Welcome to Think 2019!

This year, IBM's Think conference will move to its new home in San Francisco. From February 11th through 15th, 2019, you'll benefit from more than 160 Security & Resiliency Campus sessions at Think, including client presentations, panel discussions and solution demonstrations.

This guide provides you with a convenient rundown of activities and educational opportunities at Think.
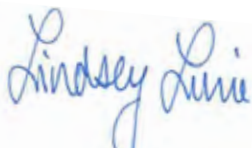

IBM Security event highlights include the following:

- Our featured "Trends & Directions" session on February 12th at 1:30pm in the Yerba Buena Theater, where IBM Security General Manager Mary O'Brien will discuss how cybersecurity is essential to empowering your organization's digital transformation. Immediately following the session, you'll hear from our CEO Ginni Rometty, as she shares game-changing client transformation stories.

- An immersive Campus experience, where you can partake in hands-on demos, test your knowledge with engaging activations and interact with dozens of IBM subject matter experts and Security partners.

- Celebrate your visit to San Francisco by savoring local cuisine, enjoying live entertainment and unwinding with your friends and colleagues at our "Think by the Bay" experience at Pier 39 on February 14th.

If you or your colleagues haven't had the opportunity to register for the event, register now.
Be sure to follow our social handles at the event and engage in the conversation in February: #IBMThink2019 | @IBMSecurity @IBMServices.

I look forward to seeing you in San Francisco!

Cybersecurity Trends & Directions

Trends & Directions sessions feature IBM visionary leaders, clients, and guests in a discussion of how you, along with IBM, can solve the biggest problems facing your organization and your industry.

Client and business partners are welcome to view the session in the Yerba Buena Theater and Yerba Buena Forum. IBMers are welcome to view in the satellite viewing locations in Think Park.

Tuesday, February 12

TIME	TITLE	SPEAKER
1:30 – 2:10 PM	**Innovation Doesn't Happen Without Security. And Security Needs Innovation.** Why do we put seat belts, or brakes, or air bags on a Ferrari? Because customers want the exhilaration of driving at high speeds, but with the confidence that they're safe doing so. It's the same with your business. Innovation doesn't work without security. You may not be building Ferraris, but you are developing solutions for your clients that use the cloud, IoT, mobile and AI. But snazzy apps alone won't differentiate you. What will is your ability to use security as a powerful enabler of corporate innovation, while ensuring your client's privacy and security. Hear from IBM clients that demonstrate how they have successfully leveraged security to spur innovation, release secure applications more effectively, and how the security market is innovating to remain a step ahead of the changing threat landscape.	Danica Patrick, Entrepreneur and Former Professional Race Car Driver Mary O'Brien, General Manager, IBM Security Andy Powell, Chief Information Security Officer, Maersk Kevin Baker, Westfield Insurance

Community Day

February 11, 2019

IBM Community Day, on February 11 at the Moscone Center South, is a special event that gets you access to our power users, champions, customer advisory councils and advisory boards. These communities help you make the most of your security program and investments through engagement, education and experience sharing. You'll see firsthand how others are using IBM Security tools to solve problems in today's increasingly dynamic environment.

This brand new experience includes 10 User Group meetings for QRadar, MaaS360, BigFix, Guardium, Trusteer, Application Security, Identity and Access Management, Resilient, i2 & zSecure. These independent communities thrive on networks and knowledge, sharing the latest best practices in collaborative settings to help meet new challenges, share concerns and provide a platform for peer-to-peer communication.

User group agendas will include:

- Product updates and roadmaps
- Tips and tricks for tuning your deployment
- Customer roundtables and networking
- Demos and best practices

You'll gain new ideas to help solve some of your most pressing business challenges and enjoy a day of networking with your peers before the main conference begins.

Community Day Agenda

- 8:30 – 9:00 AM   Registration
- 9:00 – 12:00 PM   Security User Group Meetings
- 12:00 – 1:00 PM   Lunch
- 1:00 – 3:00 PM   Security User Group Meetings
- 3:30 – 4:30 PM   Keynote Address
- 5:00 – 6:00 PM   Pushing the Frontiers of AI: Project Debater
- 6:30 – 9:30 PM   Reception

Movie at Think — Dark Web: Fighting Cybercrime

Catch a special screening of the Science Channel documentary

Session 7822
Thursday, February 14
AMC at Metreon, Level 3, Theater 16
9:30am – 10:10am

All attendees welcome!

The annual cost of cybercrime has grown to more than $6 trillion, according to Cybersecurity Ventures. What can turn the tide? Science Channel's feature documentary "Dark Web: Fighting Cybercrime" investigates cybercrime trends and the security industry's battle to take back our digital infrastructure and protect the global economy. In this film, IBM Security experts and industry thought leaders explore the rise of cybercrime from the dawn of the internet to today's complex attacks. It also looks inside innovative new approaches to security, including the use of artificial intelligence to detect attacks and simulated breaches to prepare companies to respond to a cyber incident. Go behind the scenes of the fight against cybercrime.
