

# What can DB2 Analytics Accelerator do for your organization?

The DB2 Analytics Accelerator transforms your mainframe into a highly-efficient transactional and analytics processing environment. Plug the Accelerator into your existing infrastructure and get answers to the most complex queries up to 2000X faster.

This enables you to exploit your z Systems data at the right time to take advantage of new opportunities to improve efficiency, drive smarter outcomes and gain competitive differentiation.

## Rapidly accelerate business critical queries

A global reinsurance company now delivers insight to users

**70%** faster

## Simplify complex infrastructures and minimize ETL

Organizations keeping analytics data on z Systems can reduce ETL expense

**88%** cost savings

## Derive insight from z/OS transaction systems

A bank now does hourly analytic sweeps reducing fraud costs

**\$2M+** per month

## Improve access to historical data and lower storage costs

A bank improves customer satisfaction with account insight delivered in

**Seconds** rather than days

**Accelerate your business into the future  
with the DB2 Analytics Accelerator.**
