**Get the latest news:** Live in Munich, streamed worldwide

## Hybrid Data Management

The most valuable data in the world is behind the firewall. We'll help you with a better way to manage all of your data for better business results.

## Data Analytics and Visualization

Turn data into insights and insights into success. Help the best minds in your business see, use, and access your data.

## Unified Governance

The era of "NO" is over. Learn how to say YES to new revenues and new insights with just the right controls through self-service data access

## Data Science

Insights start with questions. Empower the right experts to ask the right questions with the tools they want.

Host

## Kate Silverton

Kate has made a career out of reporting the news. In Munich, she will go from the anchor's desk to the data stage, leading a conversation about how companies are using machine learning and data science to turn valuable data into insights to drive business decisions and create competitive advantage.

Guest Speaker

## Hilary Mason

Data scientist Hilary Mason has been at the forefront of machine learning, AI, and analytics. Hilary will discuss how your business can use these tools to move from insight to action to competitive advantage. She is the co-founder of Fast Forward Labs, Data Scientist in Residence at Accel and is the former Chief Scientist at Bitly.
