## At a glance

IBM® Sterling B2B Integrator V5.2.4 and IBM Sterling File Gateway V2.2.4 are available on IBM System z® running Red Hat Enterprise Linux™ (RHEL) 5.5 or 6.1 with DB2® 9.7 support.

## Overview

Organizations are looking for ways to create more intelligent networks of business partners, customers, and suppliers in order to enhance efficiency and profitability. However, business-to-business (B2B) interactions do not exist in isolation, and must be integrated with your internal systems and processes.

IBM Sterling B2B Integrator V5.2.4 and IBM Sterling File Gateway V2.2.4 expand their platform coverage by adding Red Hat Enterprise Linux on IBM System z . You can now install and run IBM Sterling B2B Integrator V5.2.4 and IBM Sterling File Gateway V2.2.4 on IBM System z running Red Hat Enterprise Linux (RHEL) 5.5 or 6.1 with DB2 9.7 support.

### IBM Sterling B2B Integrator V5.2.4

Sterling B2B Integrator enables the secure integration of complex B2B processes with diverse partner communities. As organizations are increasingly faced with even more complex B2B integration challenges across even more diverse partner communities, Sterling B2B Integrator provides a single, flexible B2B gateway that enables companies to solve all of their B2B integration needs.

### IBM Sterling File Gateway V2.2.4

File transfer is usually a step in a larger business process. Leading organizations are moving to manage the business process across multiple applications, workflows, and events such as file transfer.

IBM Sterling File Gateway consolidates disparate centers of file transfer activity, and facilitates the exchange of file-based information securely, in virtually any format, protocol, and file size. With its advanced on-boarding features, extensive communication-channel support, and improved business process management, Sterling File Gateway helps improve operational execution and time to revenue through a centralized and secure B2B-enabled managed file gateway.

---

## Key prerequisites

---

Refer to the [Hardware requirements](#) and [Software requirements](#) sections.

---

## Planned availability date

---

September 14, 2012: Electronic availability

October 5, 2012: Media availability

Refer to the complete letter for national language availability.

---

## Description

---

You now get Linux on IBM System z platform coverage for IBM Sterling B2B Integrator V5.2.4 and IBM Sterling File Gateway V2.2.4.

### **IBM Sterling B2B Integrator V5.2.4**

Sterling B2B Integrator helps enable the secure integration of complex B2B processes with diverse partner communities. As organizations are increasingly faced with even more complex B2B integration challenges across even more diverse partner communities, Sterling B2B Integrator provides a single, flexible B2B gateway that enables companies to solve virtually all of their B2B integration needs.

Sterling B2B Integrator:

- Provides visibility into and across your supply and demand chains.
- Integrates your B2B communications between your systems and diverse partner communities.
- Streamlines business processes across your enterprise boundaries.
- Connects to your business partners despite differences in size, geography, or choice of technology.

Sterling B2B Integrator encompasses six key areas of B2B functionality:

- Communications and security
- Integration and transformation
- Business process management
- Community management
- Visibility
- Application extension and customization

Additional information about IBM Sterling B2B Integrator can be found at

<http://www.ibm.com/software/commerce/b2b/products/b2b-integrator/>

### **IBM Sterling File Gateway V2.2.4**

Sterling File Gateway offers:

- A single, secure solution for file transfer - Handles large files and high messaging volumes in virtually any format, protocol, and number of external connections
- Enhanced security and risk management - Offers secure protocols, encryption methods, certificate types, digital signatures, and identity management tools to ensure data integrity

- Visibility for better management - Can lead to better decision making, faster response, and more satisfied customers and business partners

Sterling File Gateway allows organizations to take complete control over Internet-based file transfers with trading partners by consolidating disparate centers of file transfer activity and accommodating the technical requirements of a diverse trading partner community.

- Enables centralized management of file transfer activity with trading partners.
- Facilitates the secure exchange of Internet-based file transfers in virtually any format, protocol, and size.
- Integrates and automates file transfer activity between trading partners and internal systems.
- Provides visibility over file transfer activity with trading partners.
- Enables trading partner self-service.

Sterling File Gateway encompasses six key areas of B2B file transfer functionality:

- On-boarding trading partner file transfer activity
- Communications and security protocols and data encryption
- Transformation and routing of inbound files
- Business process management to automate file processing
- Visibility over file transfer activity
- Self-service portal for trading partners

Additional information about IBM Sterling File Gateway can be found at

<http://www.ibm.com/software/commerce/managed-file-transfer/products/file-gateway/>

### **Accessibility by people with disabilities**

---

A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via the IBM website

[http://www.ibm.com/able/product\\_accessibility/index.html](http://www.ibm.com/able/product_accessibility/index.html)

---

## **Product positioning**

---

Sterling B2B Integrator is a B2B gateway solution, part of IBM B2B Integration solutions.

