Typing Standards determine a "word" as 5 characters long.

## Test Taker Typed

Every advance in technology, whether it is significant or minimal, changes the way we **liev** and function in society. At any given time, we have access to millions of resources via computer software **an** the **Inernet.** Fifty years ago, one couldn't fathom the thought of a World Wide Web, **email and** precision robots, etc. Today, however, this

## Original Passage

Every advance in technology, whether it is significant or minimal, changes the way we *live* and function in society. At any given time, we have access to millions of resources via computer software *and* the *Internet.* Fifty years ago, one couldn't fathom the thought of a World Wide Web, *email,* precision robots, etc. Today, however, this *kind of technology is very real and very present. Our society as a whole has adjusted to these technological advances and in many cases, people have used them as a financial benefit; many people make their living off of Web-based companies by selling a particular product through their personal Web site, or by using well-known and secure Web sites such as Ebay and Amazon.*
**The bolded, yellow highlight indicates errors/additions made by the test taker.**
*The italicized, green highlight indicates where in the original passage the test taker made mistakes or did not complete.*

## Test Description

The Typing Speed test measures the speed and accuracy of a user's typing. The test presents the user with a passage which he/she must type as accurately and quickly as he/she can. This test should be given to anyone whose typing speed needs to be measured.
