

Quality. Simplicity.

Look to IBM for pre-owned IBM servers and storage.

Whether your requirements are maintenance of legacy systems and applications, sudden capacity peaks, data center moves, credit capacity, or budget challenges, IBM Certified Pre-Owned servers and storage offer solutions and support worldwide, customized for your needs.

The IBM Certification Mark shows that the product has been verified through our IBM-exclusive best-of-breed remanufacturing process. IBM Certified Pre-Owned servers and storage systems sold by IBM or IBM Business Partners are also offered with leasing, payment plans and the full IBM services portfolio.

IBM Certified Pre-Owned servers and storage systems

We offer certified, pre-owned IBM® Power Systems™, IBM Storage, IBM mainframes, IBM parts and features—uniquely available from IBM.

Quality backed by IBM Certification

We share and leverage IBM manufacturing expertise.

- Always processed using only genuine IBM parts
- Remanufactured to original manufacturing specifications using an authentic Bill of Materials and access to serial number-level maintenance records
- Testing and quality inspection performed to current IBM manufacturing standards
- Immediately eligible for IBM maintenance

At a place near you

We provide local access to inventory and support.

- Experience remanufacturing IBM equipment for more than three decades; today serving clients in 175 countries
- Full product line of Certified Pre-Owned IBM Servers and IBM Storage to meet your performance and budget requirements
- Rapid delivery to meet your schedule

Expertise in what we do

We work with subject matter experts across IBM and IBM Business Partners to provide total solutions.

- Access to in-house quality expert engineers and IBM Technical Support Services
- Current client installation experience incorporated
- Technically equivalent options available to meet your capacity and functional requirements
- 90-day quality satisfaction guarantee

IBM Certified—Pre-Owned by IBM

A single source for all your needs with IBM—new and legacy equipment.

- Total solution from one vendor, including integration with current technology requirements
- Work as one team with IBM and IBM Business Partners for support and services
- IBM products and quality at a price point that extends your spending capacity and stays within budget
