

Language Acquisition Solution

Transform your assessment administration to make informed instructional decisions - that have a real impact on student achievement.

Highlights

- One effective system that provides immediate, accessible, and actionable data.
- Interpret and analyze data within a classroom and across the district to make informed & timely instructional decisions.

Informed decision making, whether to personalize the learning or improve operational efficiencies, requires accessible, accurate data. The tools to analyze this data are now available and usable by school and district / division administrators. However, much of the data required for good decision making remains inaccessible, residing in spreadsheets and files on individual or departmental computers or is still paper based. Effective use of data to inform decisions requires that this data be digitally captured, and role-based access be provided.

To support school districts in their journey to capture and interpret assessment data, IBM K-12 is working with the Canadian company, **clevr**, a cloud-hosted electronic data collection template solution. Combining **clevr's** industry leading solution with IBM's K-12's expertise in strategic planning and effective implementation services will ensure that your investment in **clevr** will be successfully adopted by all initial target stakeholders and provide a strategic roadmap that will grow your use of **clevr** across your organization, providing insights into student achievement, student services, and corporate services. Our team of highly qualified consultants will work closely with your senior team to identify an adoption and onboarding plan for each identified use case.

The Solution includes (but is not limited to) the following literacy screening tools:

- Quick Phonological Awareness Screener (QPAS)
- Letter (Alphabetic) Recognition and Phonics Screener
- Phonological Awareness Screening Test (PAST)
- Reading Records: Fountas and Pinnell Benchmark Assessment (F&P)
- Tiered Reading Interventions
- Empower Curator
- CML Lexia
- Levelled Literacy Intervention (LLI)
- DIBELS
- Oral Reading Fluency
- Nonsense Word Reading Fluency
- Word Reading Fluency

Driving Success

IBM K-12 consultants will work closely with district executives and staff to create and execute a plan that is implemented on time and on budget. Our white-glove services include:

- Forms Identification / Creation:
 - Identify which forms you will initially implement within clevr, facilitating the design, creation, and provisioning of the form within clevr
- Forms Implementation and Adoption:
 - Co-create, and co-deliver, an effective communication and professional learning plan to build awareness and understanding of when, where and how to access and use clevr and forms as well as the benefits to users
- Monitoring for Effective Use:
 - Ensure all forms currently implemented are used as planned by monitoring the adoption, use and impact of the various clevr forms. Recommendations for further refinements will be gathered and reported back for consideration.
- Expanding your clevr Reach:
 - IBM K-12 consultants will work with district personnel to identify new form requirements, assign a priority order to their development and implementation, and co-create an implementation and monitoring plan.

Typical Length and Price of Engagements: These white-glove services are available based on a block of hours, sold by clevr or IBM directly. Pricing is available upon request.

Why IBM?

The IBM Canada K-12 Teaching and Learning Consulting team has market-leading alliances with Canadian educational software vendors. Our dedicated Education Consultants provide strategic services to support your projects. Together, we deliver success through every phase of a project from strategy and design to implementation, delivery, and monitoring. Your projects are accelerated and strengthened through our partnerships and unparalleled education experience.
