## At a glance

Datacap Taskmaster Capture V8.1 provides:

- New Datacap Taskmaster Entry Level, an easy-to-use capture solution employing the FastDoc Capture user interface for applications that do not require full Taskmaster Capture.
- Enhanced globalization with support for simplified Chinese and Russian in the Taskmaster user interface and for recognition of optical characters (OCR).
- Datacap Taskmaster Enterprise Edition bundle, including Rulerunner Enterprise, connectors for email and fax, and IBM® Content Classification in a package attractive to enterprise-level solutions.
- Updated thick and thin client user interfaces improve the user experience.
- Support for IBM System Dashboard for monitoring Taskmaster Capture system performance.

## Overview

Datacap Taskmaster Capture V8.1 includes new features and enhancements along with a new lower-cost entry-level version of Taskmaster based on the FastDoc Capture user interface. A new option, Datacap Taskmaster Enterprise Edition, bundles Taskmaster components with Content Classification.

This release also provides support for Simplified Chinese and Russian, along with updated GUIs and enhanced performance, manageability, documentation, security, and connectivity to repositories.

## Key prerequisites

Refer to the [Hardware requirements](#) and [Software requirements](#) sections.

## Planned availability date

August 24, 2012: Electronic availability

September 14, 2012: Media availability

---

## Description

---

Datacap Taskmaster Capture V8.1 is designed to help significantly reduce labor and paper costs, and deliver meaningful information for better and faster decisions. It offers the following benefits:

- Full Time Employee (FTE) or equivalent reduction or repurposing
- Data entry error reduction
- Elimination of document transportation costs
- Accelerated document processing

### Enhancements

Datacap Taskmaster Capture V8.1 includes improvements such as updated GUIs, FastDoc integration, and new entry-level and enterprise package offerings.

### FastDoc integration

FastDoc is now a standard component of Datacap Taskmaster Capture V8.1, rather than a separately licensed product. The FastDoc integration with Taskmaster facilitates customization of capture installations from department to enterprise. You can run FastDoc as a stand-alone application and as a connected Taskmaster client application, enabling you to have an offline capture station as part of enterprise-level deployment. The stand-alone configuration supports asynchronous submission of batches with scheduled uploads that use a web service. The FastDoc connected configuration uses Taskmaster Server for batch management. FastDoc includes a connector for IBM FileNet® Content Manager. When used with Taskmaster, FastDoc may be configured to export documents to IBM Content Manager and IBM FileNet Image Services, in stand-alone or connected mode.

### Lower-cost Taskmaster Entry Level

Datacap Taskmaster Entry Level is a lower-cost version of Taskmaster based on the FastDoc Capture user interface. It is designed to help you with the following tasks:

- Automate the capture of data fields for indexing with OCR.
- Identify documents by comparing them to a database of previously scanned documents.
- Help ensure data accuracy with database look-ups.
- Deliver data and images straight into IBM FileNet Content Manager.

Scanned documents can be exported in image or searchable PDF format.

Taskmaster Entry Level is a limited-use version of Taskmaster with the following restrictions:

- FastDoc user interface is not configurable.
- Taskmaster Web for administration only (not for scanning or verification).
- Data capture using the default ABBYY FineReader OCR engine. Use of additional OCR or hand print (ICR) engines provided with Taskmaster Capture is prohibited.
- Use of Datacap Taskmaster Flex and TravelDocs demo applications is prohibited.
- Single thread use of Rulerunner rules engine.

You can upgrade Taskmaster Entry Level to the standard version of Taskmaster.

### Datacap Taskmaster Enterprise Edition bundle

Datacap Taskmaster Enterprise Edition is an option to Datacap Taskmaster Capture that bundles the following in a user-based license:

- Datacap Taskmaster Capture Connector for eMail and Electronic Documents: Enables you to create Taskmaster document batches from documents received as email messages and attachments, and send email notification messages when a particular event occurs. The connector also includes eDocument conversion, which enables you to unpack .zip archives and convert Microsoft™ Word, Excel, Outlook, PDF, and multipage TIFF files to single page TIFF files for processing by IBM Datacap Taskmaster.
- Datacap Taskmaster Capture Connector for Fax: Supports capture of faxes and associated metadata from OpenText RightFax servers.
- Datacap Rulerunner Enterprise: Delivers scalability and increased performance with support for multiprocessor systems and high-speed fingerprint matching.
- Content Classification V8.8: Enables automatic document classification of text-based documents using content analytics full text analysis.

