

**“SoftLayer brings a value-add to our business proposition. Customers know they can expect performance and stability.”**

—Bilal Nanhuck, Director of Sales Development, Naveo

### Business challenge

Supporting its cornerstone fleet management platform with a traditional hosting solution, Naveo suffered from downtime that affected service delivery.

### Transformation

After testing SoftLayer® cloud technology, Naveo migrated from its GoDaddy hosting platform to a SoftLayer environment. Provisioning powerful SoftLayer bare metal server infrastructure, the business launched Naveo One, an all-in-one solution offering telemetry, telematics and geographic information system (GIS) capabilities.

Naveo

### Business benefits

**Eliminates downtime**  
and improves service with SoftLayer technology designed for dependable performance

**Reduces IT burden**  
and frees IT staff to focus on business-critical activities

**Enhances value proposition**  
by backing its offering with a trusted global cloud hosting brand

# Naveo

## Eliminating downtime and enhancing service with a SoftLayer cloud platform

Established in 2007 and located in Moka on the island nation of Mauritius, Naveo specializes in fleet management solutions. The business provides tracking tools designed to help customers dispatch vehicles more effectively, improve worker performance and reduce operating costs.

### Solution component

- SoftLayer®
