

Release Notes

Product: IBM Security Guardium Insights
Release version: Guardium Insights 3.2.3
Completion date: December 2022

This patch of IBM Security Guardium Insights contains various fixes.

IBM Security Guardium Insights is a hybrid cloud data security hub that helps you improve visibility into user data activity and risk. Guardium Insights helps you protect data more efficiently, enhance information technology flexibility, and reduce operational costs as you embrace new business paradigms (such as moving data to the cloud). Guardium Insights helps reduce the cost and complexity related to collecting, managing, and retaining data security and compliance data. It provides new analytics to enhance threat investigations - and it provides quick reporting functionality (including pre-built reports). Risk scoring and alerting in Guardium Insights help you prioritize your activities.

IBM Security Guardium Insights is a powerful tool that can help you secure your data. Simple to use, Guardium Insights allows you to set up connections to your data sources.

Guardium Insights provides tools to help you analyze data:

- Outlier mining: Detect anomalies in activities and exceptions.
- Risk events: Identify assets at risk using broad data points.
- Reports: Dive into the raw data for deep investigation.

Download Guardium Insights v3.2.3

Guardium Insights V3.2.3 can be downloaded as an archive file (ibm-guardium-insights-2.2.3.tgz) from:

<https://github.com/IBM/cloud-pak/blob/master/repo/case/ibm-guardium-insights/2.2.3/ibm-guardium-insights-2.2.3.tgz>

You can install only the products for which your site is entitled.

For further instructions, read the README.md file located after unzipping the latest tar file.

The Quick Start Guide for this offering is available at Passport Advantage (<https://www.ibm.com/software/passportadvantage>) (search for Part Number “M03VRML”).

Installing Guardium Insights v3.2.3

Before installing Guardium Insights, review the system requirements:

http://ibm.com/docs/SSWSZ5_3.2.x/sys_req.html

This offering is deployed as a new installation of Guardium Insights – or as a patch. Please follow these instructions:

- Prepare for installing:
http://ibm.com/docs/SSWSZ5_3.2.x/install_prep_insights.html
- New installation of Guardium Insights:
http://ibm.com/docs/SSWSZ5_3.2.x/install.html
- Upgrading Guardium Insights to Version 3.2.3:
 - If your current version of Guardium Insights is Version 3.1.x, you must upgrade to Version 3.2.0 and then follow the link below for patching to Version 3.2.3.
 - If your current version of Guardium Insights is Version 3.2.x:
http://ibm.com/docs/SSWSZ5_3.2.x/install_insights_patch.html

Security fixes

Vulnerability IDs are listed at <http://cve.mitre.org/cve/>.

Issue key	PSIRT	Vulnerability ID/Description
INS-25903	PVR0406278	CVE-2022-4065

Performance and other fixes

Issue key	Description
INS-25338	Guardium Insights is missing custom relative date filters that allow scheduled jobs to go back a long period of time.
INS-24933	Cannot backup and restore Guardium Insights after upgrading to Version 3.2.1.

Known limitations and workarounds

This patch of Guardium Insights carries forward the known limitations and workarounds from Guardium Insights Version 3.2. You can find the list of limitations in the [release notes](#) for that version.

In addition, this patch includes this known limitation:

Guardium Insights component	Issue key	Description
Installation and upgrade	INS-26355	When upgrading Guardium Insights from one version to the next version, feature flag changes (or updates) may reset to their default values. This can create issues with on-premise customer workflows. Workaround: Have your system administrator use the Swagger API to update the feature flag to the desired value with every version upgrade.
	INS-25447	Cannot restore a backup of Guardium Insights Version 3.2.0 to Version 3.2.x. Workaround: Restore the backup to Version 3.2.0 and then upgrade Guardium Insights from Version 3.2.0 to 3.2.x.