In a single bundle, Datacap Taskmaster Enterprise Edition provides greater support for input of documents into your capture solution, enables increased performance and throughput, and expands the document classification capabilities of Taskmaster Capture.

### **IBM Content Classification**

Datacap Taskmaster Enterprise Edition provides entitlement to utilize Content Classification V8.8 with Taskmaster Capture. Content Classification is an enterprise-class, advanced classification technology that analyzes the full text of captured document pages comparing results with known examples to automate classification. It provides Taskmaster Enterprise Edition with an additional method of classification with unique learning and real-time feedback capabilities, enabling organizations to quickly take corrective action and adapt to changing business needs.

### **Updated user interfaces**

Datacap Taskmaster Capture V8.1 replaces Batch Pilot and Taskmaster Client with robust .NET framework application-based interfaces and an updated Taskmaster web browser-based interface.

The migration to updated .NET and Taskmaster Web components includes newly enhanced Taskmaster DotScan and Taskmaster DotEdit user interfaces. Taskmaster DotScan supports TWAIN and ISIS drivers. Taskmaster DotScan enables users to conduct high-volume document scans by using manual document separation; ISIS driver also supports automatic document separation via patch and bar codes. In addition, users can conduct post-scan review and rescan. Taskmaster DotEdit supports the separately licensed Taskmaster Accounts Payable Capture application with Purchase Order Line Item Reconciliation (POLR) integration.

### **Options for migrating existing V8.0.1 applications to V8.1**

Starting with IBM Datacap Taskmaster Capture V8.1.0, the thick components Taskmaster Client, Client Service, and Batch Pilot are no longer available. The balance of the administrative and configuration functions that were delivered in the V8.0.1 thick Taskmaster Client is now available in Taskmaster Web. Also, the thick client functions for scanning, fixing, and verifying batches are now available in the updated DotScan and DotEdit V8.1 programs. DotScan and DotEdit were first introduced in V8.0.0. They are based on Windows™ Forms, which is a set of classes in the Microsoft .NET framework.

Refer to the Taskmaster V8.1 documentation for more information and details on migrating existing V8.0.1 applications to V8.1.

### **Multilingual and multicultural features**

Datacap Taskmaster Capture enables users to process each batch, document, page, and field in a number of languages and current locale; for example date, time, and currency values. V8.1 adds Chinese (simplified) and Russian to the list of supported languages.

**Other new features enable users to:**

- Process batches of documents that have mixed locales
- Process documents that have individual field locale
- Set the current locale during runtime operations for each batch, document, page, or field

**System Dashboard for Enterprise Content Management support**

Datacap Taskmaster Capture V8.1 adds support for System Dashboard for Enterprise Content Management. This dashboard product is a standard, separately licensed IBM tool that delivers a centralized mechanism for monitoring application-specific performance data. The dashboard listeners that are installed with Taskmaster Capture include counters to monitor client login activity, server requests, database actions, batch tasks, and file access. With the dashboard you can monitor activities of the Taskmaster Server, Rulerunner, and Taskmaster Web components. The dashboard also provides immediate detection of aborted batches and other functional anomalies, and gives you the opportunity to recover accordingly.

**Connector upgrades**

Datacap Taskmaster Capture V8.1 includes more robust connectors to Content Manager and FileNet Content Manager. For example, the Content Manager connector uses a Java™ API, replacing the Windows Client OLE API that was used in earlier versions. The Java API improves interoperability across a larger number of Content Manager server platforms than Windows Client OLE API. The Java API also supports the Unicode Standard, enabling international users to execute tasks in their native language and current locale. Windows Client OLE API does not support Unicode.

FileNet Capture Link Component is no longer supported.

**Enhanced security and support of IBM standards**

Datacap Taskmaster Capture V8.1 complies with Federal Information Processing Standards (FIPS) for password encryption. It also adds support for IPv6, the new standard protocol for the Internet. IPv6 makes it possible to have virtually unlimited IP addresses and therefore, unlimited direct and secure network connections. V8.1 applies IBM standard labeling and icons, including IBM Tivoli® License Manager for each component.

**Enhanced scalability**

Rulerunner Enterprise provides enhanced scalability and utilization of multi-core systems.

**Note about Datacap Taskmaster Medical Claims**

Datacap Taskmaster Medical Claims Capture available with Datacap Taskmaster Capture V8.0 is not currently available with Datacap Taskmaster Capture V8.1.

