## Overview

---

IBM® Enterprise Records V5.1.2 is part of the IBM Information Lifecycle Governance (ILG) solution portfolio. The ILG solutions help organizations improve information economics and reduce risk by defensibly disposing of data debris. It aligns information cost to value through value-based archiving and tiering; reduces information risk by instrumenting privacy, electronic discovery (eDiscovery), and regulatory policy across the data environment; and enables the business to realize information value as context erodes and information volumes increase with in-place analytics, content management, and collaboration.

Enterprise Records is a records repository for unstructured data that can capture, declare, classify, store, and dispose of electronic and physical records according to fiscal, legal, and regulatory requirements. Enterprise Records is an integral component of the ILG Retention and Records Management solution.

### New in IBM Enterprise Records V5.1.2:

- Improved integration with Global Retention Policy and Schedule Management for retention policy syndication.
- Improved user experience through a totally redesigned user interface to enable enhanced file plan navigation and management, a new graphical user interface for operational tasks and report management, and linkage with the IBM Content Navigator Data Service.
- Incremental performance and scalability improvements for disposition processing.
- Inclusion of a limited use license for IBM Cognos® Business Intelligence V10.2. Refer to the license information document for details about the terms and conditions.

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL (Reference: YE001).

---

## Key prerequisites

---

Refer to the [Technical information](#) section for information about hardware and software requirements.

---

## Planned availability date

---

November 29, 2013: Electronic availability

December 13, 2013: Media availability

---

## Description

---

### IBM Records and Retention Management solution

IBM Enterprise Records V5.1.2 is a records repository that can help organizations address, maintain, and provide a record of compliance for electronic and physical records. Enterprise Records streamlines the execution of the retention schedule and automates operation record keeping tasks to help enforce compliance with retention policies, with or without end-user participation. Enterprise Records includes the following features:

- Integration with IBM Global Retention Policy and Schedule Management, which manages the global retention schedule and associated legal citation so you can automatically receive the retention schedule and updates as the retention schedule changes.
- Support of regulatory compliance including Department of Defense (DoD) V5015.2 certification, integration with machine-learning technology to help automatically categorize records that come from various data sources. Enterprise Records allows users to categorize their own records, or categorization can be done behind the scenes without end-user interaction.
- Federated records management to centralize the operational execution of records management tasks, such as reporting, auditing, and disposition reviews.

### New in this release:

- Integration improvements with IBM Global Retention Policy and Schedule Management. These improvements include the ability to map retention schedules to Enterprise Records containers.
- A new graphical user interface to improve users' efficiency and usability for administrative and operation tasks. This new user interface uses the IBM Content Navigator technology and is deployed as an IBM Content Navigator application. It includes the ability to:
  - Manage the file plan
  - Manage reports
  - Execute operation tasks
  - Make use of the Content Navigator external data service to automatically populate pull-down lists
- Performance and scalability improvements which:
  - Reduce disposition overhead
  - Improve the disposition sweep process performance
  - Improve the workflow-based disposition process
- Includes a limited use license to use IBM Cognos Business Intelligence V10.2, which allows Enterprise Records customers to run the included Enterprise Records reports, edit the reports, and create new Enterprise Records reports. Refer to the Enterprise Records license information document for details on the terms and conditions.
  - Learn more about Cognos Business Intelligence at <http://www-01.ibm.com/software/analytics/business-intelligence/reports/>

## Accessibility by people with disabilities

---

A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via the IBM website

[http://www.ibm.com/able/product\\_accessibility/index.html](http://www.ibm.com/able/product_accessibility/index.html)

## Publications

---

No publications are shipped with this product.

### IBM Redbooks®

<http://www.redbooks.ibm.com/>

IBM Redbooks publications are developed and published by the IBM International Technical Support Organization (ITSO). The ITSO develops and delivers skills,

technical know-how, and materials to IBM technical professionals, Business Partners, clients, and the marketplace in general.

IBM Redbooks provide positioning and value guidance, installation and implementation experiences, typical solution scenarios, and step-by-step how-to guidelines. They often include sample code and other support materials that are also available as downloads. Redbooks are available as hardcopy books, in IBM Redbooks CD-ROM collections, and on the Internet in the site below. Refer to the How to order page for order details at

<http://www.redbooks.ibm.com/Redbooks.nsf/RedbookAbstracts/sg247623.html>

### **The IBM Publications Center**

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

---

## **Technical information**

---

### **Specified operating environment**

---

#### ***Hardware requirements***

IBM Enterprise Records V5.1.2 hardware requirements are consistent with IBM FileNet® Content Manager V5.x. Consult the Hardware and Software Guide, at the web address below, for complete information regarding application server and operating system combinations and patches supported.

