

IBM TS7700 Grids for Cloud Storage — Designed for z Systems™

Adding TS7700 to your mainframe cloud can help your company find efficiencies that will let you fund and manage new initiatives in a secure cloud environment

Multiple z Systems host have access to all data in grid

Up to eight TS7700 systems can provide a flexible grid for high-availability and disaster recovery

Efficient

- Improved ROI for storing critical data
- Reduced data management time and effort
- Improved economics for data analytics

Scalable

- Nearly unlimited capacity on demand
- Reduced access time for near-line and off-line data
- Dependable data access

Secure

- Access to all data with nearly transparent disaster recovery
- Network protection with offline storage tiers
- Data protection with encryption and WORM
