

# IBM Storwize V5030 All Flash

IBM® Storwize® V5030 is a flexible storage solution that offers extraordinary scalability from the smallest to the largest system without disruption. Built with IBM Spectrum Virtualize™ software, it can help you lower capital and operational storage costs with heterogeneous data services. Storwize V5030 is an easily customizable and upgradeable solution for better investment protection, improved performance, and enhanced efficiency.

## Key features of V5030 All Flash

- High availability and enhanced security
- IBM Easy Tier®, advanced copy services
- Integration of your existing storage environment – online data migration from old disk system to new V5030
- Graphical User Interface (GUI)
- Gain storage visibility, insight and control – **IBM Storage Insight**
- **External virtualization**
- **150 000 IOPS guaranteed!**
- Data encryption – **GDPR ready!**
- scalability **up to 1520 disk drives**
- redundant, A-A controllers
- 64GB cache,
- **8x16Gb FC & 4x 10GbE host ports**
- **24 TB effective capacity**

The Storwize family of products from IBM, a recognized leader in the storage industry, is known for providing efficiency and high-performance storage for almost any type of workload. IBM storage offerings customized for small, mid-sized and large organizations are designed to deliver sophisticated capabilities that help control costs for growing businesses.
