**Do not use “individual account” self-service if...**

- **Your company has a Passport account and qualifies for volume-based “level” pricing (the individual account self-service process only lets you purchase at the MSRP). Instead use your company’s Passport Express account, or engage with an IBM sales rep**
- **You want to purchase trade-ups (trade-up part numbers are not available via self-service – an IBM sales rep must be involved to verify that you have the necessary active entitlement(s) available to surrender for the trade-up**

## Create, maintain and modernize applications on IBM i

[Download the trial](#)

IBM® Rational® Developer for i is an integrated development environment (IDE) built on the Eclipse platform. Designed for creating and maintaining applications on IBM i systems, it resides on the developer's desktop, supporting development in both host-connected and disconnected modes.

The three editions of IBM Rational Developer for i represent the evolutions of products previously marketed under the following names: IBM Rational Developer for Power Systems Software RPG and COBOL Tools for i, IBM Rational Developer for Power Systems Software Power Tools for i, and IBM Rational Developer for i for SOA Construction.

Rational Developer for i helps derive more value from software development resources.

- **Increased developer productivity**—using a rich set of development tools.
- **Increased business agility**—by integrating the development tools into the widely used Eclipse framework, and by supporting multiple approaches to RPG and COBOL application modernization.
- **Increased team efficiency**— enabled through integration with IBM Rational Team Concert™ to support planning and management of the application lifecycle process.
- **Flexible packaging**— offers three purchase options:
  - RPG and COBOL Tools
  - RPG and COBOL + Modernization Tools, Java Edition
  - RPG and COBOL + Modernization Tools, EGL Edition
