## IBM Security Identity Governance & Intelligence (IGI) Demo Request

Thank you for your demo request. An IBM representative will follow up with you shortly.

IBM Security Identity Governance & Intelligence (IGI) is IBM's leading on-premise Identity Governance & Administration solution. It allows you to provision, audit and report on user access and activity.

This personalized demo will highlight key product features including:

### **Lifecycle**

- ✓ Application account provisioning and deprovisioning
- ✓ Orphaned account management
- ✓ Application permission provisioning and deprovisioning
- ✓ Permission reconciliation and fulfilment status

### **Compliance**

- ✓ Role management
- ✓ Birth right access delivery and revocation
- ✓ Least privilege rules
- ✓ Access request and approval
- ✓ Access certification

### **Analytics**

- ✓ Risk scoring
- ✓ Risk aware access request and certification
- ✓ Business activity mapping + Separation of duty
- ✓ Role mining
