

IBM Cloud for SAP Applications

Reduce the costs and complexity of managing your SAP solutions

Your SAP applications play central roles in running your business. But maintaining SAP applications can be costly and labor-intensive.

What if you could...

Eliminate complexity

Spend less time managing, more time innovating

Reduce costs

Accelerate delivery of SAP applications

Run SAP on a security-rich infrastructure

Tap into deep expertise

You can with IBM Cloud Managed Services®.

Choose IBM Cloud for SAP Applications

IBM® Cloud for SAP Applications is a fully managed cloud service that allows you to free up internal resources, enhance operational efficiency, reduce costs and more.

Managed and secure

Managed by experts on a secure, high-performance platform designed specifically for SAP applications—32,000 specialists, 8.5 years of experience on average

Future-ready

Facilitates your journey to SAP S/4 HANA

Intelligent

Ability to integrate with IBM Watson® cognitive capabilities to get more out of SAP applications

Global

Available in five continents around the globe

Flexible

Suited for SAP Blueprints/Sandbox, dev/test, training, production (several sizes) and capacity augmentation

Hybrid

Supports SAP applications plus other business software

Available

A highly available, cloud-enabled infrastructure backed by stringent application availability service-level agreements (SLAs)

“We selected a cloud deployment model because we wanted to focus on our core business of customizing and managing applications, without trying to manage the rest of the technology stack as well.”

How have other companies benefitted from IBM Cloud for SAP Applications?

Here are just a few examples:

Lower costs

- 20% TCO reduction for SAP applications
- 25% reduction in capital costs
- Reduced overhead costs, allowing savings to be passed to customers

Better performance

- 50% faster batch processing
- 40% faster overnight run times
- 50% faster CRM processing times
- 30% faster performance with cloud services compared with on-premises environments

Greater agility

- 4x faster rollout of new functionality
- Eliminated the wait for purchasing and deploying a new physical server and software

Less complexity

- Integrated wholesale and retail operations into a single environment
- Increased system flexibility, scalability and resilience
- Simplified and improved the reliability of the SAP landscape to improve key business processes
- Supported global business operations, 24x7

Expertise

- Accelerated deployment to meet tight deadlines by tapping into deep expertise
