Overview

IBM® Lotus Notes® and Domino® 8.5.3 includes a vast array of end-user feature enhancements to increase personal productivity of Lotus Notes, Lotus® iNotes™, and Lotus Notes Traveler for users and developers using Domino Designer.

Highlights:

- Lotus Notes 8.5.3 delivers significant usability enhancements to support social businesses and helps users get work done fast. Calendar and mail enhancements:
 - Auto processing, which automatically applies updates to meetings that you have accepted as updates arrive
 - Counter proposals so that when you propose a new time for a meeting, you can choose to leave a placeholder for the original meeting time on the calendar
 - Enhanced new mail notification, which provides a pop up preview of new mail messages as they arrive
 - Notification to existing invitees when adding or removing attendees from an existing meeting, informing them of the change and updating the invitee list on their calendar invitation
- Entitlement to IBM Connections Files and Profiles, for no additional charge, allows you to tap into the knowledge of networks of professionals with a single click. This helps users to quickly find skills within their organization and to easily share content with other people and remove the need to send large files through email.
- Lotus Domino 8.5.3 provides greater platform flexibility and improved hardware efficiency through expanded virtualization support.
- Lotus Domino Designer 8.5.3 continues to deliver innovation for developers with enhancements focused on performance and scalability and enhanced user experience. Improved XPages support for industry-standard web application models makes it easier to bring applications to mobile devices. Availability of a Domino Server trial makes it easy for customers to try before they buy.
- Lotus Notes Traveler support for Nokia Symbian 3 devices allows you to expand the reach of the business to more devices. For Android users, additional Lotus Traveler enhancements improve usability, performance, and deployment in the areas of additional operating system support, calendar, mail, and deployment. The capability to wipe only Lotus Traveler Mail, Calendar, and Contact data from an Apple iOS device is also available.
- Lotus iNotes 8.5.3 delivers productivity gains with enhancements to improve the deployment experience.

Key prerequisites

Refer to the [Hardware requirements](#) and [Software requirements](#) sections for details.

Planned availability date

October 4, 2011: Electronic availability

October 21, 2011: Media availability

Description

IBM Lotus Notes and Domino 8.5.3 delivers new innovative features to help organizations become social businesses by providing information to help users find the content and people they need. Users can tailor their work environment with widgets that bring social communities that are important to the job right into their peripheral view.

Tap into the knowledge of networks of professionals with a single click through integration with IBM Connections

Lotus Notes 8.5.3 helps you quickly locate the people and content you need through integrated access to social tools from IBM Connections. This release provides an entitlement to the Files and Profiles features of IBM Connections 3.0.1 to customers with these licenses :

- IBM Lotus Domino Enterprise Client Access License
- IBM Lotus Domino Messaging Client Access License
- IBM Lotus Domino Collaboration Express® License
- IBM Lotus Domino Messaging Express License

As a Lotus Notes customer, you can now deploy and access the Files and Profiles features of IBM Connections at no additional charge.

Access to the Files feature allows users to easily share content with other people and remove the need to send large files through email. It also allows you to socialize content you create, allowing people to easily find it, make recommendations, and share with other people.

Profiles helps users find the people they need by searching across the organization's content using tags to identify expertise, current projects, and responsibilities. It socializes skills, interests, and organizational structure for others to discover and benefit from.

Seamlessly collaborate right within the context of your work environment with Lotus Notes 8.5.3

Lotus Notes provides an easy-to-use, single point of access to everything you need to get your work done quickly, including business applications, email, calendars, feeds, and more. There are numerous usability and productivity enhancements in mail, calendar, contacts available in Lotus Notes 8.5.3 to support social businesses.

Enhancements

Mail enhancements make it easier for users to find information and customize their work environment

- Search and sorting
- Search mail by sender and subject

- Display a pop up alert when new mail is received
- Support for different signatures in different email messages
- Change the color and style of read and unread mail

Calendar enhancements help users simplify their complex work schedules

- Automatic merging of duplicate calendar entries
- Create and delete repeating reservations for rooms and resources
- Ability to update meeting invitees when people are added or removed

Contacts enhancements

- Additional options available when you choose who is added to recent contacts
- Hide an email address in type-ahead/Recent contacts

This release also includes updates to the embedded versions of IBM Sametime® and Lotus Symphony™. The IBM Lotus Notes client improves real-time communication by taking advantage of the latest instant messaging and unified telephony and presence awareness services provided by IBM Sametime Entry 8.5.1. These can be accessed in the IBM Sametime Connect desktop client or in a Sametime-enabled Microsoft® Outlook client.

IBM Sametime Entry 8.5.1 extends the capabilities of IBM Sametime 8.5 to additional desktop operating systems and mobile device operating systems, thus providing comprehensive support for all of the most popular desktop and mobile device operating systems. In addition, customers are entitled to deploy a stand-alone version of IBM Sametime Entry 8.5.2 or utilize the plug-in installer to update Sametime within Lotus Notes.