---

## **Availability of national languages**

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

### Planning information

---

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express®. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

#### **Packaging**

Sterling B2B Integrator V5.2.4 media packs include the following items:

- IBM Sterling B2B Integrator V5.2.4
- IBM Sterling Standards for EDI V11.3
- IBM Sterling External Authentication Server V2.4.0
- IBM Sterling Certificate Wizard V1.4.0
- IBM DB2 for Linux, UNIX™ and Windows™ 9.7 - Limited Use

Sterling File Gateway V2.2.4 media packs include the following items:

- International Program License Agreement
- License Information booklet
- IBM Sterling File Gateway V2.2.4

- IBM Sterling Standards for EDI V11.3
- IBM Sterling External Authentication Server V2.4.0
- IBM Sterling Certificate Wizard V1.4.0
- IBM DB2 for Linux , UNIX and Windows 9.7 - Limited Use

## **Security, auditability, and control**

---

Security and auditability features of IBM Sterling File Gateway

- Edge security included for B2B and MFT transactions
- Supports secure communications via FTP, FTPS, HTTP, HTTPS, SSH/SFTP, AS2, AS3, EBICS, and IBM Sterling Connect:Direct® protocols
- Comprehensive authentication services, including single sign-on, LDAP, and local user authentication
- Multiple encryption standards (PGP, SSL/TLS, S/MIME)
- Encryption of data for both in-flight and at-rest files

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

## **Global Technology Services**

---

Contact your IBM representative for the list of selected services available in your country, either as standard or customized offerings for the efficient installation, implementation, or integration of this product.

---

## **Ordering information**

---

For ordering information, consult your IBM representative or authorized IBM Business Partner, or visit

<http://www-306.ibm.com/software/support/pa.html>

This product is only available via Passport Advantage . It is not available as shrinkwrap.

## Charge metrics definitions

### Install

Install is a unit of measure by which the program can be licensed. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each install of the program.

### Processor Value Unit (PVU)

PVU is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU Table by processor value, brand, type, and model number at

[http://www.ibm.com/software/lotus/passportadvantage/pvu\\_licensing\\_for\\_customers.html](http://www.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html)

and the number of processors made available to the program. IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores.

Licensee can deploy the program using either full capacity licensing or virtualization capacity (sub-capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (refer to the webpage below). If using full capacity licensing, licensee must obtain PVU entitlements sufficient to cover all activated processor cores\* in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using virtualization capacity licensing, licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at

\* An activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Notes :

- Some programs may require licenses for the program **and** what is being managed. In that case, the following applies. In addition to the entitlements required for the program directly, licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- Some programs may be licensed on a managed basis **only** . In that case, the following applies: Instead of the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies. Rather than obtaining entitlements for the activated processor cores available to the program, licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the referenced program as if the program itself were executing everywhere the referenced program was executing, independent of the basis on which the referenced program is licensed.

## Cross-platform products

---

### ***Cross-platform products for use on System z***

Order the part numbers that follow when the product is used for either the development of code that will be deployed on System z servers or when the product will be communicating or transferring data between a distributed server and a System z server. Otherwise order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement

### ***Cross-platform product for use on System z IFL engines***

Order the part numbers that follow when the product is intended to run on the Linux operating system on System z IFL engines. If the product is not intended to run on the Linux operating system on System z IFL engines, order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

## Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

### Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage , where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

### License Information form numbers

Program name	Program number	Form number
IBM Sterling B2B Integrator	5725-D06	L-ASTR-8S5JDC
IBM Sterling File Gateway	5725-D07	L-ASTR-8S5M6D

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

### Limited warranty applies

Yes

### Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified

portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

### ***Program technical support***

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

### ***Money-back guarantee***

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

### ***Volume orders (IVO)***

No

### ***Passport Advantage applies***

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

### ***Usage restriction***

Yes

For additional information, refer to the License Information Document that is available on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

## ***International Passport Agreement***

### ***Software Subscription and Support applies***

Yes. Software Subscription and Support is included with licenses purchased through Passport Advantage and Passport Advantage Express . Product upgrades and technical support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

### ***Other terms***

#### ***System i Software Maintenance applies***

No

#### ***Educational allowance available***

Education allowance does not apply.

Education software allowance does not apply.

Special education prices are available for qualified customers through Passport Advantage .

#### ***Statement of good security practices***

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.
