# IBM Technology Expert Labs for Identity & Access Management

Whether you are new to IAM or have an existing installation you wish to expand, our Expert Labs team can provide a proven approach to planning, installation or optimization of an IAM Verify solution.

Business Challenges

Identity & Access Management (IAM) is the cornerstone of an enterprise security agenda, but many organizations lack hands-on experience and access to standard practices and methodologies when working with IAM technology. This can result in ineffective implementation and under-utilization of these powerful tools.

By getting guidance to define 'the art of the possible', businesses can effectively implement and utilize these technologies. This leads to improved efficiency, better utilization of resources, and the ability to unlock the full potential of IAM Verify for driving innovation and achieving business goals such as:

- Preserving client privacy
- Protecting the hybrid cloud
- Securing the remote workforce and
- Reducing the risk of insider threat
- Implement a comprehensive Identity Fabric

Why use Technology Expert Labs?

Whether you need help with vision, planning, architecture and design for a first installation, or need to mature an existing IAM solution, our team can provide tried-and-tested solution templates, as well as custom design assistance, and can augment your team to ensure their success with IBM Security Verify.

What do we offer?

Technology Expert Labs provides services and support for the full range of IBM Security Identity and Access Management solutions, including IBM Security Verify, Verify Access, Verify Privilege Vault, Identity Manager, Identity Governance and Intelligence, Verify Trust Risk Based Authentication, Verify Gateway and Verify Directory Server.

Getting Started Services
Our experts can guide you through initial design, planning, integration and deployment to realize a rapid return on your investment.

Optimizing IAM Solutions
We can provide a comprehensive review of your current IAM deployment, including thoughtful analysis of use cases to meet complex requirements, processes and regulations

Expanding IAM Capabilities
Engage our expert resources to help define priorities and goals for improving your solution, including corrective recommendations and strategic solution roadmaps.

Ongoing Expert Guidance
Our team can offer regular, subscription-based guidance from our technical experts in all phases of design, deployment, operations, and transformation, while building your own team's capacity and skill.
