

IBM i Solution Editions

Solutions built for business, combining industry-leading applications with IBM i and Power

Highlights

- Completely integrated solutions for small and midsize businesses through partnerships with industry-leading ISVs, backed by superior services and support
 - Simplified, flexible, and highly secure infrastructure with the capacity to manage growth and integrate new functions maximizing ROI and lowering TCO
 - Mitigates risks associated with adopting new business technologies
 - Speeds implementation time required for deploying new business applications
-

IBM i Solution Editions are designed to help companies take advantage of the combined experience and expertise of IBM and ISVs by building business value into IT solutions. Through innovation and technology leadership, IBM i Solution Editions help provide maximum flexibility in compute consumption and application choice, providing an answer for today's demanding business requirements.

IBM i Solution Editions are a combination of IBM i and Power packages designed to be easily purchased from ISVs leveraging core business applications.

Power10 processor-based servers are the platform for IBM i Solution Editions. With Power10 technology and IBM i, companies will benefit from leading processor speed with an intelligent operating system that minimizes complexity, automates processes, reduces downtime, and enhances security, all while reducing operational costs. The value of Solution Editions can be measured by the total integration delivered by IBM i, Licensed Program Products for IBM i, and application performance, all while delivering a low Total Cost of Ownership. Each IBM i Solution Edition helps to provide the right economic value for companies across a variety of industries. IBM i is built for businesses, allowing companies to manage their organization, not their infrastructure. The combination of IBM i, Power, and industry-leading applications provides simplified, easy-to-manage, high-performance for businesses.

IBM i integrates a relational database (Db2 for i), security, web services, networking, and storage management capabilities. It provides a broad and highly stable database and middleware foundation for efficiently deploying business processing applications, which enables a lower total cost of ownership when compared with other operating environments. Together, IBM i and Power are offered through an extensive, highly skilled, and worldwide network of IBM Business Partners that is backed by IBM's trusted services and support infrastructure.

IBM develops, fully tests, and preloads the core middleware components of IBM i together, helping companies to deploy applications faster and maintain them with fewer staff. IBM i Solution Editions include a services voucher to help provide implementation assistance from IBM or an authorized IBM Business Partner to speed to the implementation of the new business solutions.

The IBM i Solution Edition configuration can be expanded, allowing for flexible quantities of memory, disk, and network adapters to address infrastructure requirements.

IBM i Solution Editions	Power S1014 4-core	Power S1014 8-core
Edition feature codes	4928	4926
Minimum IBM i processor core entitlements required	1	1
Discounted IBM i single user entitlements	Defaulted minimum = 5	Defaulted minimum = 30
No-charge IBM i Access family unlimited users	Defaulted unlimited users	Defaulted unlimited users
Discounted Rational Development Studio	1	3
Rational Developer for i	1	3
No-charge service vouchers	Qty/duration = 1/4 hrs	Qty/duration = 1/8 hrs

Qualifications	Power S1014 4-core	Power S1014 8-core
Must be a new purchase, ordered with an IBM i Solution Edition Feature Code ①	Yes	Yes
Must have proof of purchase for software, support or services from a registered ISV	Yes	Yes
Proof of Purchase from a registered ISV must be dated within 90-day window of hardware order	Yes	Yes
The combined value (software, maintenance, services and training) of the ISV purchase must be:	USD 6,500	USD 25,000
Purchase amount if from one ISV only and cannot be combined from multiple	Yes	Yes
Total ISV purchase amount must be traceable to the specific machine serial number to be applicable	Yes	Yes

The bottom line

Together, IBM and leading ISVs provide solutions that combine the capabilities of IBM i and Power with the strength of business applications, along with superior service and support. Companies choosing IBM i Solution Editions will benefit from:

- Increased insights for more assured decision making
- Enhanced productivity, efficiency, and responsiveness
- Adaptability to business changes
- Competitive TCA and lower TCO
