

Step-up to the Open Hybrid Cloud platform with RADAR - Rapid Demos for Ansible & Red Hat OpenShift

Built on a foundation of Red Hat® OpenShift®, the IBM hybrid cloud architecture enables you to develop and run environments across any cloud, from IBM Power Systems servers, on-premises and in the public cloud with a common platform.

Take advantage of these solutions to design, build and accelerate the adoption of an open hybrid cloud strategy, drive your business transformation and modernize your infrastructure.

IBM Garage Montpellier introduces the Rapid Demos for Ansible & Red Hat OpenShift, **RADAR**, a dedicated platform to help you leverage your skills and expertise and discover the full value of your hybrid cloud potential.

What we are offering

A comprehensive and remotely accessible platform combining Red Hat, IBM Power Systems and IBM Storage technologies.

A catalogue of pre-defined demonstrations and hands-on environments that you can book to play with.

On-demand environments to build your own demonstration or create an MVP with the assistance of experts from the IBM Center of Competency for Red Hat.

RADAR is built on an **IBM Power Private Cloud Rack solution (PPCR) like solution**, comprising IBM S922 with a total of 80 cores and 4 TB memory and one IBM FlashSystem 7200 storage (40 TB).
