

9 to 5 is now anytime, anywhere.

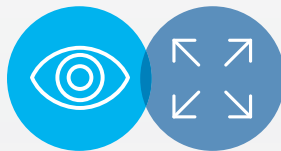

More! Faster! Better!

People expect **high performance** from their devices and apps—and for data to be available **on demand**.

To deliver, you need to be more **agile, informed and responsive**.

Expanding virtualization technologies is now a priority **for 63%** of infrastructure decision makers.¹

Forward thinkers use new **cloud workspace technologies**

... such as **Citrix NetScaler** products, designed to improve the **performance, security** and **resiliency** of apps delivered over the web.

But when something goes **wrong** in a multivendor environment, can you handle the **numerous contracts** to identify the problem source?

Look to IBM to support your NetScaler devices.

Consolidating multiple support contracts into **one agreement** can save **10–20%** of your maintenance budget.²

IBM's **multivendor capability** is tough to beat: We're the only company authorized by Citrix to provide support and maintenance for its NetScaler devices.

For more information, contact your IBM representative, read the **data sheet** or click **here**.