**Note about IBM Datacap Taskmaster Entry-level and Simplified Chinese**

Taskmaster Entry-level product does not currently support recognition of Chinese.

**Accessibility by people with disabilities**

---

A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via the IBM Web site

[http://www.ibm.com/able/product\\_accessibility/index.html](http://www.ibm.com/able/product_accessibility/index.html)

---

## Product positioning

---

Datacap Taskmaster Capture V8.1 helps you bridge the digital divide between legacy paper transactions (p-commerce) and new digital systems (e-commerce) in an era of multi-channel inputs. As customers and suppliers take advantage of a wide assortment of communication modes - paper, fax, web, email, EDI, file transfer, and so on - the challenge is to respond near-instantaneously and with a single voice, no matter channel they choose. That is the expectation that Datacap Taskmaster Capture V8.1 helps you meet whenever customers (or suppliers, patients, citizens, claimants, even employees - whoever your organization serves) reach out using p-commerce and other communication modes. V8.1 includes expanded globalization with double-byte support in general, and Simplified Chinese in particular; introduces a rapid application development interface; enables remote disconnected capture where infrastructure dictates; boosts system security with FIPS encryption; enhances scalability with IPV6 support; and generally eases the paper to electronic transition, helping you boost the satisfaction of customers, suppliers, or other constituents.

---

## Publications

---

No publications are shipped with this product.

The IBM Publications Center

<http://www.ibm.com/e-business/linkweb/publications/servlet/pti.wss>

You can download the PDF publication and find associated content for IBM Datacap Taskmaster Capture from the V8.1 library page

<http://www.ibm.com/support/docview.wss?uid=swg27020296>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

## Technical information

### Specified operating environment

#### Hardware requirements

Datacap Taskmaster Capture V8.1 is required. It has no additional technical requirements.

The following guidelines for the minimum hardware recommended to operate Datacap Taskmaster. Configurations that exceed these recommendations should result in better performance.

Station type	CPU equivalent	RAM (GB)	Available disk (GB)	Network (MBS)
Taskmaster Server/File Server	Intel™ Core 2 Duo T7500 (2.20 GHz) AMD Opteron, Athlon or Sempron	3	100 (fast)	100
Taskmaster Web Server	Intel Core2 Duo E6850 (3.0 GHz) AMD Athlon or Sempron	4	80	100
Rulerunner Service	Intel Core2 Duo E6850 (3.0 GHz) AMD Athlon or Sempron	2	80	100
Scan Station	Pentium™ Dual Core E2160 (1.80 GHz) AMD Athlon or Sempron	1	10	100
Verification Station	Pentium Dual Core E2160 (1.80 GHz) AMD Opteron, Athlon, or Sempron	1	10	100

#### Notes

1. A file server is required to store the images and intermediate processing files. The Datacap Taskmaster server can be the same computer as the file server. The storage space needed on the file server is dependent upon image size and volume.
2. The Datacap Taskmaster web server components can run on the same computer as Datacap Taskmaster server components in a secure configuration (intranet, VPN, and so on).
3. Datacap Rulerunner stations provide all unattended processing including document identification, recognition, image processing, validations, and export of data.
4. Datacap Taskmaster web stations should run Microsoft Internet Explorer 6.0, or later. (Firefox is supported with limitations.)
5. Network is assumed to be Ethernet with TCP/IP running Microsoft file servers.

#### Software requirements

Datacap Taskmaster Capture V8.1 is required. It has no additional technical requirements.

Datacap Taskmaster Capture V8.1 requires either a single Windows-based machine or multiple machines in a client/server environment. Datacap Taskmaster supports Windows Server 2008 (32 bit and 64 bit), and Windows 7 (32 bit and 64 bit). Servers need to run Windows 2008 Server operating system.

#### Notes :

1. All computers running a Datacap Taskmaster application must use the same version of Datacap Taskmaster. Operating Datacap Taskmaster Client or Datacap Taskmaster Web with an incompatible version of Datacap Taskmaster Server, or allowing different versions to access one database, can result in loss of data.
2. Servers and workstations running Datacap software require Microsoft .NET Framework and if not already installed, will be installed or activated during the Datacap software installation process.
3. Servers running Datacap Taskmaster web components require Microsoft Internet Information Services (IIS).

