

Why IBM Application Security?

IBM® is recognised as a market leader in the Application Security space, including:

- 2017 Gartner Magic Quadrant for Application Security Testing
- Forrester Wave: Application Security, Q4 2014.

Our solutions permit you to:

- Test applications for security vulnerabilities early in their development lifecycle, when remediation of defects is less expensive
- Classify and prioritise application vulnerabilities to focus on the most significant potential threats and remediate them
- Monitor progress of your app security protection program and provide progress reports to key stakeholders.

Core capabilities to fortify your network

Risk Management

Cognitive Security

DevOps

Mobile Application Security

What clients are saying

Progressive Insurance:

‘It makes us not only able to look for things they might have done wrong, but it actually allows us to do it quicker and watch for vulnerabilities in our code. It makes us more secure from an application basis.’

Individual Restaurants:

‘I’ve been absolutely blown away with the level of detail and the recommendations the solution provides. It’s definitely a brilliant product.’

Concur Technologies:

‘IBM AppScan makes certain that we can stay secure and our applications work the way they’re expected to. We get complete coverage of anything that rolls into production.’