The embedded version of IBM Lotus Symphony has been upgraded to Lotus Symphony 3.0. that provides a greatly enhanced user experience.

Lotus iNotes 8.5.3 delivers usability improvements and productivity gains

- Significant improvements in the auto-processing of meeting updates streamlining the user experience
- Able to maintain current document focus during sort and search operations
- Delivers IBM Sametime 8.5.2 Ajax proxy integration, which continues to provide integrated presence awareness to Lotus iNotes with better performance and richer features
 - Rich chat
 - Updated contact list
 - Business card
- Support for a delivery option to not expand personal groups when sending messages
- Improved sorting on subject which ignores prefixes such as Re: and Fw:
- Support for all calendar alarm preferences
- Has larger default font size
- Includes policy updates that provide support for per-user customizations and policy-controlled Lotus Sametime 8.5.2 Ajax Proxy web client integration
- Support for Firefox 4 and 5, Internet Explorer 9, and Safari 5 interoperability with browser native XSS protection; support for Chrome 12

The above features all run on the power of the Lotus Domino 8.5.3 server. Lotus Domino 8.5.3 provides greater platform flexibility and improved hardware efficiency through expanded virtualization support. Support is now available for Kernel-based Virtual Machines (KVM) on Red Hat Enterprise Linux® and SUSE Linux Enterprise Server.

Enhancements to the server mean that administrators can spend less time on day-to-day server management, focus on strategic initiatives, and departments can reduce administrative and support costs. Examples include :

- New Domino Configuration Tuner (DCT) rules
- Controlled replication of old documents
- Improved serviceability capabilities

Continuing the trend of storage savings, Domino 8.5.3 enhancements deliver greater savings and improved performance.

- Support for applications and mail files exceeding 64 GB logical size
- Ability to store full text information on separate disks or in a separate location than the application data

Availability of a Lotus Domino Trial on developerWorks® makes it easier for customers to try out the server before they buy.

Connect users to relevant communities by adding new widgets available from popular collaboration services

Lotus Notes lets you tailor your work environment with widgets that bring social communities that are important to your job, both within the enterprise and across the Internet, right into your peripheral view. Multiple improvements have been made in Lotus Notes and Domino 8.5.3 including providing the widget catalog as an XPages application with expanded view and search capabilities. Other enhancements include:

- A set of public APIs that are available that developers can use to create custom widget types for use with either supplied or custom applications.

Lotus Notes and Domino 8.5.3 delivers social applications

Lotus Domino and Domino Designer 8.5.3 continues to deliver innovation for developers with enhancements focused on performance and scalability and enhanced user experience.

Domino Designer enhancements improve developer productivity and team development.

- Source control enablement allows users to store NSF-based design elements into a source control repository and perform operations using Domino Designer.
- New XPages and Forms and Views perspectives help focus the development environment by showing only design elements necessary for the current task.
- Enhanced client side JavaScript™ editor improves validation, code folding, code templates, and more.
- Inclusion of a Java™ design element to make it easier to use Java in Domino XPages applications.

XPages improves support for industry-standard web application development and also delivers performance and scalability improvements.

- Dojo upgraded to versions 1.5.0 and 1.5.1, which provide support for mobile devices.
- New "attrs" (attributes) and "type" properties improve support for HTML5.
- OneUI upgraded to version 2.1 improves ability to control application look and feel through CSS.
- XPages preload options have been added to improve the startup performance of XPages applications.
- "Evaluate the entire page on refresh" attribute added as Application Properties performance property for XPages applications.

- Dynamic aggregation of Dojo JavaScript files and CSS files drastically reduces browser requests for these resources which dramatically improves initial application performance.

Lotus Notes and Domino 8.5 is mobile

Lotus Notes Traveler and Lotus iNotes lets you extend collaboration to your mobile employees and keeps them connected with people and information from any location, through the broadest support of mobile devices and tablets.

Lotus Notes Traveler 8.5.3 includes numerous enhancements to support the productivity of mobile workers. Lotus Notes Traveler client is now available for Nokia Symbian 3 devices in addition to Nokia S60 third and fifth edition devices as is support for encryption enforcement on Nokia Symbian 3 devices. Additional Traveler enhancements improve usability, performance, and deployment for Android users and include:

- Android OS 3.x support.
- Android Calendar and Mail enhancements, including tap-to-dial and support for multiple line signatures.
- Lotus Installer features such as automatic client updates that are part of the Lotus Notes Traveler client application on Android, to further simplify the installation on that platform.
- Security: The new device approval policy allows administrators to specify the number of devices each end user may connect into the Traveler environment and adds an allow/deny checkpoint option as a gatekeeper for access.

The capability to wipe only Lotus Traveler Mail, Calendar, and Contact data from an Apple iOS device is now available. In addition, when using the Name Lookup feature on your mobile device, group names on in your corporate directory will also be returned in the search results.

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via the IBM website

Education support

IBM training provides education to support many IBM offerings. Descriptions of courses for IT professionals and managers are on the IBM training website

<http://www.ibm.com/services/learning/>

Contact your IBM representative for course information.

