1 webMethods Module 10.5 for HL7

IBM announces the release of webMethods Module 10.5 for HL7. This module helps IBM customers to seamlessly exchange, integrate, share, and retrieve electronic health information. It complements the webMethods HIPAA Module and extends IBM's support for messaging standards in the healthcare industry.

MLLP with TLS 1.2 and TLS 1.3 support

The webMethods Module 10.5 for HL7 supports MLLP with the latest versions of Transport Layer Security (TLS) versions TLS 1.2 and TLS 1.3 for secured exchange of HL7 messages.

Platform Support

For the most up to date information about the software and operating systems that the eStandards supports, see the IBM webMethods eStandards System Requirements document, available at documentation website (<https://docs.webmethods.io/>).

This document applies to webMethods Module 10.5 for HL7 and to all subsequent releases. Specifications contained herein are subject to change and these changes will be reported in subsequent release notes or new editions.
