Boosts performance

and improves the user experience with easily configurable cloud infrastructure

Offers flexibility

to meet specific customer needs and scale as needed

Keeps costs low

by sharing video content and data among data centers worldwide for no additional charge

Solution component Services

- SoftLayer®

Business challenge: nViso SA sought a high-performance cloud hosting infrastructure to extend its emotion recognition solutions to a global customer base.

Solution: Using shared SoftLayer® server resources, nViso provides emotion analytics service offerings to approximately 30 companies worldwide. Additionally, the organization provisions dedicated SoftLayer infrastructure to support customers integrating nViso emotion recognition capabilities into their own products, services and marketing campaigns.

“[SoftLayer is] more cost-effective and improves the performance and overall user experience of our solutions.”

—Tim Llewellynn, nViso chief executive officer and co-founder