IBM Software Services for Lotus Education provides education to support many Lotus offerings. For a complete list of offerings visit the website at

<http://www.ibm.com/software/lotus/training>

Offering Information

Product information is available via the Offering Information website

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® website

<http://www.ibm.com/software/passportadvantage>

Publications

No publications are shipped with these products.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

Technical information

Specified operating environment

Hardware requirements

For the most up to date information regarding hardware and software requirements, visit

<http://www-01.ibm.com/software/support/>

http://www-947.ibm.com/support/entry/portal/Overview/Software/Lotus/Lotus_Notes

Software requirements

Refer to [Hardware requirements](#) section.

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Planning information

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

Packaging

IBM Lotus Notes and Domino and Lotus Enterprise Integrator® V8.5.3 will be distributed via a media package and electronic software distribution (ESD).

IBM Lotus Notes and Domino primary media is distributed in several specific packages based on license purchase and language preference and include the following:

- Lotus Notes and or Domino product DVDs or electronic image files
- Softcopy product documentation, including readme files, which is included on the product DVDs or electronic image files

IBM Lotus Domino secondary media or associated entitlements is distributed separately via a media package and electronic software distribution (ESD).

The License Information form numbers are:

- L-GHUS-86PQP8 for Lotus Domino
- L-GHUS-86PQVM for Lotus Notes

IBM Lotus Enterprise Integrator media is distributed in one media package with the following:

- Lotus Enterprise Integrator product DVD
- Softcopy product documentation, including readme files, which is included on the product DVD or electronic image files

The License Information form number is:

- L-GHUS-8BPSG5 for Lotus Enterprise Integrator

Security, auditability, and control

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Ordering information

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Charge metrics definitions

Authorized User

Authorized User is the unit of measure by which this program is licensed. An Authorized User is an individual (named or unnamed) within or outside of your enterprise. The program may be installed on one or more computers or servers and accessed by the number of users authorized by the Proof of Entitlement (PoE). You must have an entitlement for each Authorized User accessing the program or any program component in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means.

Processor Value Unit (PVU)

PVU is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU Table by processor value, brand, type, and model number at

http://www.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html

and the number of processors made available to the program. IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores.

Licensee can deploy the program using either full capacity licensing or virtualization capacity (sub-capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (refer to the webpage below). If using full capacity licensing, licensee must obtain PVU entitlements sufficient to cover all activated processor cores* in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using virtualization capacity licensing, licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at

http://www.ibm.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html

* An activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Notes:

- Some programs may require licenses for the program **and** what is being managed. In that case, the following applies. In addition to the entitlements required for the program directly, licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- Some programs may be licensed on a managed basis **only**. In that case, the following applies: Instead of the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies. Rather than obtaining entitlements for the

activated processor cores available to the program, licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the referenced program as if the program itself were executing everywhere the referenced program was executing, independent of the basis on which the referenced program is licensed.

- Express and workgroup programs may be licensed with maximum use terms. In that case, the following applies. The maximum authorized use terms and conditions for PVU licensed IBM express and middleware programs can be found in the IBM Express and Middleware Licensing Guide.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and PoE govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

License Information form numbers

Program name	Program number	Form number
IBM Lotus Domino Server	5724-Z14	L-GHUS-86PQP8
IBM Lotus Enterprise Integrator	5724-L76	L-GHUS-8BPSG5
Lotus Domino Enterprise Client Access License	5724-Z08	L-GHUS-86PQVM
Lotus Domino Messaging Client Access License	5724-Z09	L-GHUS-86PQVM
Lotus Domino Messaging/Collaboration Express	5724-Z10	L-GHUS-86PQVM, L-GHUS-86PQP8

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

For clarification, note that for programs acquired under any of IBM's On/Off CoD software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Usage restriction

Yes. For additional information refer to the License Information Document that is available on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

International Passport Agreement

Software Subscription and Support (Software Maintenance)

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support (also referred to as Software Maintenance) is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support (also referred to as Software Maintenance) does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage Web site at

<http://www.ibm.com/software/passportadvantage>

Other terms

System i Software Maintenance applies

No

Educational allowance available

Not applicable.

On/Off Capacity on Demand (CoD)

To be eligible for On/Off CoD pricing, customers must be enabled for temporary capacity on the corresponding hardware, and the required contract - Z125-6907, Amendment for iSeries® and pSeries® Temporary Capacity On Demand - Software - must be signed prior to use.

IBM Electronic Services

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.

Prices

Passport Advantage

For Passport Advantage information and charges, contact your IBM representative or authorized IBM Business Partner, or authorized IBM Business Partner for Software ValueNet®, if applicable. Additional information is also available at

<http://www.ibm.com/software/passportadvantage>

Business Partner information

If you are an IBM Business Partner -- Distributor for Workstation Software acquiring products from IBM, you may link to Passport Advantage Online for resellers where

you can obtain Business Partner pricing information. An IBM ID and password are required.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, both from IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financial benefit

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, permits accelerated implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified customers.
