

Protect your withdrawn hardware with IBM extended support

Keep your IBM equipment productive after withdrawal with an IBM Hardware Support Extension from IBM Technology Support Services

There are many reasons why you may need to keep withdrawn machines operating in your IT environment — purchasing delays, development and test cycles, lagging migration projects.

IBM offers a continued service extension support agreement so that you can protect your current hardware investment while planning your budget more easily.

A hardware support extension helps you achieve key goals

Continue using existing servers, storage units and other hardware for longer

Gain time to complete technology upgrades

Obtain time for better capital expenditure planning

Avoid business delays, lost data and declines in revenue and productivity

Retain shareholder trust, consumer confidence and customer loyalty

Support your IT infrastructure while keeping IT staff focused on business-critical goals

Here's what you can gain from an IBM Hardware Support Extension

World-class support for your hardware beyond the withdrawal date

Agreements tailored to what your organization needs no matter its size

Uninterrupted hardware extension support that is globally consistent

No one knows your hardware environment better than IBM

IBM Technology Support Services specialists understand not only your hardware but also how that technology fits into your entire IT environment.

This in-depth knowledge and experience make it easier for IBM to provide Level 1 and Level 2 support, including existing microcode fixes and patches. The service also covers parts replacement, depending on availability.
