Overview

Building on the IBM Domino 10.0 and Notes 10.0 releases, version 10.0.1 brings the following enhancements.

IBM Notes

Starting with version 10.0.1, IBM Notes includes the client management solution, panagenda MarvelClient Essentials. panagenda MarvelClient Essentials is designed to help administrators collect information about installations of IBM Notes in an enterprise. For example, this information can focus on users that are running single versus multi-user clients, using ICAA, or working on a Mac, as well as the Notes client versions and fix packs that are currently in use.

The inclusion of panagenda MarvelClient Essentials provides the following value and capabilities to an administrator:

- Gain efficiency, improve upgrade path, reduce risk, and help desk tickets
- Continuously analyze and visualize IBM Notes client configurations, operating system details, and desktop icon
- Improve upgrades by identifying pitfalls upfront, such as insufficient resources or nonstandard installations
- Deploy files such as your Notes 10 upgrade package, run programs, and manage the Windows Registry
- Provide IT, helpdesk, and management with all necessary details, facts, and figures

For more information and steps to get started, see Technote 0737079.

IBM Notes 10.0.1 for macOS supports Mojave (with embedded IBM Java binaries).

IBM Domino AppDev Pack

IBM Domino AppDev Pack enables any JavaScript™ developer to combine Domino with Node.js and JavaScript for full-stack web development. JavaScript and Domino developers can enhance, integrate, and easily build new applications using Domino data and the Domino Query Language (DQL).

IBM Domino AppDev Pack Identity and Access Management Service with OAuth - Preview

Identity and access management capabilities enhance the IBM Domino AppDev Pack. These capabilities further improve authorization and access management within an enterprise. The Authorization server in the standard OAuth2 framework provides OIDC/OAuth2 support for modern Domino Applications that are developed by customers. IBM Domino AppDev Pack Identity and Access Management Service with OAuth Preview is an unsupported preview.

Verse On-Premises

Version 1.0.6 provides:

- Users with the capability to choose the language it displays as an option within VOP.
- A calendar preview capability that an administrator can configure to preview the ongoing enhancements to the calendar experience. This capability is off by default.
- An import iCal feature that enables a user to choose an iCalendar (.ics) file from local machine and import all meeting entries in the file to a calendar. Single and repeat calendar events (up to 50) in a single .ics file are supported in this release.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

This product is only available through Passport Advantage.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of

Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

Software Maintenance

Licenses under the IBM International Program License Agreement (IPLA) provide for support with ongoing access to releases and versions of the program. IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available. Two charges apply: a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

License Information number

The following License Information documents apply to the offerings in this announcement:

Program identifier	License Information document title	License Information document number
5724-Z14	IBM Domino Server	L-GHUS-B5DJTU
		L-GHUS-B5DJT9
		L-GHUS-B5DJS2
		L-GHUS-B5DJSM
5724-Z08	IBM Domino Enterprise client access	L-GHUS-B5DJYG
5724-Z09	IBM Domino Messaging client access	L-GHUS-B5DJZD
5724-Z10	IBM Domino Messaging	L-GHUS-B5DJQW
		L-GHUS-B5DJRG
5725-E32	IBM XWork Server	L-GHUS-B5DJXF

Follow-on releases, if any, may have updated terms. See the [License Information documents](#) website for more information.

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, see the [IBM Software Support Handbook](#).

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of three years from the general availability date, as long as your Software Subscription and Support (also referred to as Software Maintenance) is in effect.

This technical support allows you to obtain assistance (by telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Subscription and Support (Software Maintenance) also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, through an announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

For additional information on the IBM Software Support Lifecycle Policy, see the [IBM Software Support Lifecycle Policy](#) website.

Money-back guarantee

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Passport Advantage applies

Yes, information is available on the [Passport Advantage and Passport Advantage Express](#) website.

Software Subscription and Support applies

Yes. Software Subscription and Support, also referred to as Software Maintenance, is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and Technical Support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance by telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, see the [IBM Software Support Handbook](#). Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in

other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

Unless specified otherwise in a written agreement with you, IBM does not provide support for third-party products that were not provided by IBM. Ensure that when contacting IBM for covered support, you follow problem determination and other instructions that IBM provides, including in the [IBM Software Support Handbook](#).

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, go to the [Passport Advantage and Passport Advantage Express](#) website.

Statement of good security practices

IT system security involves protecting systems and information through intrusion prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a regulatory compliant, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective.

Important: IBM does not warrant that any systems, products, or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.
