## 1.0 Critical Information

This section lists the critical issues that were known when this readme was published. For critical information found later, go to the Knowledge Center portion of the [Empower Product Support Web site](#).

None.

## 2.0 Known Issues

This section lists issues that were known when this readme was published. For known issues found later, go to the Knowledge Center portion of the [Empower Product Support Web site](#).

None.

## 3.0 Usage Notes

This section highlights product limitations and changes to product behavior introduced in this release.

The installation instructions contained in *webMethods OFTP Adapter Installation Guide* have been superseded. Please use the instructions below in section [4.4 Documentation Changes](#) to properly install the adapter using webMethods Installer.

## 4.0 Fixes and Enhancements

This section describes the fixes and enhancements included in webMethods OFTP Adapter 7.1.

### ***4.1 Fixes and Service Packs Included in This Release***

This section lists the fixes and service packs for previous releases that have been included into the current release. If only some issues in a fix or service pack have been included, that partially included fix or service pack is not listed here, and those issues are listed separately in [Section 4.2 Resolved Issues](#). See the Knowledge Center section of the [Empower Product Support Web site](#) for more information about fixes and service packs.

None.

### ***4.2 Resolved Issues***

This section lists issues that were resolved in this release and that are not included in the fixes and service packs listed in [Section 4.1 Fixes and Service Packs Included in This Release](#). These issues might have been resolved in a fix or service pack that was not included in its entirety into this release, or they might have been resolved since the last fix or service pack was released.

None.

## 4.3 Enhancements

None.

## 4.4 Documentation Changes

This section describes significant changes to the documentation, such as the addition, relocation, or removal of product guides, online help, chapters, or other major content.

- **Platform support information:**

The platform support information for the OFTP Adapter packages contained in *webMethods OFTP Adapter Installation Guide* have been superseded by the information in the *webMethods Adapters System Requirements* document, posted on the [Software AG Documentation Web site](#).

- **Changes to the installation instructions:**

The instructions to install the OFTP Adapter packages contained in the *webMethods OFTP Adapter Installation Guide* have been superseded by the instructions in this section. You now use the webMethods Installer to install the adapter instead of using the manual method described in the documentation. Use the instructions below to replace the instructions in “Stage 2 Install the OFTP package” and “Stage 3 Install the OFTPforTN package.”

**About webMethods OFTP Adapter Packages**

webMethods OFTP Adapter has two packages to be installed: OFTP (OFTP Gateway package) and OFTPforTN (OFTP for Trading Networks package). Where you install the packages depends on whether you are using a DMZ:

- If you are using a DMZ, install the OFTP package on the machine within the DMZ. This machine is referred to as the *OFTP Gateway*. Install the OFTPforTN package on the machine outside the DMZ. You will need to run the Installer on each machine, as described in the instructions below.
- If you are not using a DMZ, install both the OFTP package and OFTPforTN package on the same machine.

**To install the webMethods OFTP Adapter**

1. Download the webMethods Installer from the [Empower Product Support Web site](#).
2. If you are going to install the adapter on an already installed Integration Server, shut down the Integration Server.
3. Start the webMethods Installer.
4. Choose the webMethods release from which to install the adapter. If you are installing the adapter on an existing Integration Server, choose the release that matches the release of that Integration Server. For example, if you are installing the adapter on a 7.1 Integration Server, choose the 7.1 release.
5. Specify the Software AG installation directory as the adapter installation directory. If you are installing the adapter on an existing Integration Server, specify the Software AG installation directory that contains that Integration Server.

The installer will install the adapter packages in the <IntegrationServer\_directory>/packages directory.

6. In the product selection list, go to **Adapters > webMethods OFTP Adapter 7.1**, and then select the packages:
  - Select **OFTP** (if this machine is within the DMZ).
  - Select **OFTP For TN** (if this machine is outside the DMZ).
  - Select **OFTP** and **OFTP For TN** (if you are not using a DMZ).
7. Select and install any required webMethods products that are not already installed, such as webMethods Developer.
8. After installation completes, start the Integration Server on which you installed the adapter.
9. If you are using a DMZ, repeat steps 1–8 to install the remaining package on the appropriate machine.
10. Follow the instructions in the *webMethods OFTP Adapter Installation Guide* to configure the adapter.

## **4.5 Terminology Changes**

This section lists terminology that has changed since the last full release of the product.

None.

## **4.6 Deprecated or Removed Items**

This section lists product functionality that has been deprecated since the last full release of the product. Deprecated Built-In services and APIs are listed in the relevant sections that follow this one.

None.

## **4.7 Added, Removed, Deprecated, or Changed Built-In Services**

This section lists Built-In services that have been added, removed, deprecated, or changed since the last full release of the product.

None.
