

User Adoption Toolkit

The User Adoption Toolkit for Connections is a robust end user training solution designed to make users more productive and lower support costs. It quickly teaches the essential skills needed by new employees to execute on key tasks or by experienced employees to increase their productivity through the use of new features.

The User Adoption toolkit is an enabler to the adoption of Connections and the collaboration tools within an organization. It includes:

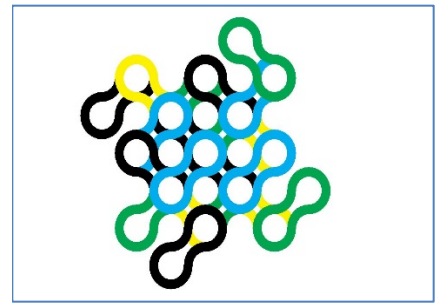

Animated & well structured

Every tutorial is fully animated with audio and step-by-step text. Has Multimedia library of short training videos. It is available for IBM Connections

Multi-language Support

The tool kit is available in multiple languages: English, Spanish, French and German languages

Pre-Built Courses

Has pre-built short courses, Quick reference guides Customizable training guides and lessons

The User Adoption toolkit is the best way to enable a productive workforce and support it in updating its skills in this continuously transforming cloud world. Support your users, your instructors if you plan to conduct training sessions, your service desk agents, with this thorough and always up-to-date adoption toolkit.