<http://www.ibm.com/support/docview.wss?rs=3278&uid=swg27013654>

#### ***Software requirements***

IBM Enterprise Records V5.1.2 software requirements are consistent with IBM FileNet Content Manager V5.x. Consult the Hardware and Software Guide, at the web address below, for complete information regarding application server and operating system combinations and patches supported.

<http://www.ibm.com/support/docview.wss?rs=3278&uid=swg27013654>

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

### **Planning information**

---

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express®. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of

Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

## **Security, auditability, and control**

---

IBM Enterprise Records uses the security and auditability features of the host software.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

---

## **Ordering information**

This product is only available via Passport Advantage . It is not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software Value Plus.

For more information about IBM Software Value Plus, visit

[http://www.ibm.com/partnerworld/page/svp\\_authorized\\_portfolio](http://www.ibm.com/partnerworld/page/svp_authorized_portfolio)

To locate IBM Business Partners for Software Value Plus in your geography for a specific Software Value Plus portfolio, visit

## Charge metrics definitions

### User Value Unit (UVU)

UVU is the metric by which this program is licensed. UVU entitlements are based on the number of users for the given program. A Proof of Entitlement (PoE) must be obtained for the appropriate number of UVUs required for your environment as defined by the specific program terms. The UVU entitlements are specific to the program and may not be exchanged, interchanged, or aggregated with UVU entitlements of another software program. UVU licensing offers price benefits for customers by enabling a lower cost of incremental growth of resources. To

understand these benefits of UVU licensing, and to determine how many UVUs to obtain for the program, contact your IBM representative.

A Value Unit is a pricing charge metric for program license entitlements which is based upon the quantity of a specific designated measurement used for a given program. Each program has a designated measurement. The most commonly used designated measurement is a processor core. However, for select programs, there are other designated measurements such as users or resources which may include servers, client devices, and messages. The number of value unit entitlements required for a program depends on how the program is deployed in your environment and must be obtained from a value unit table. You must obtain a PoE for the calculated number of value unit entitlements for your implementation. The value unit entitlements are specific to a program and may not be exchanged, interchanged, or aggregated with Value Unit entitlements of another program.

At all times, the number of users accessing the program or any component of the program in any manner, directly or indirectly (for instance, via a multiplexing program, device, or application server) or through any other means must not exceed your entitlement to use the program, as indicated on the applicable PoEs.

**Authorized (AUVU):** For selectively licensing internal users within your organization. The number of AUVUs you require is based on the number of authorized users within your organization that may access the program or whose user content may be analyzed using the program in any manner at set forth in the AUVU license conversion table.

An Infrequent User means an Authorized User who accesses the program no more than 120 times a year. Access is defined as any interaction between the Authorized User and the program, or any action performed on behalf of the Authorized User by the program, lasting no more than 15 consecutive minutes.

**Employee (EUVU):** For collectively licensing all of your internal users. The number of EUVUs you require will be based on the number of employees in your Enterprise as set forth in the EUVU license conversion table.

**Enterprise:** An Enterprise includes any legal entity that, by more than 50%, owns, is owned by, or is under common ownership with the licensee. The licensee is the legal entity that is authorized to execute and administer this agreement on behalf of an enterprise. The licensee need not be a 'company' and may be the entire enterprise.

### **Resource Value Unit (RVU)**

RVU is the unit of measure by which this program is licensed. RVU entitlements are based on the quantity of a specific designated measurement for the given program. A PoE must be obtained for the appropriate number of RVUs required for your environment as defined by the specific program terms. The RVU entitlements are specific to the program and may include, but are not limited to the following: Client Devices, data source records, messages, and servers, and may not be exchanged, interchanged, or aggregated with RVU entitlements of another program. To understand these benefits of RVU licensing, and to determine how many RVUs to obtain for the program, contact your IBM representative.

### **Cumulative Entitlements**

UVU based on Authorized User, UVU based on Employee User, and RVU based on Eligible Participant entitlements are not alternative means for licensing the program. Licensee must obtain: (a) sufficient Authorized User UVU entitlements to cover any licensee employee (which for the purpose of this paragraph includes any non-employee who is paid by or acting on behalf of licensee's Enterprise) who is given access to the program, or sufficient Employee User UVU entitlements to cover all employees whether or not they are given access to the program; and (b) sufficient Eligible Participant RVU entitlements to cover any non-Employee Users of the program.

## Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

## **Licensing**

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage , where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

## **License Information form numbers**

Program name	Program number	Form number

IBM Enterprise Records Content Collector Edition V5.1.2	5724-S19	L-VSAY-9B224V

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/slabd.nsf>

## **Limited warranty applies**

Yes

## **Limited warranty**

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

## **Program technical support**

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM , including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

**Money-back guarantee**

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

**International Passport Agreement****Volume orders (IVO)**

No

**Passport Advantage applies**

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage . It is not available as shrinkwrap.

**Software Subscription and Support applies**

Yes. Software Subscription and Support is included with licenses purchased through Passport Advantage and Passport Advantage Express . Product upgrades and technical support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

### **System i® Software Maintenance applies**

No

### **Educational allowance available**

Not applicable.

### **Statement of good security practices**

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

## **IBM Electronic Services**

---

Electronic Service Agent™ and the IBM Electronic Support web portal are dedicated to providing fast, exceptional support to IBM Systems customers. The IBM Electronic Service Agent tool is a no-additional-charge tool that proactively monitors and reports hardware events, such as system errors, performance issues, and inventory. The Electronic Service Agent tool can help you stay focused on your company's strategic business initiatives, save time, and spend less effort managing day-to-day IT maintenance issues. Servers enabled with this tool can be monitored remotely around the clock by IBM Support all at no additional cost to you.

Now integrated into the base operating system of AIX® V5.3, AIX V6.1, and AIX V7.1, Electronic Service Agent is designed to automatically and electronically report system failures and utilization issues to IBM , which can result in faster problem resolution and increased availability. System configuration and inventory information collected by the Electronic Service Agent tool also can be viewed on the secure Electronic Support web portal, and used to improve problem determination and resolution by you and the IBM support team. To access the tool main menu, simply type `smitty esa_main`, and select `Configure Electronic Service Agent` . In addition, ESA now includes a powerful Web user interface, giving the administrator easy access to status, tool settings, problem information, and filters. For more information and documentation on how to configure and use Electronic Service Agent , refer to

<http://www.ibm.com/support/electronic>

The IBM Electronic Support portal is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. This portal enables you to gain easier access to IBM resources for assistance in resolving technical problems. The My Systems and Premium Search functions make it even easier for Electronic Service Agent tool-enabled customers to track system inventory and find pertinent fixes.

### **Benefits**

---

**Increased uptime:** The Electronic Service Agent tool is designed to enhance the Warranty or Maintenance Agreement by providing faster hardware error reporting and uploading system information to IBM Support. This can translate to less wasted time monitoring the symptoms, diagnosing the error, and manually calling IBM Support to open a problem record. Its 24 x 7 monitoring and reporting mean no

more dependence on human intervention or off-hours customer personnel when errors are encountered in the middle of the night.

**Security:** The Electronic Service Agent tool is designed to be secure in monitoring, reporting, and storing the data at IBM . The Electronic Service Agent tool securely transmits either via the Internet (HTTPS or VPN) or modem, and can be configured to communicate securely through gateways to provide customers a single point of exit from their site. Communication is one way. Activating Electronic Service Agent does not enable IBM to call into a customer's system. System inventory information is stored in a secure database, which is protected behind IBM firewalls. It is viewable only by the customer and IBM . The customer's business applications or business data is never transmitted to IBM .

**More accurate reporting:** Since system information and error logs are automatically uploaded to the IBM Support center in conjunction with the service request, customers are not required to find and send system information, decreasing the risk of misreported or misdiagnosed errors. Once inside IBM , problem error data is run through a data knowledge management system and knowledge articles are appended to the problem record.

**Customized support:** Using the IBM ID entered during activation, customers can view system and support information in the My Systems and Premium Search sections of the Electronic Support website at

<http://www.ibm.com/support/electronic>

My Systems provides valuable reports of installed hardware and software using information collected from the systems by Electronic Service Agent . Reports are available for any system associated with the customer's IBM ID. Premium Search combines the function of search and the value of Electronic Service Agent information, providing advanced search of the technical support knowledgebase. Using Premium Search and the Electronic Service Agent information that has been collected from your system, customers are able to see search results that apply specifically to their systems.

For more information on how to utilize the power of IBM Electronic Services, contact your IBM Systems Services Representative, or visit