4. Datacap Taskmaster web running in 64-bit Windows requires a .NET application pool configured to permit 32-bit applications. Consult the Installation and Configuration Guide for details.
5. Datacap Taskmaster requires the Microsoft XML Core Services (MSXML) 6.0 Parser, and if it is not already installed, it will be installed automatically during the software installation process.
6. Datacap Taskmaster requires the Microsoft Windows Installer 3.1, and if it is not already installed, it will be installed automatically during the Datacap software installation process.
7. Datacap Taskmaster web verification stations should run Microsoft Internet Explorer 6.0, or later.

### **Supported databases**

Datacap Taskmaster applications are preconfigured to use Microsoft Access for the three primary databases which store administration, batch, and rules information. The use of Oracle and SQL Server is supported and strongly recommended for enterprise or mission-critical applications.

### **Supported scanners**

ISIS and TWAIN drivers are supported with Datacap Taskmaster thick clients. TWAIN drivers are used for Datacap Taskmaster Web remote scan clients.

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

### **Planning information**

---

#### ***Customer responsibilities***

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express®. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

#### **Security, auditability, and control**

---

Datacap Taskmaster Capture uses the security and auditability features of the host software.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

---

### **Ordering information**

---

This product is only available via Passport Advantage. It is not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software Value Plus.

For more information about IBM Software Value Plus, visit

[http://www.ibm.com/partnerworld/page/svp\\_authorized\\_portfolio](http://www.ibm.com/partnerworld/page/svp_authorized_portfolio)

## Charge metrics definitions

### User Value Unit (UVU)

UVU is the metric by which this program is licensed. UVU entitlements are based on the number of users for the given program. A Proof of Entitlement (PoE) must be obtained for the appropriate number of UVUs required for your environment as defined by the specific program terms. The UVU entitlements are specific to the program and may not be exchanged, interchanged, or aggregated with UVU entitlements of another software program. UVU licensing offers you price benefits for customers by enabling a lower cost of incremental growth of resources. To understand these benefits of UVU licensing, and to determine how many UVUs to obtain for the program, contact your IBM representative.

### Connection

Connection is a unit of measure by which the program can be licensed. A Connection is a link or association of a database, application, server, or any other type of device to the program. Licensee must obtain entitlements for the total number of Connections which have been or are made to the program.

### Install

Install is a unit of measure by which the program can be licensed. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each install of the program.

### Processor Value Unit (PVU)

PVU is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology and the number of processors made available to the program.

The number of entitlements is defined within the PVU table by processor value, brand, type and model number at

[http://www-01.ibm.com/software/lotus/passportadvantage/pvu\\_licensing\\_for\\_customers.html](http://www-01.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html)

IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores.

Licensee can deploy the program using either full capacity licensing or virtualization capacity (sub-capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms. If using full capacity licensing, licensee must obtain PVU entitlements sufficient to cover all activated processor cores<sup>1</sup> in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using

virtualization capacity licensing, licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at

[http://www.ibm.com/software/lotus/passportadvantage/Counting\\_Software\\_licenses\\_using\\_specific\\_virtualization\\_technologies.html](http://www.ibm.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html)

- 1 An activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Notes :

1. Some programs may require licenses for the program and what is being managed. In that case, the following applies: In addition to the entitlements required for the program directly, licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
2. Some programs may be licensed on a managed basis only. In that case, the following applies. Instead of the entitlements required for the program directly, licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
3. A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies. Rather than obtaining entitlements for the activated processor cores available to the program, licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the referenced program as if the program itself were executing everywhere the referenced program was executing, independent of the basis on which the referenced program is licensed.

### Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

## **Licensing**

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage , where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

### **License Information form number**

Program name	Program number	Form number
Datacap Taskmaster Capture	5725-C15	L-EDAE-8VTL74

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

### **Limited warranty applies**

Yes

### **Limited warranty**

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

### **Program technical support**

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM , including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

### **Money-back guarantee**

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may

contact the party from whom you acquired it for instructions on how to obtain the refund.

- For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

**Volume orders (IVO)**

No

**Passport Advantage applies**

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage . It is not available as shrinkwrap.

**Usage restriction**

Yes

For additional information, refer to the License Information Document that is available on the IBM Software License Agreement Web site

<http://www.ibm.com/software/sla/sladb.nsf>

**Software Subscription and Support applies**

Yes. Software Subscription and Support is included with licenses purchased through Passport Advantage and Passport Advantage Express . Product upgrades and technical support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

**System i Software Maintenance applies**

No

### **Educational allowance available**

Not applicable.

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.
