

“Protecting our customers’ valuable assets is our most important mission.”

—Mr. Yoshinobu Abe, Managing Executive Officer, kabu.com Securities Co., Ltd.

Business challenge

kabu.com Securities sought to better protect customer assets and give customers greater peace of mind as the industry experienced increasingly advanced cyberattacks.

Transformation

Working with IBM, kabu.com Securities is deploying an additional layer of security to better combat malware and phishing attacks, the root cause of much financial fraud. An advanced, client-based fraud protection solution from IBM® Trusteer® helps prevent malware infections on end user devices and protect users against phishing of login credentials.

Business benefits

Protects

customers’ assets and gives customers greater peace of mind

Helps prevent

malware infections on end user devices and protects against phishing

Increases

company’s presence within its industry

kabu.com Securities Co., Ltd

Improper access can result in information being altered, destroyed, misappropriated or misused or can result in damage to or misuse of your systems, including for use in attacks on others. No IT system or product should be considered completely secure and no single product, service or security measure can be completely effective in preventing improper use or access. IBM systems, products and services are designed to be part of a lawful, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products or services to be most effective. IBM DOES NOT WARRANT THAT ANY SYSTEMS, PRODUCTS OR SERVICES ARE IMMUNE FROM, OR WILL MAKE YOUR ENTERPRISE IMMUNE FROM, THE MALICIOUS OR ILLEGAL CONDUCT OF ANY PARTY.
