Withdrawn programs

Statement of direction

IBM intends to remove the Batch Runtime component from IBM z/OS^(R) (5650-ZOS). The z/OS Batch Runtime component provides the framework for JavaTM interoperation with COBOL and PLI, with transactional updates to IBM DB2^(R) and Transactional VSAM. It is recommended that you use IBM WebSphere^(R) Application Server JSR 352 instead.

IPLA products: Versions to be withdrawn
