

Invest in data, save on storage with IBM FlashSystem

These companies experienced the transformative effects of deploying IBM® FlashSystem® storage

IT hosting and cloud services provider [TM-Solutions](#) boosted performance by up to 20 times.

“We expect that IBM Storage will offer between 10 and 20 times the IOPs performance of our previous infrastructure. [Our customers] will notice a big impact on response times.”
— Michael van Doorn, Cofounder, TM-Solutions

“Our energy consumption dropped by 94 percent when we moved to IBM FlashSystem, which helps us make our operations much greener and reduces our power costs by an estimated 94 percent over five years.”
— Xavier Pioche, IT Infrastructure Department Manager, Orange Caraïbe

Telecommunications provider [Orange Caraïbe](#) reduced energy consumption by 94 percent.

IT solutions provider [Evolution Systems Pty. Ltd.](#) provisions new storage in 4-6 minutes rather than 4-6 weeks.

“We have been able to eliminate the time-consuming procurement cycle when adding new capacity for our private cloud clients.”
— Geoff Boreland, Managing Director, IBM Business Partner Evolution Systems Pty. Ltd.

“We have eliminated the cost and complexity of maintaining a SAN solution, reduced operational costs in our housing data center and improved our response times by 10 -20x.”
— Alexander Würflinger, CIO, Archdiocese Salzburg

The [Roman Catholic Archdiocese of Salzburg](#) avoided spending USD 80,000.

Financial services organisation [Coventry Building Society](#) increased application performance 100-fold.

“IBM solutions provide the performance and flexibility we need to service our diverse customer base through multiple channels.”
— Rosario Marcel, Shared Infrastructure Manager, Coventry Building Society
