system of AIX® V5.3, AIX V6.1, and AIX V7.1, Electronic Service Agent is designed to automatically and electronically report system failures and utilization issues to IBM, which can result in faster problem resolution and increased availability. System configuration and inventory information collected by the Electronic Service Agent tool also can be viewed on the secure Electronic Support web portal, and used to improve problem determination and resolution by you and the IBM support team. To access the tool main menu, simply type `smitty esa_main`, and select Configure Electronic Service Agent. In addition, ESA now includes a powerful web user interface, giving the administrator easy access to status, tool settings, problem information, and filters. For more

information and documentation on how to configure and use Electronic Service Agent, refer to

<http://www.ibm.com/support/electronic>

The IBM Electronic Support portal is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. This portal enables you to gain easier access to IBM resources for assistance in resolving technical problems. The My Systems and Premium Search functions make it even easier for Electronic Service Agent tool-enabled customers to track system inventory and find pertinent fixes.

---

## Benefits

---

**Increased uptime:** The Electronic Service Agent tool is designed to enhance the Warranty or Maintenance Agreement by providing faster hardware error reporting and uploading system information to IBM Support. This can translate to less wasted time monitoring the symptoms, diagnosing the error, and manually calling IBM Support to open a problem record. Its 24x7 monitoring and reporting mean no more dependence on human intervention or off-hours customer personnel when errors are encountered in the middle of the night.

**Security:** The Electronic Service Agent tool is designed to be secure in monitoring, reporting, and storing the data at IBM. The Electronic Service Agent tool securely transmits via either the Internet (HTTPS or VPN) or modem, and can be configured to communicate securely through gateways to provide you a single point of exit from your site. Communication is one way. Activating Electronic Service Agent does not enable IBM to call into your system. System inventory information is stored in a secure database, which is protected behind IBM firewalls. It is viewable only by you and IBM. Your business applications or business data is never transmitted to IBM.

**More accurate reporting:** Because system information and error logs are automatically uploaded to the IBM Support center in conjunction with the service request, you are not required to find and send system information, decreasing the risk of misreported or misdiagnosed errors. Once inside IBM, problem error data is run through a data knowledge management system and knowledge articles are appended to the problem record.

**Customized support:** Using the IBM ID entered during activation, you can view system and support information in the My Systems and Premium Search sections of the Electronic Support website at

<http://www.ibm.com/support/electronic>

My Systems provides valuable reports of installed hardware and software using information collected from the systems by Electronic Service Agent. Reports are available for any system associated with your IBM ID. Premium Search combines the function of search and the value of Electronic Service Agent information, providing advanced search of the technical support knowledgebase. Using Premium Search and the Electronic Service Agent information that has been collected from your system, you are able to see search results that apply specifically to your systems.

For more information on how to utilize the power of IBM Electronic Services, contact your IBM Systems Services Representative, or visit

<http://www.ibm.com/support/electronic>

---

## Prices

---

### Business Partner information

If you are an IBM Business Partner -- Distributor for Workstation Software acquiring products from IBM, you may link to Passport Advantage Online for resellers where

you can obtain Business Partner pricing information. An IBM ID and password are required.

<https://www.ibm.com/software/howtobuy/passportadvantage/paoreseller>

## Passport Advantage

For Passport Advantage information and charges, contact your IBM representative or authorized IBM Business Partner for Software Value Plus. Additional information is also available at

<http://www.ibm.com/software/passportadvantage>

## IBM Global Financing

---

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, permits accelerated implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified customers.

For more financing information, visit

<http://www.ibm.com/financing>

## Announcement countries

---

The IBM Security QRadar V7.2.2 appliance products are only available in the following North American countries: Bahamas, Barbados, Bermuda, Canada, Jamaica, Puerto Rico, Trinidad and Tobago, United States of America

Not all these products may be available in your area.

### **Trademarks**

Electronic Service Agent is a trademark of IBM Corporation in the United States, other countries, or both.

IBM, QRadar, System x, Passport Advantage, System z, Tivoli, Express, System i, AIX and ibm.com are registered trademarks of IBM Corporation in the United States, other countries, or both.

Linux is a registered trademark of Linus Torvalds in the United States, other countries, or both.

Other company, product, and service names may be trademarks or service marks of others.

### **Terms of use**

IBM products and services which are announced and available in your country can be ordered under the applicable standard agreements, terms, conditions, and prices in effect at the time. IBM reserves the right to modify or withdraw this announcement at any time without notice. This announcement is provided for your information only. Additional terms of use are located at

<http://www.ibm.com/legal/us/en/>

For the most current information regarding IBM products, consult your IBM representative or reseller, or visit the IBM worldwide contacts page
