    - IBM Sametime®
    - IBM WebSphere® Portal®
    - IBM Web Content Manager®

- **Hybrid**

- **Partner Offerings**
New “Discover” Page: Goals

1. Replace the “Home” and “Getting Started” pages to give more value to end users
2. Provide easier access to IBM's documentation resources, some of which are on the web
3. Help users understand and find the powerful features of Notes:
   - Smaller chunks of information
   - Bring user right to Preferences panel/tab for setting
   - Different media/learning styles: Help (read), Video (view), and Open dialog (Do)
4. Orient the presentation of the information toward tasks and problem solving
“Discover” page
Explanations of all the new features, including video and click-through tutorials

End-users introduced to the new features by the product itself – first time in Notes history!
Notes 9.0 Social Edition

Social Theme: cleaner, more modern look, adopted across IBM product line for UI consistency

Enhanced Search

Shortcuts

“Group By” and “Show Beginning”

Abbreviated dates

Embedded Experiences
Notes 9.0 Social Edition

IBM Notes Browser Plugin –
Make your Browser your Notes Client
Notes Browser Plug-in

- Designed to easily extend applications previously available only to Notes users out to web browser users, as well
- Provides a powerful compliment to existing XPages capabilities
- Allows applications to run in a browser with no modification!
- Lightweight install, similar to other plug-ins in size, deployment time and configuration requirements

- Minimal limitations:
  - Windows only (for now, at least!)
  - Not designed to support mail template, rather, to work in conjunction with iNotes
  - Firefox and Internet Explorer along with Citrix, in first release

- Licensing: Enterprise CAL, CEO Communications, Collaboration Express

BOTTOM LINE: “...the beauty of this is for the users who want to use iNotes and could not access their apps before. This solution is for them and not for someone who wants to use the plug-in instead of the standard Client with a lower footprint...”

- Raj P.
...and even this!

The information contained in this publication is provided for informational purposes only. While efforts were made to verify the completeness and accuracy of the information contained in this publication, it is provided AS IS without warranty of any kind, express or implied. In addition, this information is based on IBM’s current product plans and strategy, which are subject to change by IBM without notice. IBM shall not be responsible for any damages arising out of the use of, or otherwise related to, this publication or any other materials. Nothing contained in this publication is intended to, nor shall have the effect of, creating any warranties or representations from IBM or its suppliers or licensors, or altering the terms and conditions of the applicable license agreement governing the use of IBM software.

References in this presentation to IBM products, programs, or services do not imply that they will be available in all countries in which IBM operates. Product release dates and/or capabilities referenced in this presentation may change at any time at IBM’s sole discretion based on market opportunities or other factors, and are not intended to be a commitment to future product or feature availability in any way. Nothing contained in these materials is intended to, nor shall have the effect of, stating or implying that any activities undertaken by you will result in any specific sales, revenue growth or other results.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon many factors, including considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve results similar to those stated here.

All customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics may vary by customer.
