

# Withdrawal from marketing and support discontinuance: IBM Informix Dynamic Server V7.31, V9.40, and V10 — Some replacements available

Description .....2  
Installation support .....16

---

## Overview

---

Effective on the dates listed below, IBM will withdraw from marketing part numbers from the following product releases licensed under the IBM International Program License Agreement:

Program number	VRM	Withdrawal from marketing date	Program release name
5724-C17	9.40.0	4/18/08	Informix™ Dynamic Server (IDS) V9.40.0
5724-D13	7.31.0	9/19/08	Informix Dynamic Server 7 V7.31.0
5724-L23	10.0.0	9/18/09	Informix Dynamic Server V10.0.0

On or after that date, you can no longer obtain the withdrawn products directly from IBM. They may be obtained on an as-available basis through IBM authorized remarketers.

Effective on the dates listed below, IBM will withdraw support from the following product releases licensed under the IBM International Program License Agreement:

Program number	VRM	Withdrawal from support date	Program release name
5724-C17	9.40.0	4/30/09	Informix Dynamic Server
5724-D13	7.31.0	9/30/09	Informix Dynamic Server 7
5724-L23	10.0.0	9/30/10	Informix Dynamic Server

You can upgrade to the available releases of IDS V10 or IDS V11. The new releases contain significant enhancements, performance improvements, and the latest hardware platform support. The performance improvements from IDS V7.31 to V11 have been measured at 30% to 40%. IDS V11 offers you a range of high availability options to ensure business continuity, offering 24x7x365 availability while optimizing your infrastructure investments, greater levels of data security, and further reduction in cost of administration and ownership. IDS has built-in capabilities to facilitate upgrades. You can perform an inline upgrade directly from IDS V7.31 or V9.4 to IDS V10 or V11 in a very short period of time without significant impact to your business.

IBM Informix Dynamic Server 7 and IBM Informix Dynamic Server (IDS) are two separate products. IDS 7 customers who want to move to IDS V10.x or later may do so by purchasing an IDS trade-up license. See the list of trade-up products below. The replacement products in the Description section identify the corresponding trade-up replacement products to move to IDS.

A trade-up license is required to trade-in the IDS 7 licenses to IDS. After IDS 7 withdraws from marketing on September 19, 2008, a trade-up

quote will be sent to IDS 7 customers at renewal time. Customers should contact their IBM representative to initiate the trade-up.

The list of IDS trade-up licenses are:

For more information on the latest IDS has to offer, visit

<http://www.ibm.com/informix>

The IDS 11.50 release will supersede IDS 11.10. Customers are advised to move to IDS 11.50.

For information on IDS 11.50 and order information, refer to Software Announcement [208-093](#), dated May 6, 2008.

For information on IDS V11.10, refer to Software Announcement [207-130](#), dated June 12, 2007.

IBM Informix Dynamic Server V11 delivers continuous and global availability, highest OLTP performance, and lowest total cost of ownership for today's mission-critical applications.
