[*Health care resource utilization and costs for patients with tardive dyskinesia.*](#)

Carroll B, Irwin DE. J Manag Care Spec Pharm 2019; 25(7): 810–816

Healthcare researchers have used IBM® MarketScan® Research Databases to understand disease progression, treatment patterns, health outcomes, and their associated costs to patients, employers, health plans, and the government. Fully HIPAA compliant, the MarketScan Databases are among the largest proprietary databases used for healthcare research in the United States.

They are the basis of over 2,300 peer-reviewed articles published in leading journals since the first article appeared in The New England Journal of Medicine in 1990 (J.B. Hillman et al.). MarketScan-based research has made a substantial contribution to the body of literature used to formulate policy decisions and improve healthcare for Americans.
