

Migrate Domino App to the Cloud

Customers may want to move their domino app to the cloud owing to economic considerations or due to strategic priorities. Further limited in-house skills on domino infrastructure can also create a strong case for migrating domino app to the cloud. The economics and flexibility cloud offers helps customers keep the best of both worlds, the functionally rich domino application and the agility provided by cloud infrastructure

This migration service is valuable for any customer who wants to move their Domino application infrastructure to a cloud hosted solution. Services include application analysis, application remediation, cloud infrastructure design, Managed Business Services (MBS).

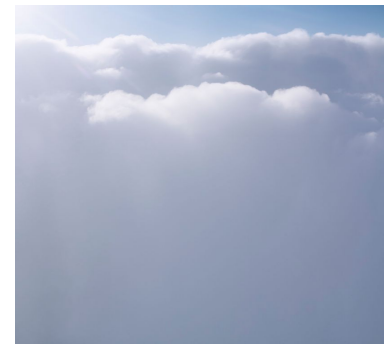

Avoid disruption

Continue using in house processes built over domino without worrying about infrastructure limitations

Reduced skills risk

Reduced dependence on keeping in-house skills

Scale with Cloud

Utilize flexibility and scalability provided by Cloud.

This solution is a great fit for Customers who have moved their mail to Smart Cloud Notes and no longer want to have Domino infrastructure on premises, or for customers who are no longer doing Notes/Domino development.
